**Excellence Gaps in Education** Jonathan A. Plucker, Scott J. Peters, 2020-01-15 2017 Texas Association for Gifted and Talented Legacy Scholar Book Award 2017 National Association of Gifted Children Scholar Book of the Year Award In Excellence Gaps in Education Jonathan A Plucker and Scott J Peters shine a spotlight on excellence gaps the achievement gaps among subgroups of students performing at the highest levels of achievement Much of the focus of

recent education reform has been on closing gaps in achievement between students from different racial ethnic or socioeconomic backgrounds by bringing all students up to minimum levels of proficiency Yet issues related to excellence gaps have been largely absent from discussions about how to improve our schools and communities Plucker and Peters argue that these significant gaps reflect the existence of a persistent talent underclass in the United States among African American Hispanic Native American and poor students resulting in an incalculable loss of potential among our fastest growing populations Drawing on the latest research and a wide range of national and international data the authors outline the scope of the problem and make the case that excellence gaps should be targeted for elimination They identify promising interventions for talent development already underway in schools and provide a detailed review of potential strategies including universal screening flexible grouping targeted programs and psychosocial interventions Excellence Gaps in Education has the potential for changing our national conversation about equity and excellence and bringing fresh attention to the needs of high potential students from underrepresented backgrounds

**Overall Strategy for Evaluating Low-Dose Toxicity from Endocrine Active Chemicals** National Academies of Sciences,  
 Engineering, and Medicine,Division on Earth and Life Studies,Board on Environmental Studies and Toxicology,Committee on  
 Endocrine-Related Low-Dose Toxicity,2017-07-14 To safeguard public health the US Environmental Protection Agency EPA  
 must keep abreast of new scientific information and emerging technologies so that it can apply them to regulatory decision  
 making For decades the agency has dealt with questions about what animal testing data to use to make predictions about  
 human health hazards how to perform dose response extrapolations how to identify and protect susceptible subpopulations  
 and how to address uncertainties As alternatives to traditional toxicity testing have emerged the agency has been faced with  
 additional questions about how to incorporate data from such tests into its chemical assessments and whether such tests can  
 replace some traditional testing methods Endocrine active chemicals EACs have raised concerns that traditional toxicity  
 testing protocols might be inadequate to identify all potential hazards to human health because they have the ability to  
 modulate normal hormone function and small alterations in hormone concentrations particularly during sensitive life stages  
 can have lasting and significant effects To address concerns about potential human health effects from EACs at low doses  
 this report develops a strategy to evaluate the evidence for such low dose effects      *Framing Opioid Prescribing Guidelines*  
*for Acute Pain* National Academies of Sciences, Engineering, and Medicine,Health and Medicine Division,Board on Health  
 Care Services,Committee on Evidence-Based Clinical Practice Guidelines for Prescribing Opioids for Acute Pain,2020-02-20  
 The opioid overdose epidemic combined with the need to reduce the burden of acute pain poses a public health challenge To  
 address how evidence based clinical practice guidelines for prescribing opioids for acute pain might help meet this challenge  
 Framing Opioid Prescribing Guidelines for Acute Pain Developing the Evidence develops a framework to evaluate existing  
 clinical practice guidelines for prescribing opioids for acute pain indications recommends indications for which new evidence  
 based guidelines should be developed and recommends a future research agenda to inform and enable specialty  
 organizations to develop and disseminate evidence based clinical practice guidelines for prescribing opioids to treat acute  
 pain indications The recommendations of this study will assist professional societies health care organizations and local state  
 and national agencies to develop clinical practice guidelines for opioid prescribing for acute pain Such a framework could  
 inform the development of opioid prescribing guidelines and ensure systematic and standardized methods for evaluating  
 evidence translating knowledge and formulating recommendations for practice      **What Makes a World-Class School**  
**and How We Can Get There** James H. Stronge,Xianxuan Xu,2017-06-15 For years students in the United States have  
 lagged behind students in many other countries on such measures of achievement as the PISA and TIMSS assessments In an  
 increasingly globalized world such a gap is worrisome Armed with statistics examples and cautionary tales from Scandinavia

to Japan James H Stronge and Xianxuan Xu have written a book that can help educators better prepare students and close that gap In *What Makes a World Class School and How We Can Get There* you will find Careful analysis of recent international assessment results what they mean and what can be done to improve them In depth profiles of high achieving education systems around the globe their histories their lessons learned and what they can teach educators and policymakers in the United States Strategies for aligning successful educational approaches from international systems to U S schools which strategies to use in which subjects and with which students Transformative ideas for cultivating a truly world class system of schooling both simple and complex ways to raise the bar for all students no matter what their background Educators in every country must ensure that their students are as prepared as possible to lead a future generation of citizens This thought provoking and copiously researched book provides educators with a blueprint for radical improvement based on the hard learned experiences of their peers around the world

**Making Kids Cleverer** David Didau, 2018-12-20 In *Making Kids Cleverer* A manifesto for closing the advantage gap David Didau reignites the nature vs nurture debate around intelligence and offers research informed guidance on how teachers can help their students acquire a robust store of knowledge and skills that is both powerful and useful Foreword by Paul A Kirschner Given the choice who wouldn t want to be cleverer What teacher wouldn t want this for their students and what parent wouldn t wish it for their children When David started researching this book he thought the answers to the above were obvious But it turns out that the very idea of measuring and increasing children s intelligence makes many people extremely uncomfortable If some people were more intelligent where would that leave those of us who weren t The question of whether or not we can get cleverer is a crucial one If you believe that intelligence is hereditary and environmental effects are trivial you may be sceptical But environment does matter and it matters most for children from the most socially disadvantaged backgrounds those who not only have the most to gain but who are also the ones most likely to gain from our efforts to make all kids cleverer And one thing we can be fairly sure will raise children s intelligence is sending them to school In this wide ranging enquiry into psychology sociology philosophy and cognitive science David argues that with greater access to culturally accumulated information taught explicitly within a knowledge rich curriculum children are more likely to become cleverer to think more critically and subsequently to live happier healthier and more secure lives Furthermore by sharing valuable insights into what children truly need to learn during their formative school years he sets out the numerous practical ways in which policy makers and school leaders can make better choices about organising schools and how teachers can communicate the knowledge that will make the most difference to young people as effectively and efficiently as possible David underpins his discussion with an exploration of the evolutionary basis for learning and also untangles the forms of practice teachers should be engaging their students in to ensure that they are acquiring expertise not just consolidating mistakes and misconceptions There are so many competing suggestions as to how we should improve education that knowing how to act can seem an impossible challenge

Once you have absorbed the arguments in this book however David hopes you will find the simple question that he asks himself whenever he encounters new ideas and initiatives Will this make children cleverer as useful as he does Suitable for teachers school leaders policy makers and anyone involved in educations The Omega Principle Paul Greenberg,2018-07-10 By the bestselling author of Four Fish and American Catch an eye opening investigation of the history science and business behind omega 3 fatty acids the miracle compound whose story is intertwined with human health and the future of our planet Omega 3 fatty acids have long been celebrated by doctors and dieticians as key to a healthy heart and a sharper brain In the last few decades that promise has been encapsulated in one of America s most popular dietary supplements Omega 3s are today a multi billion dollar business and sales are still growing apace even as recent medical studies caution that the promise of omega 3s may not be what it first appeared But a closer look at the omega 3 sensation reveals something much deeper and more troubling The miracle pill is only the latest product of the reduction industry a vast global endeavor that over the last century has boiled down trillions of pounds of marine life into animal feed fertilizer margarine and dietary supplements The creatures that are the victims of that industry seem insignificant to the untrained eye but turn out to be essential to the survival of whales penguins and fish of all kinds including many that we love to eat Behind these tiny molecules is a big story of the push and pull of science and business of the fate of our oceans in a human dominated age of the explosion of land food at the expense of healthier and more sustainable seafood of the human quest for health and long life at all costs James Beard Award winning author Paul Greenberg probes the rich and surprising history of omega 3s from the dawn of complex life when these compounds were first formed to human prehistory when the discovery of seafood may have produced major cognitive leaps for our species and on to the modern era when omega 3s may point the way to a bold new direction for our food system With wit and boundless curiosity Greenberg brings us along on his travels from Peru to Antarctica from the Canary Islands to the Amalfi Coast to reveal firsthand the practice and repercussions of our unbalanced way of eating Rigorously reported and winningly told The Omega Principle is a powerful argument for a more deliberate and forward thinking relationship to the food we eat and the oceans that sustain us **Assessing Student Learning by Design** Jay McTighe,Steve Ferrara,2021 How can we help teachers use classroom assessments to gather appropriate evidence for all valued learning goals and to use those assessments not just to measure learning but to promote it This book provides an answer in a practical proven and principled Assessment Planning Framework that moves away from solely multiple choice tests toward a wide range of approaches to classroom assessment activities including performance based assessments The Framework examines four different types of learning goals considers various purposes and audiences for assessment information reviews five categories of classroom assessment methods and presents options for communicating actionable results To the authors the primary purpose of classroom assessment is to inform teaching and learning rather than simply to assign grades This concise resource will be a reliable go to reference for teachers school

leaders mentors and coaches in guiding classroom assessment practices and understanding their underlying principles Book  
Features Builds on the classic book Understanding by Design written by Grant Wiggins and Jay McTighe Offers a practical  
nontechnical presentation appropriate for teacher preparation and busy practitioners K 16 Explores different purposes for  
and methods of classroom assessment and grading Addresses assessment of academic standards as well as transdisciplinary
