Ford's 1955-1970 is a fascinating retrospective of the cars, the design process, manufacturing equipment packages and a thorough listing of options, interior patterns and paint codes. All models from 1955 to 1970 that brought Ford to dominance in the full-size category are revealed in compelling detail. The introduction of the Galaxie, the development of the Skyliner retractable roof car, the radical redesign of the 1960 models to counter Chevy's new sedan and much more is covered. Period magazine reviews provide insight and perspective of the driving experience and performance of various full-size models. A fascinating retrospective on Ford Y-Block engines as well as Ford FE engine family and the new for 1970 Lima series engine is also provided. In addition, author David Temple examines Ford's racing exploits featuring the dual-quad 427 Cammer engine, the Galaxie Grand National race car and factory and lightweight drag cars.

The Complete Book of Ford Mustang Mike Mueller, 2022-01-25. The Complete Book of Ford Mustang 4th Edition details the development, technical specifications and history of America's original pony car, now updated to cover cars through the 2021 model year.

Cobra Jet: The History of Ford's Greatest High-Performance Muscle Cars Rob Kinnan, Diego Rosenberg, 2020-03-15. Relive Ford's glory days in the muscle car era in this stunning new volume covering the popular and powerful Cobra Jets. Ford's Total Performance racing program in the early 1960s was the first stone turned in the task of repurposing its image to the youth market. The introduction of the Mustang increased that exponentially, but even in 289 Hi-Po form it was no match for the Pontiac GTO or other muscle cars. Neither was the 1966 Fairlane GT or subsequent 390 Mustang the following year. But when the 428 Cobra Jet Mustang debuted at Pomona for the NHRA Winternationals in 1968, that image evolved from wholesome to fearsome. Cobra Jet Mustangs downed all comers and took the vaunted Super Stock Eliminator crown while introducing a new weapon under the hood to serve as fair warning to what was to be uncoiled at the stoplight. By the next model year, with the revolutionary shaker hood on Cobra Jet-equipped Mach 1s and the striking snake adorning the sheet metal of the midsize Cobra, Ford's image makeover was complete. The demise of the muscle car era didn't signify the end of the Cobra Jet, as Ford continued the performance reign with the 351 Cobra Jet. The legacy left by Mustang, Cougar, Torino, Cyclone and Ranchero 428, 429 and 351 Cobra Jet-powered vehicles is indelible.

Mustang Monthly editor Rob Kinnan and muscle car expert Diego Rosenberg bring this history back to life in an all-encompassing book that is the first to specifically feature all Cobra Jet cars, including the purpose-built drag cars of today.

Cobra Jet: The History of Ford's Greatest High-Performance Cars will hypnotize you as the first and complete history of Ford's most famous engines during the era's peak.

The Essential Muscle Car Mike Mueller, 2004. Essential Muscle Cars pays tribute to the legend and is lavishly illustrated with large-format full-color photographs of all the major models along with a comprehensive technical specification of each. It is the perfect reference book for everyone interested in America's most interesting performance cars.

Ford Big-Block Parts Interchange George Reid, 2017-12-15. Over the course of performance car history and specifically muscle car history, big-block engines are particularly beloved and for good reason. Not only are they the essence of what a muscle car is, but before modern technology

and stroker engines they were also the best way to make a lot of horsepower All of the Detroit manufacturers had their versions of big block engines and Ford was no exception Actually Ford was somewhat unique in that it had two very different big block engine designs during the muscle car era The FE engine was a design pioneered in the late 1950s primarily as a more powerful replacement for the dated Y block design because cars were becoming bigger and heavier and therefore necessitated more power to move What started as torquey engines meant to move heavyweight sedans morphed into screaming high performance mills that won Le Mans and drag racing championships through the 1960s By the late 1960s the design was dated so Ford replaced the FE design with the 385 series also known as the Lima design which was more similar to the canted valve Cleveland design being pioneered at the same time It didn't share the 1960s pedigree of racing success but the new design was better in almost every way it exists via Ford motorsports offerings to this day In Ford Big Block Parts Interchange Ford expert and historian George Reid covers both engines completely Interchange and availability for all engine components are covered including cranks rods pistons camshafts engine blocks intake and exhaust manifolds carburetors distributors and more Expanding from the previous edition of High Performance Ford Parts Interchange that covered both small and big block engines in one volume this book cuts out the small block information and devotes every page to the FE Series and 385 big blocks from Ford which allows for more complete and extensive coverage
