## **Grade 1paper 2 June Geography Memo 2014:**

*Asymmetric Crisis in Europe and Possible Futures* Johannes Jäger, Elisabeth Springler, 2015-04-10 The crisis in Europe is often discussed as a crisis of European integration or a crisis of national economies within Europe Both the methodological Europeanism and methodological nationalism miss out the important links between economic and political processes at different spatial scales within Europe and therefore asymmetries and phenomena of uneven development In addition a discussion of possible scenarios which systematically addresses the implications of anti crisis policies is missing This volume seeks to close this gap by systematically integrating the analysis of economic policy or technical solutions to the crisis within a broader framework of political economy It argues that combining critical political economy approaches and post Keynesian perspectives allows for a systematic understanding of the economic and political dimensions of the crisis Although both approaches have the capacity to deal with asymmetries and uneven development the heterogeneity in Europe has been an often largely neglected dimension of analysis However this recent crisis has shown that this is an essential dimension which has to be addressed in order to better understand the dynamics of European development and integration Hence this book aims to deal with asymmetries in Europe and to bridge the gap between the two perspectives This work will initiate an integrative debate that is crucial for a deeper understanding of the current crisis and is an important resource for all students and scholars of IPE European political economy and European politics **Taken For A Ride** Matteo

**The Coming of Neo-Feudalism** Joel Kotkin, 2023-01-10 Following a remarkable epoch of greater dispersion of wealth and opportunity we are inexorably returning towards a more feudal era marked by greater concentration of wealth and property reduced upward mobility demographic stagnation and increased dogmatism If the last seventy years saw a massive expansion of the middle class not only in America but in much of the developed world today that class is declining and a new more hierarchical society is emerging The new class structure resembles that of Medieval times At the apex of the new order are two classes a reborn clerical elite the clerisy which dominates the upper part of the professional ranks universities media and culture and a new aristocracy led by tech oligarchs with unprecedented wealth and growing control of information These two classes correspond to the old French First and Second Estates Below these two classes lies what was once called the Third Estate This includes the yeomanry which is made up largely of small businesspeople minor property owners skilled workers and private sector oriented professionals Ascendant for much of modern history this class is in decline while those below them the new Serfs grow in numbers a vast expanding property less population The trends are mounting but we can still reverse them if people understand what is actually occurring and have the capability to oppose them

These government policies make housing unaffordable frustrate the goals of the civil rights movement and lock in inequality in our urban and suburban landscapes Through moving accounts of families excluded from economic and social opportunity as they are hemmed in through new redlining that limits the type of housing that can be built Richard Kahlenberg vividly illustrates why America has a housing crisis He also illustrates why economic segregation matters since where you live affects access to transportation employment opportunities decent health care and good schools He shows that housing choice has been socially engineered to the benefit of the affluent and that astonishingly the most restrictive zoning is found in politically liberal cities where racial views are more progressive Despite this there is hope Kahlenberg tells the inspiring stories of growing number of local and national movements working to tear down the walls that inflicts so much damage on the lives of millions of Americans

An Endogenous Theory of Property Rights Peter Ho, 2018-10-15 From a neo liberal neo classical paradigm secure formal and private property rights are crucial to fostering sustained development Institutions that fail to respond to shifting socio economic opportunities are thus forced to make new arrangements The enigma is posed by developments on the ground Why would the removal of authoritarian institutions during the Arab Spring or Iraq War not increase market efficiency but rather cause the reverse while China and India despite persisting insecure informal and common institutions featured sustained growth This collection posits that understanding these paradoxes requires a refocusing from form to function detached from normative assumptions about institutional appearance In so doing three things are accomplished First starting from case studies on land it is ascertained that the argument can be meaningfully extended to labour capital and beyond Second the argument validates the Credibility Thesis that is once institutions persist they fulfil a function Third the collection studies development broadly construed by including the modes of production and beyond the rural and urban the developed and developing This is why it reviews property rights from China and India to Turkey Mexico and Malaysia covering issues such as customary rights and privatization mining and pastoralism dam building and irrigation but also state owned banks trade unions and notaries This book was originally published as a special issue of The Journal of Peasant Studies

**A World More Concrete** N. D. B.
