Materials Bulk Package Accident Performance Data Collection Philip J. Daum, 2013 TRB's Hazardous Materials Cooperative Research Program HMCRP Report 10 Feasibility Study for Highway Hazardous Materials Bulk Package Accident Performance Data Collection explores methods to collect and analyze performance data for U.S. Department of Transportation DOT specified hazardous materials bulk packages such as portable tanks and cargo tank motor vehicles. The report also identifies and evaluates institutional challenges to data collection and makes suggestions for overcoming these challenges. In addition, the report offers a methodical approach for developing and implementing a reporting database system to collect and characterize information about damage to U.S. DOT specified hazardous materials bulk packages involved in accidents regardless of whether the damage resulted in a leak of contents. Appendices A through G have been published on a CD-ROM which is bound into this report. Appendix titles are the following: Appendix A Survey Development and Questions; Appendix B Conditional Probability of Release as a Function of Data Refinement; Appendix C Differences Between Highway and Rail Hazardous Material Transportation Affecting Development of a Bulk Package Accident Performance Database; Appendix D Option Evaluation Tool; Appendix E Pilot Study Data Collection Tool; Appendix F Links to Newspaper Articles; Appendix G An Example of Bulk Package Performance Analysis Using Multivariate Regression. Measurement of the Sustainability Performance of Chemical Manufacturing Processes Mohammad Hossein Ordouei, 2024-06-24. The present book introduces the Composite Sustainability Indicator (CSI) defining sustainability as meeting present needs without compromising future generations. The CSI integrates the Waste Reduction Algorithm, risk assessment models, and energy intensity indices to evaluate environmental impacts and facilitate risk-informed design. Through case studies, the author demonstrates the effectiveness of these methodologies, aggregating them into a Key Process Indicator for sustainability analysis. The book covers chapters on computer-aided modelling, heterogeneous catalytic reactions, pollution prevention, and global warming. Notably, it delves into energy impacts, risk assessment methodologies, and the CSI's application in complex processes such as refineries. Leveraging advanced process simulators like Aspen Plus and HYSYS alongside WAR GUI, the author designs processes and estimates risks and environmental impacts. This guide aims to equip process systems engineers with tools to design environmentally conscious and sustainable chemical processes using high-quality raw data endorsed by EPA. Strategic products like sustainable gasoline blends are studied as case studies.

Annual accountability hearing with the Nursing and Midwifery Council Great Britain: Parliament: House of Commons: Health Committee, 2011-07-26. The Health Committee reports on the annual accountability hearings with the General Medical Council (GMC) HC 1429 and Nursing and Midwifery Council (NMC) HC 1428. The reports call for doctors and nurses to develop a wider responsibility for the overall quality of care delivered to

patients and they have an obligation as professionals to report to their professional body any concerns they have about the quality of care being delivered by their colleagues The GMC and the NMC must give a strong lead in this area and ensure that failure to act on this responsibility is regarded as a serious breach of professional obligation The Committee stresses that both regulators need to have effective revalidation processes in place so that they can periodically check on how doctors and nurses are performing The Committee recognises that the NMC is making steady progress towards being an effective regulator but cautions that there remains substantial ground to cover before it can be considered fully effective work around pro active regulation risk based visits must be expanded guidance about the care of older people must be reinforced by an action plan to deliver improved outcomes in this group Government and both regulators must speed up efforts to resolve the serious problems posed by doctors and nurses who qualify elsewhere in Europe and earn the right to work in the UK without having their language or medical skills tested The UK and European law that underpins the workings of both regulators needs a complete overhaul

Safe Comp 95 Gerhard Rabe,2013-04-18 Safety related computer systems are those which may lead to loss of life injury or plant and environmental damage Such systems therefore have to be developed and implemented so that they meet strict require and security because their applications cover ments on safety reliability nearly all areas of daily life and range from controlling and monitoring industrial processes through robotics and power generation to transport systems Highly reliable

electronic systems for safety related applications represent an area in which industry has been involved for many years and which is now gaining increasing importance in academia Their relevance also results from an increased perception of safety by society Therefore not only are technicians involved in this area but psycho logical and sociological aspects also play a major role Dealing with safety related systems we have to consider the whole lifecycle of these systems starting from specification up to implementation assessment and operation All those issues mentioned above are covered in this book which represents the proceedings of the 14th International Conference on Computer Safety Reliability and Security SAFECOMP 95 held in Belgirate Italy 11 13 October 1995 The conference continues the series of SAFECOMP conferences which was originated by the European Workshop on Industrial Computer Systems Technical Committee 7 on Safety Security and Reliability EWICS TC7 and reflects the state of the art experience and new trends in the area of safety related computer systems
