Polka, John William McKenna, 2016-09-14 This book is about doing what's right for public education in the United States in this age of intensive curriculum convergence, planned instructional standardization and oppressive accountability procedures. Information is presented about why and how educators, parents, students, community members and policy makers have decided to protest against current state and federal educational policies and procedures. The practical experiences of parents, teachers, principals, school superintendents, school board members and professors are analyzed in chapters of this book. Their first-hand experiences with the various components of the current reform movement are poignantly presented. Through their voices, the frustrations with the serious flaws associated with this reform agenda are passionately and logically articulated. They comprehensively explain their personal and professional motivations for organizing and fomenting a rethinking in school reform implementation procedures and they advocate their smarter approach to school reforms in our country. The book includes key references that elucidate the need to seriously re-think the directions and strategies of contemporary schooling in order to maintain enlightened, creative instruction based on exciting student-centered curriculum experiences and professional educational judgments.      Academic Assessment and Intervention Steven Little, Angeleque

Akin-Little, 2014-01-21 Serving students with academic deficiencies necessitates communication and collaboration among professionals from several disciplines. Academic Assessment and Intervention brings together divergent approaches in order to demonstrate that scientific evidence rather than biases or previous practice must determine assessment practices that are selected and used for particular purposes. Similar to a handbook in its comprehensive topical coverage, this edited collection provides a contextual foundation for academic assessment and intervention, describes both norm-referenced and curriculum-based assessment measurement in detail, considers the implications of both of these assessments on ethnically diverse populations, provides a clear link between assessment evidence-based interventions and the RTI model and considers other important topics related to this area such as teacher behavior. Intended primarily for graduate-level courses in education, school psychology or child clinical psychology, it will also be of interest to practicing professionals in these fields.      **No**

**Child Left Behind and other Federal Programs for Urban School Districts** Frank Brown, Richard C. Hunter, 2006-07-04 The No Child Left Behind (NCLB) Act is designed to close the achievement gap between disadvantaged and advantaged children through its Title I program.
