Gauteng Dept Of Health Nursing Programme For 2016:

Healthcare Access - New Threats, New Approaches Ayşe Emel Önal, 2023-11-02 Access to health care is the ability to receive health services for the prevention detection and treatment of disorders that affect health For health care to be accessible it must be affordable and able to protect and improve health There are myriad reasons that may make access to health services difficult or even impossible These include economic problems conflicts climate change internal and external migrations beliefs and so on This book examines many of these barriers to health care and proposes solutions for overcoming them *Geographies of Health and Development* Rachel Bezner Kerr, Isaac Luginaah, 2016-03-03 The geographies of health

and development is an emerging sub discipline tying in with many of the conceptual theoretical and practical components of other disciplines working in health health care economics and international development Spatially and theoretically grounded in geography this collection offers a fresh perspective on the dialectic relationships between health and development Health problems in a developing context take on much higher rates of prevalence as a result of the varied cultural structural and economic vulnerabilities of the people they impact This book begins by exploring some of the circumstances surrounding the distinctive health inequities currently facing many developing countries including malaria maternal mortality and HIV AIDS This is followed by a discussion of how matters of physical access and human resource issues and perhaps most importantly the challenges of financing together shape the access and utilization of health care Examining how the environment interacts to influence the health of the people that live there the next section includes discussion around challenges of food in security and the importance of clean and uncontaminated water for health Finally the book explores the influence of globalization on health specifically within the urban environment against the backdrop of global health policy **A framework for continuous quality improvement for fast-track queues in clinics in eThekweni**

Dudu G. Sokhela , 2024-05-31 This book explores primary health care users who visit the clinic for short consultations those who regularly come to collect medication for chronic illnesses such as hypertension diabetes mellitus arthritis epilepsy tuberculosis HIV and AIDS clients for family planning and babies coming for routine weight monitoring immunisation and routine prophylactic treatment Since these health care users come for short consultations the research investigates where the bottlenecks in the clinic queues resulted in long waiting times and if these consultations were of expected quality This book arose from the author s own experience working in a primary health care setting focused on the challenges faced by patients This book will add to the body of knowledge and management of health care users as this book offers practical recommendations that are tailor-made for specific health care users to be implemented by primary health care providers and settings Furthermore the country is faced with a burden of communicable and non communicable diseases New strategies are required to address the ever changing disease pattern and the rapidly growing populations *Christian Responses to Spiritual Incursions into the 21st Century Church and Society* Nikolaos Asproulis, Stuart Devenish, 2020-10-30

This volume provides an account of the surprising in breaking of spiritual life that persists in our culture despite the best efforts of atheist spokespersons and secular theorists Spirituality in its varying forms is irrepressible resisting our attempts to exclude it by continuing to seep through the cracks and leak through the gaps When it is allowed to manifest itself through the Christian faith tradition it has the power to surprise transform and renew everything it touches This volume contains a series of case studies each of which describes the inner functionings and out workings of the spiritual life as a transformative point of contact between God world society and self Each chapter contains high level inquiry drawing on best practice scholarship that is deeply aware of the needs and opportunities that confront 21st century society ECRM 2021 20th
