History has always been a matter of arranging evidence into a narrative but the public debate over the meanings we attach to a given history can seem particularly acute in our current age Like all artistic mediums comics possess the power to mold history into shapes that serve its prospective audience and creator both It makes sense then that history no stranger to the creation of hagiographies particularly in the service of nationalism and other political ideologies is so easily summoned to the panelled page Comics like statues museums and other vehicles for historical narrative make both monsters and heroes of men while fueling combative beliefs in personal versions of United States history *Drawing the Past Volume 1 Comics and the Historical Imagination in the United States* the first book in a two volume series provides a map of current approaches to comics and their engagement with historical representation The first section of the book on history and form explores the existence shape and influence of comics as a medium The second section concerns the question of trauma understood both as individual traumas that can shape the relationship between the narrator and object and historical traumas that invite a reassessment of existing social economic and cultural assumptions The final section on mythic histories delves into ways in which comics add to the mythology of the US Together both volumes bring together a range of different approaches to diverse material and feature remarkable scholars from all over the world      **Wwii “Korean Women Not Sex-Enslaved”**

**Ethics** Andrew Crane, Dirk Matten, Sarah Glozer, Laura J. Spence, 2019 Award winning best selling and authoritative the business ethics book of choice **To Risk It All** Admiral James Stavridis, USN, 2022-05-24 From one of the great naval

leaders of our time a master class in decision making under pressure through the stories of nine famous acts of leadership in battle drawn from the history of the United States Navy with outcomes both glorious and notorious At the heart of Admiral James Stavridis s training as a naval officer was the preparation to lead sailors in combat to face the decisive moment in battle whenever it might arise In *To Risk it All* he offers up nine of the most useful and enthralling stories from the US Navy s nearly 250 year history and draws from them a set of insights that we can all put to use when confronted with fateful choices Conflict Crisis Risk These words have a distinct meaning in a military context that we hope will never apply identically in our own lives But at the same time as Admiral Stavridis shows with great clarity many lessons are universal *To Risk it All* is filled with thrilling and heroic exploits but it is anything but a shallow exercise in myth burnishing Every leader in this book has real flaws as all humans do and the stories of failure or at least the decisions that have been defined as such are as crucial as the stories of success In the end when this master class is concluded we will be better armed for hard decisions both expected and not

### **Policy Legitimacy, Science and Political**

**Authority** Michael Heazle, John Kane, 2015-10-05 Voters expect their elected representatives to pursue good policy and presume this will be securely founded on the best available knowledge Yet when representatives emphasize their reliance on expert knowledge they seem to defer to people whose authority derives not politically from the sovereign people but from the presumed objective status of their disciplinary bases This book examines the tensions between political authority and expert authority in the formation of public policy in liberal democracies It aims to illustrate and better understand the nature of these tensions rather than to argue specific ways of resolving them The various chapters explore the complexity of interaction between the two forms of authority in different policy domains in order to identify both common elements and differences The policy domains covered include climate geoengineering discourses environmental health biotechnology nuclear power whaling economic management and the use of force This volume will appeal to researchers and to convenors of post graduate courses in the fields of policy studies foreign policy decision making political science environmental studies democratic system studies and science policy studies
