Gauteng Mathematical Literacy Paper June Exam:

The Emperor's New Computer, 2019-02-11 c ICT's subtle and seductive impact on educational administration, globalisation, curriculum design, development and delivery, and teacher roles and responsibilities has challenged the privileged notion of how education in society is or should be delivered. Most schools and curricula require ICT-enabled or supported courses as part of their mission or design. Yet the seeming ubiquitous adoption of ICT has not made the technology's use any less controversial. There is much that is still puzzling and troubling about Information and Communication Technology and its impact on teachers and learners. *The Emperor's New Computer: ICT Teaching and Learning* presents nine chapters that reflect international points of view on the intersection of Information and Communication Technology and education, pose critical questions about ICT's use, and examine ways of navigating the complex paths that ICT has carved in all aspects of global education, society and culture. **Annual Report** South Africa.
