Parents Matter Regina M. Mistretta, 2016-09-08 Parents are social factors in children's lives that can positively influence math achievement and one does not need a degree in math to provide support. What one needs is a guidebook filled with good questions to pose tips for supporting math thinking and general attitudes about math and an insider's view into what math teaching and learning looks like in today's classrooms. This book serves as that guidebook and its author invites parents to use it while making sense of math with children. Parents and children are encouraged to share and celebrate multiple ways of solving math examples rather than debate over the better approach. Chapter 1 includes a description about how and why math teaching has changed through the years. The big math ideas taught through the grades are outlined in Chapter 2. Chapters 3 through 5 offer detailed descriptions about how big math ideas develop in Grades Kindergarten through 2, 3 through 5 and 6 through 8 respectively. In conclusion, Chapter 6 offers tasks that provide additional entry points for engaging in conversation about math at home.

Your Mathematics Standards Companion, Grades 6-8 Ruth Harbin Miles, Lois A. Williams, 2017-05-25 Transforming the standards into learning outcomes just got a lot easier. In this resource, you can see in an instant how teaching to your state standards should look and sound in the classroom. Under the premise that math is math, the authors provide a Cross Referencing Index for states implementing their own specific mathematics standards, allowing you to see and understand which page number to turn to for standards-based teaching ideas. It's all here, page by page. Get the inside scoop on which standards connect what key vocabulary means and time-saving tables showing where to focus instruction for each grade. Write curriculum for ratios and proportional relationships, the number system, expressions and equations, functions, geometry, and statistics/probability. Use the What to Teach pages to deliver powerful standards-based lessons. Learn effective techniques to create an environment where all students can experience math breakthroughs. Incorporate the Standards for Mathematical Practice to improve students' ability to problem solve, construct viable arguments, use tools strategically, attend to precision, and more. Cross-referenced index listing the standards in the following states, explaining what is unique to the standards of each state. **Math for All** Linda Schulman Dacey, Karen Gartland, 2009 Embrace the diverse spectrum of abilities, interests, and learning styles among students with this powerful series. Each book offers practical, research-based guidance to differentiating instruction in the mathematics classroom. The authors provide dozens of ready-to-use differentiated tasks, including reproducibles, along with ways to scaffold mathematical learning strategies for providing and structuring choice within classrooms, guidance in leading large group discussions when students are completing different activities, and engaging ways to address NCTM's Principles and Standards for School Mathematics and Curriculum Focal Points.
