Handbook of Treatment Planning for Children with Autism and Other Neurodevelopmental Disorders Pamela McPherson, 2022-10-25 This handbook addresses treatment planning for children with autism spectrum disorder ASD and other neurodevelopmental disabilities NDDs using a medical home perspective It examines the medical home model which has been promoted as the standard of care by the American Academy of Pediatrics since 2002 emphasizing collaboration between patients families and providers to optimize care The handbook addresses treatment planning including the coordination of the care provided by multiple

specialists with a clear shared vision for maximizing each child's potential. Key areas of coverage include Elements of treatment planning, history of the medical home model, documentation and strategies to facilitate communication. Goals of treatment from the perspectives of the family, person served, care providers, and fiscal and regulatory bodies. Role of each specialist highlighting the most common conditions experienced by children with ASD and other NDD with expectations for assessment and treatment. Detailed recommendations for making referrals and assisting the child and family in preparing for appointments. The Handbook of Treatment Planning for Children with Autism Spectrum Disorder and Other Neurodevelopmental Disabilities is a must-have resource for researchers, professors, and graduate students as well as clinicians, therapists, and other professionals across such interrelated disciplines as clinical child, school, and developmental psychology, child and adolescent psychiatry, social work, rehabilitation medicine, therapy, pediatrics, and special education.

A Comprehensive Guide to Child Psychotherapy and Counseling Christiane Brems, 2008-03-19. Christiane Brems, an experienced clinician, supervisor, and educator, presents a metatheoretical yet practical guide to working with children ages 3 to 12 years. She draws heavily on developmental, interpersonal, family systems, and self-psychological schools of thought and integrates the core components of all of these approaches in a clear and concise manner. She stresses the need for intensive assessment to precede conceptualization and treatment planning so that treatment techniques are dictated by the needs of each child and family. Brems has contoured the third edition to meet the practical needs and expectations of students and practitioners. Divided among four sections, the chapters follow the logical development of clinicians, mirroring the natural flow of work with children: from the practitioner's self-exploration to learning about special aspects of children such as diversity and development to awareness about the special needs and demands of children as related to environmental, legal, and ethical issues. Brems prepares clinicians to discover their own personal traits that may facilitate or hinder their work with children. She walks child therapists and counselors through the initial stages of intake, assessment, and conceptualization. The material on assessment instruments is thoroughly updated; discussions refer to the latest versions of instruments, and if new instruments emerged that meet one of the purposes deemed essential to child treatment, they are included. The text contains case examples, each illustrating a specific therapeutic technique.

Abnormal Child and Adolescent Psychology Linda Wilmschurst, 2017-03-03. Written from a developmental perspective, Abnormal Child and Adolescent Psychology is organized around five prominent and recurring themes: the course of normal development proceeds in an orderly and predictable direction; maladaptive behaviors represent deviations from the normal path; maladaptive behavior is represented by a continuum of severity; symptoms, syndromes, disorders are based on the degree to which behaviors deviate from the norm; individual, interpersonal, contextual, and cultural factors interact in a reciprocal way to influence normal development and abnormal deviations. Theoretical input from diverse perspectives can guide our understanding of underlying processes that precipitate and maintain behaviors and the different developmental pathways that might result. The revision will be divided

into 5 sections all integrating the DSM 5 and will include a new chapter on child maltreatment and self injurious behavior
