Martin S. Shanguhya, Toyin Falola, 2019-10-08 *Development in Modern Africa Past and Present Perspectives* contributes to our understanding of Africa's experiences with the development process. It does so by adopting a historical and contemporary analysis of this experience. The book is set within the context of critiques on development in Africa that have yielded two general categories of analysis: skepticism and pessimism. While not overlooking the shortcomings of development, the themes in the book express an optimistic view of Africa's development experiences, highlighting elements that can be tapped into to enhance the condition of African populations and their states. By using case studies from precolonial, colonial, and postcolonial Africa, contributors to the volume demonstrate that human instincts to improve material, social, and spiritual worlds are universal. They are not limited to the Western world, which the term and process of development are typically associated with. Before and after contact with the West, Africans have actively created institutions and values that they have actively employed to improve individual and community lives. This innovative spirit has motivated Africans to integrate or experiment with new values and structures, challenges, and solutions to human welfare that resulted from contact with colonialism and the postcolonial global community. The book will be of interest to academics in the fields of history, African studies, and regional studies. **Mathematics Teaching and Professional Learning in sub-Saharan Africa** Kakoma

Luneta, 2021-12-09 The book represents a crop of wide-ranging research conducted by renowned scholars in sub-Saharan Africa revolving around mathematics teaching and professional development programs for mathematics teachers. The research-based proposals and actual how-to conduct professional development initiatives that enhance effective mathematics instruction are rooted in teacher input and informed by learners' errors and misconceptions. The book provides a comprehensive snapshot on mathematics teaching, learning, and effective professional development programmes for mathematics teachers in sub-Saharan Africa. It is the only research output that advances and disseminates issues of mathematics education and research in the region with input from South Africa, Kenya, Rwanda, Uganda, Malawi, Namibia, Lesotho, Ethiopia, and Zimbabwe. *The Changing Space Economy of City-Regions* Koech Cheruiyot, 2017-10-30 This book addresses the South African Space Economy and its stark disparities and dualisms through an assessment of the Gauteng City Region, the largest economic agglomeration in the country and on a continent bedevilled by a myriad of development challenges. The book's focus on understanding the overall character of Gauteng City Region's Space Economy through data mining, analysis, and mapping comprehensively supplements the Space Economy literature on the region. It covers the disparities exacerbated by an overlay of apartheid planning ideology and top-down regional development based on selective encouragement of manufacturing investments in growth points or poles and how implementation of past policies intended to cure these disparities have yielded mixed results. This book further offers the Gauteng City Region as a microcosm of the national economy in the form of evident significant place-based variations in the intensity and character of economic structure that on the one hand enjoys massive agglomeration economies while on the other has high levels of poverty and

large numbers of people living below the Minimum Living Level This book should appeal to urban studies specialists economists and development studies researchers in the Global South **The Global Practice of Forensic Science**

Douglas H. Ubelaker, 2015-02-16 The Global Practice of Forensic Science presents histories issues patterns and diversity in the applications of international forensic science Written by 64 experienced and internationally recognized forensic scientists the volume documents the practice of forensic science in 28 countries from Africa the Americas Asia Australia and Europe Each country s chapter explores factors of political history academic linkages the influence of individual cases facility development types of cases examined integration within forensic science recruitment training funding certification accreditation quality control technology disaster preparedness legal issues research and future directions Aimed at all scholars interested in international forensic science the volume provides detail on the diverse fields within forensic science and their applications around the world **An Emerging Approach for Education and Care** Susana Castro, Olympia

Palikara, 2017-08-07 An Emerging Approach for Education and Care provides a synthesis of the extensive research that has been conducted worldwide about the International Classification of Functioning Disability and Health for Children and Youth in education and care The main purpose of the ICF is to provide a classification of functioning for adults and children with difficulties considering their everyday lives all the activities they perform and the environments they are embedded in in addition to their health condition which has been the traditional focus of Special Education provision in many countries Each chapter presents an evidence based study describing how the ICF has been used to improve the provision of services for children and young people with Special Educational Needs around the world Moreover each chapter is written by an expert on the ICF from a different country thus providing an overview of how the ICF can be applied in international educational contexts with different educational and health systems and cultural backgrounds This synthesis of world leading research focuses on the ICF as a framework to approach assessment intervention and classification for children and young people with SEN whilst also providing practical examples of how it can be implemented An Emerging Approach for Education and Care will be essential reading for academics researchers and practitioners working on Special Educational Needs provision and rehabilitation It should also be of great interest to those involved in the study of early childhood education and for postgraduate students aspiring to work in these settings South African Urban Change Three Decades After Apartheid

Anthony Lemon, Ronnie Donaldson, Gustav Visser, 2021-06-10 This book provides an analysis of South African urban change over the past three decades It draws on a seminal text Homes Apart and revisits conclusions drawn in that collection that marked the final phases of urban apartheid It highlights changes in demography social as well as economic structure and their differential spatial expression across a range of urban sites in South Africa The evidence presented in this book points to a very complex set of narratives in urban South Africa and one that cannot be reduced to a singular statement so the conclusions of the various investigations are in many ways open As urban apartheid represented one clear outcome its post

apartheid urban legacies varies greatly from city to city As such this book is a great resource to students and academics focused on urban change in South African cities since the demise of apartheid and scholars of urban policy making in South Africa and Southern urbanists generally
