LAB EXERCISE 5: Lizard Evolution Virtual Lab

Answer the following questions as you finish each module in the virtual lab.

MODULE 1: Introduction

At the beginning of the virtual lab, you were asked to select eight lizards from a category. What criteria did you use to select your lizards?

My criteria were: size, color, and shape of the lizards.

Did your lizards grow similar? Were they?

Yes, they all grew to the same size. I thought about choosing lizards that were all the same color, but I chose lizards that were all the same shape and size.

An adaptation is a structure or function that the organism has as a population because it increases the ability to survive and reproduce in a particular environment. Provide one example and an explanation of an adaptation of the lizard you chose.

The lizards I chose were all green. This is an adaptation because the green color helps them blend in with the grass and leaves, making them harder to see.

Provide one evolutionary explanation for why lizards that are green are still alive today (i.e., they grew) would have survived a transformation.

One evolutionary explanation is that the green lizards were better at surviving and reproducing than the brown lizards, so they passed on their genes.
