Fsc Product Labeling Guide:

Handbook of Research on Strategic Retailing of Private Label Products in a Recovering Economy

Gómez-Suárez, Mónica, Martínez-Ruiz, María Pilar, 2016-06-20 As the global market continues to recuperate from economic downfall it is essential for private label products to find ways to compete with alternatives offered by wholesale and national retailers In many cases it becomes difficult for off brand products to generate market appeal when consumers have preconceived notions about the quality of generic products and loyalty to branded products The Handbook of Research on Strategic Retailing of Private Label Products in a Recovering Economy emphasizes advertising and promotional approaches being utilized as well as consumer behavior and satisfaction in response to marketing strategies and the sensitive pricing techniques being implemented to endorse generic and store brand products available on the market Highlighting brand competition between wholesalers retailers and private brand names following a global economic crisis this publication is an extensive resource for researchers graduate students economists and business professionals Looking behind the Label

Tim Bartley, Sebastian Koos, Hiram Samel, Gustavo Setrini, Nik Summers, 2015-05-25 What does it mean when consumers shop with a conscience and choose products labeled as fair or sustainable Does this translate into meaningful changes in global production processes To what extent are voluntary standards implemented and enforced and can they really govern global industries Looking behind the Label presents an informative introduction to global production and ethical consumption tracing the links between consumers choices and the practices of multinational producers and retailers Case studies of several types of products wood and paper food apparel and footwear and electronics are used to reveal what lies behind voluntary rules and to critique predominant assumptions about ethical consumption as a form of political expression *The Regulation of Product Standards in World Trade Law* Ming Du, 2020-11-12 This monograph has two central purposes The first is to provide a critical analysis of how governmental private and hybrid product standards are regulated in the GATT WTO legal framework The second purpose is to explore both positively and normatively the impact that WTO disciplines may have on the composition function and decision making process of various standard setting bodies through the lens of a series of selected case studies including the EU eco labelling scheme ISO standards and private standards such as the FSC The book analyses what role if any the WTO may play in making product standards applied in international trade embody not only technological superiority but also substantive and procedural fairness such as deliberation representativeness openness transparency due process and accountability Whilst it has been long recognised that voluntary product standards drawn up by both governmental and non governmental bodies can in practice create trade barriers as serious as mandatory governmental regulations a rigorous and systematic inquiry into the boundary relevance and impact of WTO disciplines on product standards is still lacking Providing a lucid interpretation of the relevant WTO rules and cases on product standards this book fills this significant gap in WTO law literature Definitive and comprehensive this is an essential reference work for
