11 Turn signal circuit check

1 Most turn signal problems are the result of a burned out bulb or corroded socket. This is especially true when the turn signals function properly in one direction (although possibly too quickly), but fail to flash in the other direction. If this is the case, first check the bulbs, the sockets and the wiring connectors (see Sections 12 and 13). If all the turn signals fail to work, check the fuse (see Section 5), and then
