Application of the Systems Approach to the Management of Complex Water Systems Slobodan P. Simonovic,2020-12-23 During the past five decades we have witnessed a tremendous evolution in water resource system management Three characteristics of this evolution are of particular note First the application of the systems approach to complex water management problems has been established as one of the most important advances in the field of water resource management Second the past five decades have brought a remarkable transformation of attitude in the water resource management community towards environmental concerns and action to address these concerns Third applying the principles of sustainability to water resource decision making requires major changes in the objectives on which decisions are based and an understanding of the complicated inter relationships between existing ecological economic and social factors The Special Issue includes 15 contributions that offer insights into contemporary problems approaches and issues related to the management of complex water resources systems It will be presumptuous to say that these 15 contributions characterize the success or failure of the systems approach to support water resources decision making However these contributions offer interesting lessons from current experiences and highlight possible future work **Monthly Catalog of United States Government Publications** United States. politics and its connection with the spheres of power in international relations. It is a very methodical book. Theoretically flawless. A deep, brilliant, and enlightening academic text.

Mois s Gardu o Garcia, Professor in the Center for International Relations, National Autonomous University of Mexico (UNAM). In this book, Ali Fathollah Nejad goes beyond the usual one-dimensional view that dominates the study of Iran's foreign policy and presents a comprehensive framework explaining the interrelated role of socio-cultural, economic, and geopolitical elements in shaping the Islamic Republic's foreign policy orientation. The book also focuses on a crucial period involving two critical transitions: a systemic transition from the unipolar to the post-unipolar world order and a domestic one from a hardline to a more moderate worldview. All this makes the book a valuable contribution to the field.

Hamidreza Azizi, Alexander von Humboldt Fellow, Middle East and Africa Research Division, German Institute for International and Security Affairs (SWP), former Assistant Professor of Regional Studies, Shahid Beheshti University, Tehran. 2016-20. *Iran in an Emerging New World Order* provides a timely and original account of foreign policy making in the Islamic Republic of Iran, especially the turbulent first decade of the new millennium.

Kamran Matin, Senior Lecturer in International Relations, Sussex University, Associate Research Fellow, Swedish Institute of International Affairs, UI. Ali Fathollah Nejad's *Iran in an Emerging New World Order* builds on a reliable scientific approach and an informed overview of Iranian foreign policy. It identifies and examines the different factors which orientate it, such as its various schools of thought and their debates, the role of the interplay between structure and culture, and the one between internal and external realms. Furthermore, it casts light on the evolution of Tehran's choices, including its look to the East. In this new book, Fathollah Nejad has provided a challenging study which demonstrates the need to go beyond conventional framings to include political culture and provides a new evaluation of Iran's international relations. This is an original and significant contribution to the literature on international relations, the workings of the Islamic Republic, and the understanding of the latter's regional and global actions.

Firouzeh Nahavandi, Professor of Sociology of Development and Political Science, Director, Institute of Sociology, Director, CECID Center for International Cooperation and Development Studies, Universit libre de Bruxelles (ULB), as well as President, Graduate School of Development Studies of French Community of Belgium. Through its careful analysis of a modern political culture in Iran, gestated in the context of an encounter with European colonial modernity and evolved in correspondence with a catalogue of internal and external others, Ali Fathollah Nejad's timely book places contemporary geopolitical concerns against a much-needed backdrop of colonial and anti-colonial histories.

Siavash Saffari, Associate Professor of West Asian Studies, Department of Asian Languages and Civilizations, Seoul National University. If you really want to dive deep into Iran and understand the reasons why its leaders are operating in the current crisis, this is the book you should read. It teaches analysts and policy makers to understand the past to act wisely in the future.
