**Territorial Governance and Spatial Transformation in Post-apartheid South Africa** Daniel du Plessis, 2025-07-05 The book provides a reflective account of the evolution of the territorial governance structures and processes in South Africa over a period of 30 years after the transition to a post apartheid society in 1994 It also considers the role and influence of these changing governance institutions and processes and their associated outputs in the form of policies and plans on several priority dimensions of urban spatial transformation The synthesis of the experiences and lessons learnt provides the bases for contemplating important future focus areas for territorial governance such as spatial transformation towards smart cities an African perspective for future South African cities and transitioning towards a streamlined integrated territorial governance system The lessons and experiences are not only of local significance in South Africa but also globally in countries and regions faced with territorial governance and spatial transformation challenges

**Urbanization and Industrialization for Africa's Transformation** , 2017 The 2017 Economic Report on Africa focuses on the linkages between industrialization and urbanization Urbanization is one of Africa mega trends with profound implications for the social economic environmental dimensions of growth and transformation Theory and experience demonstrate that industrialization and urbanization can be mutually reinforcing processes It is therefore imperative to explore the linkages between urbanization and industrialization given the profound implications for structural transformation in Africa So far current policy narratives and frameworks on structural transformation and industrialization in Africa have largely failed to factor in the spatial and urban dimensions of industrialization and in particular the advantages presented by productivity enhancement and agglomeration effects generated by cities Yet the nexus between urbanization and industrialization is of particular relevance for Agenda 2063 and the 2030 Agenda on Sustainable Development Both agendas recognize urbanization as a critical factor for sustainable development It is also important to consider urbanization and industrialization in light of Africa s engagement with the Third United Nations Conference on Housing and Sustainable Urban Development Habitat III to be held in Quito Ecuador in October 2016 In this context African policy makers have clearly recognized urbanization as an engine of structural transformation for inclusive and sustainable growth
