Grade 1geography November 2014 Memorandum:

Asymmetric Crisis in Europe and Possible Futures Johannes Jäger, Elisabeth Springler, 2015-04-10 The crisis in Europe is often discussed as a crisis of European integration or a crisis of national economies within Europe Both the methodological Europeanism and methodological nationalism miss out the important links between economic and political processes at different spatial scales within Europe and therefore asymmetries and phenomena of uneven development In addition a discussion of possible scenarios which systematically addresses the implications of anti crisis policies is missing This volume seeks to close this gap by systematically integrating the analysis of economic policy or technical solutions to the crisis within a broader framework of political economy It argues that combining critical political economy approaches and post Keynesian perspectives allows for a systematic understanding of the economic and political dimensions of the crisis Although both approaches have the capacity to deal with asymmetries and uneven development the heterogeneity in Europe has been an often largely neglected dimension of analysis However this recent crisis has shown that this is an essential dimension which has to be addressed in order to better understand the dynamics of European development and integration Hence this book aims to deal with asymmetries in Europe and to bridge the gap between the two perspectives This work will initiate an integrative debate that is crucial for a deeper understanding of the current crisis and is an important resource for all students and scholars of IPE European political economy and European politics

Mobility and Migration Choices

Martin van der Velde, Ton van Naerssen, 2016-03-03 The crossing of national state borders is one of the most discussed issues of contemporary times and it poses many challenges for individual and collective identities This concerns both short distance mobility as well as long distance migration Choosing to move or not across international borders is a complex decision involving both cognitive and emotional processes This book tests the approach that three crucial thresholds need to be crossed before mobility occurs the individual s mindset about migrating the choice of destination and perception of crossing borders to that location and the specific routes and spatial trajectories available to get there Thus both borders and trajectories can act as thresholds to spatial moves The threshold approach with its focus on processes affecting whether when and where to move aims to understand the decision making process in all its dimensions in the hope that this will lead to a better understanding of the ways migrants conceive perceive and undertake their transnational journeys This book examines the three constitutive parts discerned in the cross border mobility decision making process people borders and trajectories and their interrelationships Illustrated by a global range of case studies it demonstrates that the relation between the three is not fixed but flexible and that decision making contains aspects of belonging instability security and volatility affecting their mobility or immobility

Taken For A Ride Matteo Rizzo, 2017-05-19 How does public transport work in an African city under neoliberalism Who owns what in it Who has the power to influence its shape and changes in it over time What does it mean to be a precarious and informal worker in the private minibuses that provide public transport in

Dar es Salaam These are the main questions that inform this in depth case study of Dar es Salaam s public transport system over more than forty years The growth of cities and informal economies are two central manifestations of globalization in the developing world Taken for a Ride addresses both drawing on long term fieldwork in Dar es Salaam Tanzania and charting its public transport system s journey from public to private provision This new addition to the Critical Frontiers of Theory Research and Practice in International Development Studies series investigates this shift alongside the increasing deregulation of the sector and the resulting chaotic modality of public transport It reviews state attempts to regain control over public transport and documents how informal wage relations prevailed in the sector The changing political attitude of workers towards employers and the state is investigated from an initial incapacity to respond to exploitation to the political organisation and unionisation which won workers concessions on labour rights A longitudinal study of workers throws light on patterns of occupational mobility in the sector and the political and economic interests that shaped the introduction of Bus Rapid Transit in Dar es Salaam and local resistance to it are analysed Taken for a Ride reveals the political economy of public transport exposing the limitations of market fundamentalist and post colonial scholarship on economic informality the urban experience in developing countries and the failure to locate the agency of the urban poor within their economic and political structures It is both a contribution and a call for the contextualised study of actually existing neoliberalism Money, Markets, and Monarchies Adam Hanieh,2018-09-13 Framed by a critical analysis of global capitalism this book examines how the six states of the Gulf Cooperation Council are powerfully shaping the political economy of the wider Middle East Through unprecedented and fine grained empirical research encompassing sectors such as agribusiness real estate finance retail telecommunications and urban utilities Adam Hanieh lays out the pivotal role of the Gulf in the affairs of other Arab states This vital but little recognised feature of the Middle East s political economy is essential to understanding contemporary regional dynamics not least of which is the emergence of significant internal tensions within the Gulf itself Bringing fresh insights and a novel interdisciplinary approach to debates across political economy critical geography and Middle East studies this book fills an important gap in how we understand the region and its place in the global order Sold Out Michelle Malkin,John Miano,2015-11-10 The 1 New York Times bestselling author and firebrand syndicated columnist Michelle Malkin sets her sights on the corrupt businessmen politicians and lobbyists flooding our borders and selling out America s best and brightest workers In Sold Out Michelle Malkin and John Miano name names and expose the lies of those who pretend to champion the middle class while aiding and abetting massive layoffs of highly skilled American workers in favor of cheap foreign labor Malkin and Miano will explode some of the most commonly told myths spread in the media like these Lie 1 America is suffering from an apocalyptic shortage of science technology engineering and math workers Lie 2 US companies cannot function without an unlimited injection of the highly skilled and highly educated foreign workers who offer capital and energy that American workers can t match Lie 3 America s best and brightest talents are protected because

employers are required to demonstrate that they've made every effort to hire American citizens before resorting to foreign labor. For too long open borders, tech billionaires and their political enablers have escaped tough public scrutiny of their means and motives. It's time to trade the whitewash for solvent American workers deserve better and the public deserves the unvarnished truth.

The Meritocracy Trap Daniel Markovits, 2020-09-08 A revolutionary new argument from eminent Yale Law professor Daniel Markovits attacking the false promise of meritocracy. It is an axiom of American life that advantage should be earned through ability and effort. Even as the country divides itself at every turn, the meritocratic ideal that social and economic rewards should follow achievement rather than breeding reigns supreme. Both Democrats and Republicans insistently repeat meritocratic notions. Meritocracy cuts to the heart of who we are. It sustains the American dream. But what if both up and down the social ladder, meritocracy is a sham. Today meritocracy has become exactly what it was conceived to resist: a mechanism for the concentration and dynastic transmission of wealth and privilege across generations. Upward mobility has become a fantasy and the embattled middle classes are now more likely to sink into the working poor than to rise into the professional elite. At the same time, meritocracy now ensnares even those who manage to claw their way to the top, requiring rich adults to work with crushing intensity, exploiting their expensive educations in order to extract a return. All this is not the result of deviations or retreats from meritocracy but rather stems directly from meritocracy's successes. This is the radical argument that Daniel Markovits prosecutes with rare force. Markovits is well placed to expose the sham of meritocracy. Having spent his life at elite universities, he knows from the inside the corrosive system we are trapped within. Markovits also knows that if we understand that meritocratic inequality produces near universal harm, we can cure it. When *The Meritocracy Trap* reveals the inner workings of the meritocratic machine, it also illuminates the first steps outward towards a new world that might once again afford dignity and prosperity to the American people.

Putin's Labor Dilemma Stephen Crowley, 2021-07-15 In *Putin's Labor Dilemma*, Stephen Crowley investigates how the fear of labor protest has inhibited substantial economic transformation in Russia. Putin boasts he has the backing of workers in the country's industrial heartland, but as economic growth slows, in Russia, reviving the economy will require restructuring the country's industrial landscape. At the same time, doing so threatens to generate protest and instability from a key regime constituency. However, continuing to prop up Russia's Soviet-era workplaces, writes Crowley, could lead to declining wages and economic stagnation, threatening protest and instability. Crowley explores the dynamics of a Russian labor market that generally avoids mass unemployment, the potentially explosive role of Russia's monotowns, conflicts generated by massive downsizing in Russia's Detroit, Tol'yatti, and the rapid politicization of the truck drivers' movement. Labor protests currently show little sign of threatening Putin's hold on power, but the manner in which they are being conducted points to substantial chronic problems that will be difficult to resolve. *Putin's Labor Dilemma* demonstrates that the Russian economy must either find new sources of economic growth or face stagnation. Either scenario, market reforms or economic stagnation, raises the possibility even

probability of destabilizing social unrest **Life in the Age of Drone Warfare** Lisa Parks, Caren Kaplan, 2017-10-19 This volume's contributors offer a new critical language through which to explore and assess the historical juridical geopolitical and cultural dimensions of drone technology and warfare. They show how drones generate particular ways of visualizing the spaces and targets of war while acting as tools to exercise state power. Essays include discussions of the legal justifications of extrajudicial killings and how US drone strikes in the Horn of Africa impact life on the ground as well as a personal narrative of a former drone operator. The contributors also explore drone warfare in relation to sovereignty governance and social difference, provide accounts of the relationships between drone technologies and modes of perception and mediation, and theorize drones' relation to biopolitics, robotics, automation, and art. Interdisciplinary and timely, *Life in the Age of Drone Warfare* extends the critical study of drones while expanding the public discussion of one of our era's most ubiquitous instruments of war. Contributors: Peter Asaro, Brandon Wayne Bryant, Katherine Chandler, Jordan Crandall, Ricardo Dominguez, Derek Gregory, Inderpal Grewal, Lisa Hajjar, Caren Kaplan, Andrea Miller, Anjali Nath, Jeremy Packer, Lisa Parks, Joshua Reeves, Thomas Stubblefield, Madiha Tahir. *The Routledge Handbook on Crime and International Migration* Sharon Pickering, Julie Ham, 2017-07-14 The *Routledge Handbook on Crime and International Migration* is concerned with the various relationships between migration, crime, and victimization that have informed a wide criminological scholarship, often driven by some of the original lines of inquiry of the Chicago School. Historically, migration and crime came to be the device by which Criminology and cognate fields sought to tackle issues of race and ethnicity, often in highly problematic ways. However, in the contemporary period, this body of scholarship is inspiring scholars to produce significant evidence that speaks to some of the biggest public policy questions and debunks many dominant mythologies around the criminality of migrants. The *Routledge Handbook on Crime and International Migration* is also concerned with the theoretical, empirical, and policy knots found in the relationship between regular and irregular migration, offending, and victimization, the processes and impact of criminalization, and the changing role of criminal justice systems in the regulation and enforcement of international mobility and borders. The Handbook is focused on the migratory fault lines between the Global North and Global South, which have produced new or accelerated sites of state control, constructed irregular migration as a crime and security problem, and mobilized ideological and coercive powers usually reserved for criminal or military threats. Offering a strong international focus and comprehensive coverage of a wide range of border, criminal justice, and migration-related issues, this book is an important contribution to criminology and migration studies and will be essential reading for academics, students, and practitioners interested in this field. **America's Moment: Creating Opportunity in the Connected Age** Rework America, 2015-06-15 It is time for a new conversation. Amid the biggest economic transformation in a century, the challenge of our time is to make sure that all Americans benefit from the wave of digital revolutions around the world that have permeated and upended modern life. Yet today's economic arguments seem stuck. We need a new vision of a hopeful future.

and a new action agenda So many Americans are uncertain about the future How can there be so many paths to opportunity with so few people traveling them As a nation we have to understand what is required to help Americans succeed now and how to prepare our country for what comes next We have been here before A hundred years ago America experienced the greatest economic transformation and technological revolution in its history The transformation of the past twenty years as the world has moved through the information era into the digital age has turned our life and work upside down once again It is a time of tremendous change but also of tremendous possibility Rework America is a group of American leaders who know from experience the challenges we face and the potential solutions In America's Moment they suggest a practical agenda for an exciting future It is illustrated by people who are already showing the way and includes actions Americans can take today in their own communities preparing people to succeed using the reach of the Internet and data to innovate jobs and to reach new markets all over the world using technology to match employers and workers and transitioning to a no collar working world neither blue collar nor white collar Set against the history of how Americans succeeded once before in remaking their country America's Moment is about the future It describes how the same forces of change technology and a networked world can become tools that can open opportunity to everyone *Federal Register*, 2013-03 **Waste of a Nation** Assa

Doron, Robin Jeffrey, 2018-03-26 Assa Doron and Robin Jeffrey argue that in India the removal and reuse of waste lays waste to human lives People at the bottom are injured and stigmatized as they work with sewage toxic chemicals and rotting garbage If India is to emerge as a model for the world its policies will have to reach beyond the environment to encompass empathy **Raced Markets** Lisa Tilley, Robbie Shilliam, 2021-05-30 Despite rich archives of work on race and the global economy most notably by scholars of colour and Global South intellectuals the discipline of Political Economy has largely avoided an honest confrontation with how race works within the domains it studies not least within markets By way of

corrective this book draws together scholarship on the material function of race at various scales in the global political economy The collective provocation of the contributors to this volume is that race has been integral to the formation of capitalism as extensively laid out by the racial capitalism literature and takes on new forms in the novel market spaces of neoliberalism The chapters within this volume also reinforce that the current political conjuncture marked by the ascension of neo fascist power cannot be defined by an exceptional intrusion of racism nor can its racism be dismissed as epiphenomenal Raced Markets will be of great value to scholars students and researchers interested in political economy and racial capitalism as well as those willing to explore how race takes on new forms in the novel market spaces of contemporary neoliberalism The chapters in this book were originally published as a special issue of the New Political Economy **The Geography of Injustice** Barak Kushner, 2024-03-15 In The Geography of Injustice Barak Kushner argues that the war crimes tribunals in East Asia formed and cemented national divides that persist into the present day In 1946 the Allies convened the Tokyo Trial to prosecute Japanese wartime atrocities and Japan's empire At its conclusion one of the judges

voiced dissent claiming that the justice found at Tokyo was only the sham employment of a legal process for the satisfaction of a thirst for revenge War crimes tribunals Kushner shows allow for the history of the defeated to be heard In contemporary East Asia a fierce battle between memory and history has consolidated political camps across this debate The Tokyo Trial courtroom as well as the thousands of other war crimes tribunals opened in about fifty venues across Asia were legal stages where prosecution and defense curated facts and evidence to craft their story about World War Two These narratives and counter narratives form the basis of postwar memory concerning Japan s imperial aims across the region The archival record and the interpretation of court testimony together shape a competing set of histories for public consumption The Geography of Injustice offers compelling evidence that despite the passage of seven decades since the end of the war East Asia is more divided than united by history

A Research Agenda for Gentrification Winifred Curran, Leslie Kern, 2023-06-01 Offering a new theoretical framework for understanding gentrification and displacement this timely Research Agenda focuses on resistance as the central research area in this subject field Arguing that the future of gentrification research should focus on accomplishing the end of gentrification chapters provide practical organizing and policy strategies using international case studies which are rooted in community based research

Nothing Personal? Nick Gill, 2016-02-23 In this groundbreaking new study Nick Gill provides a conceptually innovative account of the ways in which indifference to the desperation and hardship faced by thousands of migrants fleeing persecution and exploitation comes about Features original unpublished empirical material from four Economic and Social Research Council ESRC funded projects Challenges the consensus that border controls are necessary or desirable in contemporary society Demonstrates how immigration decision makers are immersed in a suffocating web of institutionalized processes that greatly hinder their objectivity and limit their access to alternative perspectives Theoretically informed throughout drawing on the work of a range of social theorists including Max Weber Zygmunt Bauman Emmanuel Levinas and Georg Simmel

The Rise and Rise of Illegal Ticket Touting Alessandro Moretti, 2023-02-10 This book presents an ethnographic study of contemporary ticket touts in the UK Despite the recent interest in the topic of black market ticket sales media coverage and parliamentary interventions over the last ten years have revealed a widespread lack of knowledge with regard to the phenomenon of touting and the players engaging in the practice The Rise and Rise of Illegal Ticket Touting sheds light on the world of touting and delivers an authentic picture of the individuals involved of their methods values and motivations for performing ticket touting as an organised entrepreneurial deviant activity The touts varied methods of buying and selling tickets the hierarchical structures and strict ethos of their criminal organisations and their specific modi operandi for evading detection and arrest both on the streets and online are focal points of the study Of equal importance are the touts attitudes perceptions and adaptations to or outright dismissal of society s legal and moral frameworks This book illuminates why historic and renewed attempts to challenge ticket touting have been unsuccessful focusing on inadequate legislation a lack of enforcement and the widespread corruption and

exploitable loopholes that exist within the official primary ticket market An accessible and compelling read **The Rise and Rise of Illegal Ticket Touting** will appeal to students and scholars of criminology sociology social policy policing and all those with an interest in live music and sport and the hidden practices that lurk beneath the surface **Future of the Forest** Anand P. Vaidya, 2025-04-15 **Future of the Forest** is the story of legal transformations of forests across India through collective action Since the nineteenth century Indian forest dwellers have been unable to enforce their claims to the land on which they live or the products of it that they use But at the turn of the twenty first century a new national movement led to the passage of the Forest Rights Act a landmark law that recognizes the tenure and use rights of India's millions of landless forest dwellers Anand P Vaidya tracks the Forest Rights Act from the movements that pushed for its passage to its drafting and the many revisions it underwent to satisfy coalitions of local peoples conservationists and a wide spectrum of political parties and movements and finally to its impact on two neighboring villages in central India's forest belt The forests have seen a long history of political authority enacted to the benefit of the powerful **Future of the Forest** follows the work of activists and forest dwellers who turned to the law to shift this balance of power **Toxic Communities** Dorceta Taylor, 2014-06-20 Uncovers the systemic problems that expose poor communities to environmental hazards From St Louis to New Orleans from Baltimore to Oklahoma City there are poor and minority neighborhoods so beset by pollution that just living in them can be hazardous to your health Due to entrenched segregation zoning ordinances that privilege wealthier communities or because businesses have found the paths of least resistance there are many hazardous waste and toxic facilities in these communities leading residents to experience health and wellness problems on top of the race and class discrimination most already experience Taking stock of the recent environmental justice scholarship **Toxic Communities** examines the connections among residential segregation zoning and exposure to environmental hazards Renowned environmental sociologist Dorceta Taylor focuses on the locations of hazardous facilities in low income and minority communities and shows how they have been dumped on contaminated and exposed Drawing on an array of historical and contemporary case studies from across the country Taylor explores controversies over racially motivated decisions in zoning laws eminent domain government regulation or lack thereof and urban renewal She provides a comprehensive overview of the debate over whether or not there is a link between environmental transgressions and discrimination drawing a clear picture of the state of the environmental justice field today and where it is going In doing so she introduces new concepts and theories for understanding environmental racism that will be essential for environmental justice scholars A fascinating landmark study **Toxic Communities** greatly contributes to the study of race the environment and space in the contemporary United States **After the Education Wars** Andrea Gabor, 2018-06-12 The education wars have been demoralizing for teachers **After the Education Wars** helps us to see a better way forward Cathy N Davidson The New York Times Book Review **After the Education Wars** is an important book that points the way to genuine reform Diane Ravitch author of *Reign of Error* and *The Death and Life of*

the Great American School System A bestselling business journalist critiques the top down approach of popular education reforms and profiles the unexpected success of schools embracing a nimbler more democratic entrepreneurialism In an entirely fresh take on school reform business journalist and bestselling author Andrea Gabor argues that Bill Gates Eli Broad and other leaders of the prevailing education reform movement have borrowed all the wrong lessons from the business world After the Education Wars explains how the market based measures and carrot and stick incentives informing today s reforms are out of sync with the nurturing culture that good schools foster and contrary to popular belief at odds with the best practices of thriving twenty first century companies as well These rich detailed stories of real reform in action illustrate how enduring change must be deeply collaborative and relentlessly focused on improvement from the grass roots up lessons also learned from both the open source software and quality movements The good news is that solutions born of this philosophy are all around us from Brockton Massachusetts where the state s once failing largest high school now sends most graduates to college to Leander Texas a large district where school improvement spurred by the ideas of quality guru W Edwards Deming has become a way of life A welcome exception to the doom and gloom canon of education reform After the Education Wars makes clear that what s needed is not more grand ideas but practical and informed ways to grow the best ones that are already transforming schools
