Paralympic Games and beyond: How to Prepare Athletes with Motor Disabilities for Peaking Pierre-Marie Leprêtre, Victoria L. Goosey-Tolfrey, Thomas W. J. Janssen, Claudio Perret, 2017-05-25 In 1960 the 9th Annual International Stoke Mandeville Games were supported for the first time by the Italian Olympic Committee Taking place six days after the Closing Ceremony of the XVII Olympic Games the paralympic games for disabled athletes were born From Roma in 1960 to London in 2012 the Paralympic Games grew in terms of athletes number from 400 to 4 237 and now brings together more than 164 nations Perret 2015 The word Paralympic derives from the Greek preposition para beside or alongside and the word Olympic Paralympics want to be the parallel Games to the Olympics and illustrate how the two movements exist side by side Paralympics History of the Movement 2016 Now taking place after the Olympics Games the Paralympic Games are the pinnacle of the career of athletes with physical impairments and have become the second largest sport event in the world Perret 2015 Paralympics History of the Movement 2016 Gold and Gold 2011 The first statement of the vision of the

International Paralympic Committee IPC i e to create the conditions for athlete empowerment through self determination Paralympics History of the Movement 2016 International Paralympic Committee 2016 shows the importance of the place of the athlete with an impairment at the heart of the Paralympic Movement The ultimate aim of the IPC is to enable Paralympic athletes to achieve sporting excellence and inspire and excite the world International Paralympic Committee 2016 The performance level of athletes with an impairment improved to a point that in the present days sport news and world sport movements focus on the potential advantage of artificial limbs among athletes with amputations and their integration in able bodied competitions Burkett 2010 However they do not represent the totality of athletes with an impairment at the Paralympic Games Athletes with other physical impairments visual deficit spinal cord injury cerebral palsy or else are eligible to compete These impairments induce typical functional and physiological e g cardiovascular thermoregulatory responses to exercise For example spinal cord injury athletes with tetraplegia or paraplegia causes thermoregulatory impairment Goosey Tolfrey et al 2008 and individuals with cerebral palsy have also demonstrated higher thermal and metabolic strain than matched controls during treadmill walking in the heat Maltais et al 2004 Thus hyperthermia among these athletes with an impairment alters their performance compared to their Olympic counterparts Bhambhani 2002 Mechanical performance analysis the description of physiological responses according to the functional impairment or else the response to training and the relationship between laboratory and field testing responses are different parts of a package introduced here to address the aim of the IPC to enable Paralympic athletes to achieve sporting excellence Paralympics History of the Movement 2016 International Paralympic Committee 2016 Paralympic Games held almost immediately following the respective Olympics in the same site Gold and Gold 2011 also have exposed athletes to different environmental conditions In the present 20 odd years three of four Summer Paralympic Games have been or will be organized in the heat with or without significant humidity Beijing 2008 Average weather in September for Beijing China 2016 Rio de Janeiro 2016 Average weather in September for Rio de Janeiro Brazil 2016 and Tokyo 2020 Average weather in September for Ota Japan 2016 It has been established that the environmental conditions not only influences the level of cognitive and exercise performance capacity in trained able bodied individuals Veneroso et al 2015 but their health status may also be affected Due to the above mentioned impairment in thermoregulatory capacity athletes with spinal cord injury or cerebral palsy may be more susceptible to hyperthermia during exercise Goosey Tolfrey et al 2008 Maltais et al 2004 Bhambhani 2002 During the Paralympic tournament these athletes of the qualified nations were and will be exposed to heat and or humid conditions The hyperthermia induced by exercise among athletes with an impairment plus the effects of heat on core temperature will make their performance in the hot and warm conditions more challenging Some studies have addressed strategies to prevent the physiologic and psychological impairments in athletic performance induced by exercise performed in the heat Goosey Tolfrey et al 2008 Other proposed that wheelchair athletes should follow recommendations advocated for able bodied individuals to

minimize their risks of heat stress during competition Bhambhani 2002 In the present issue the authors provide a descriptive approach of performance and especially the preparation of athletes with a physical impairment to optimize their exercise performance We argue that the interactions between environmental conditions and typical responses to exercise of athletes with an impairment and the equipment interactions with athlete s body should be taken into account in the preparation of Paralympic athletes in order to witness the most magnificent sporting display the Paralympic Games Finally the motto of Paralympic movement Spirit in Motion is also the philosophy of the present compendium to present new advances and research findings in the field of applied physiology and biomechanics in exercise within the context of optimize Paralympic preparation and performance of athletes presented an impairment References Perret C 2015 Elite adapted wheelchair sports performance a systematic review Disabil Rehabil 27 1 9 Paralympics History of the Movement <https://www.paralympic.org/the-ipc-history-of-the-movement> Accessed July 8 2016 Gold J R Gold M M 2011 Olympic Cities City Agendas Planning and the World s Games 1896 2016 Planning History and Environment Series 2nd edition Routledge 2011 444 pages International Paralympic Committee IPC Vision Motto Symbol https://www.paralympic.org/sites/default/files/document/120427151817794_Vision.pdf Accessed July 8 2016 Burkett B 2010 Technology in Paralympic sport performance enhancement or essential for performance Br J Sports Med 44 215 220 doi 10 1136/bjsm.2009.067249 Goosey Tolfrey V Swainson M Boyd C Atkinson G Tolfrey K 2008 The effectiveness of hand cooling at reducing exercise induced hyperthermia and improving distance race performance in wheelchair and able bodied athletes J Appl Physiol 105 37 43 doi 10 1152/jappphysiol.01084.2007 Maltais D Wilk B Unnithan V Bar Or O 2004 Responses of children with cerebral palsy to treadmill walking exercise in the heat Med Sci Sports Exerc 36 1674 1681 Bhambhani Y 2002 Physiology of wheelchair racing in athletes with spinal cord injury Sports Med 32 23 51 Average weather in September for Beijing China <https://weatherspark.com/averages/34097/9/Beijing-China> Accessed July 8 2016 Average weather in September for Rio de Janeiro Brazil <https://weatherspark.com/averages/33421/9/Rio-de-Janeiro-Brazil> Accessed July 8 2016 Average weather in September for Ota Japan <https://weatherspark.com/averages/33260/9/Ota-Tokyo-Japan> Accessed July 8 2016 Veneroso C E Ramos G P Mendes T T Silami Garcia E 2015 Physical performance and environmental conditions 2014 World Soccer Cup and 2016 Summer Olympics in Brazil Temperature Austin 2 439 440 doi 10 1080/23328940.2015.1106637 *Minerals Yearbook* ,2010

International Development and the Environment Shiro Hori,Yukari Takamura,Toshiyuki Fujita,Norichika Kanie,2019-06-27 This book analyzes the interplay between development and the environment focusing on how to forge social consensus and practices in the international community Since the Rio Earth Summit in 1992 sustainable development has increasingly attracted the attention of the international community and several international agreements have been concluded to combat issues such as climate change The Sustainable Development Goals SDGs were introduced as common objectives and the Paris Agreement was adopted as a subsequent outcome In light of today s globalized world how to best

achieve sustainable development and prioritize climate change in particular is an issue involving various perspectives on the environment and economic development in the global community The book provides students businesspeople and government officials with a concept of sustainable development that is based on using social consensus social norms and practices cooperative global actions to achieve common goals It is divided into three parts the first of which focuses on the goals and development needed to achieve sustainable development The second part explores measures to promote sustainable development while the third highlights current climate change issues and aspects related to the effective implementation of international frameworks

James Webb Space Telescope (JWST): Final Report of the Independent Comprehensive Review Panel (ICRP) , **Turpin and Tomkins' British Government and the Constitution** Alison L. Young,2021-04-01 A lot has happened to the UK Constitution in the last seven years We ve witnessed the UK s exit from the EU further devolution to Scotland and Wales a number of prominent cases by the Supreme Court two early parliamentary general elections major governmental defeats and two Prime Ministerial resignations Alison Young has built on the text of Colin Turpin and Adam Tomkins earlier edition keeping their unique historical and contextual approach whilst bringing the material up to date with more contemporary examples including references to Brexit the recent prorogation and Brexit case law and the Covid 19 pandemic The book continues to include substantial extracts from parliamentary and other political sources as well as from legislation and case law It also provides a full yet accessible account of the British constitution at the culmination of a series of dramatic events on the threshold of possible further constitutional reform

Factors Affecting Performance and Recovery in Team Sports: A Multidimensional Perspective Athos Trecroci,Damiano Formenti,Jason Moran,Dino Pedreschi,Alessio Rossi,2022-04-20 *Through Astronaut Eyes* Jennifer K. Levasseur,2020-06-15 Featuring over seventy images from the heroic age of space exploration *Through Astronaut Eyes* presents the story of how human daring along with technological ingenuity allowed people to see the Earth and stars as they never had before Photographs from the Mercury Gemini and Apollo programs tell powerful and compelling stories that continue to have cultural resonance to this day not just for what they revealed about the spaceflight experience but also as products of a larger visual rhetoric of exploration The photographs tell us as much about space and the astronauts who took them as their reception within an American culture undergoing radical change throughout the turbulent 1960s This book explores the origins and impact of astronaut still photography from 1962 to 1972 the period when human spaceflight first captured the imagination of people around the world Photographs taken during those three historic programs are much admired and reprinted but rarely seriously studied This book suggests astronaut photography is particularly relevant to American culture based on how easily the images were shared through reproduction and circulation in a very visually oriented society Space photography s impact at the crossroads of cultural studies the history of exploration and technology and public memory illuminates its continuing importance to American identity

Handbook on Railway Regulation Matthias Finger,Juan Montero,2020-09-25 Taking a

global approach this insightful Handbook brings together leading researchers to provide a comprehensive overview of the state of the art in railway regulation with a particular focus on countries that rely heavily on railways for transportation links The Handbook also considers the most pressing issues for those working in and with railway systems and outlines future trends in the development of rail globally The youth elite football players Thomas Rostgaard Andersen, Morten B. specific scenarios encompassing agility speed and many other related qualities Multidirectional speed in sport depends on a multitude of factors including perceptual cognitive abilities physical qualities and the technical ability to perform the previously mentioned actions Multidirectional Speed in Sport Research to Application reviews the science of multidirectional speed and translates this information into real world application in order to provide a resource for practitioners to develop multidirectional speed with athletes bringing together knowledge from a wealth of world leading researchers and applied practitioners in the area of speed and agility to provide a complete resource to assist practitioners in designing effective multidirectional speed development programmes This text is critical reading for undergraduate and graduate sports science students all individuals involved in training athletes e g coaches physiotherapists athletic trainers and researchers in the field of sports science and sports medicine

Photosynthesis: Structures, Mechanisms, and Applications Harvey J.M. Hou, Mohammad Mahdi Najafpour, Gary F. Moore, Suleyman I. Allakhverdiev, 2017-05-16 To address the environmental socioeconomic and geopolitical issues associated with increasing global human energy consumption technologies for utilizing renewable carbon free or carbon neutral energy sources must be identified and developed Among renewable sources solar energy is quite promising as it alone is sufficient to meet global human demands well into the foreseeable future However it is diffuse and diurnal Thus effective strategies must be developed for its capture conversion and storage In this context photosynthesis provides a paradigm for large scale deployment Photosynthesis occurs in plants algae and cyanobacteria and has evolved over 3 billion years The process of photosynthesis currently produces more than 100 billion tons of dry biomass annually which equates to a global energy storage rate of 100 TW Recently detailed structural information on the natural photosynthetic systems has been acquired at the molecular level providing a foundation for comprehensive functional studies of the photosynthetic process Likewise sophisticated spectroscopic techniques have revealed important mechanistic details Such accomplishments have made it possible for scientists and engineers to construct artificial systems for solar energy transduction that are inspired by their biological counterparts The book contains articles written by experts and world leaders in their respective fields and summarizes the exciting breakthroughs toward understanding the structures and mechanisms of the photosynthetic apparatus as well as efforts toward developing revolutionary new energy conversion technologies The topics chapters will be organized in terms of the natural sequence of events occurring in the process of photosynthesis while keeping a higher order organization of structure and mechanism as well as the notion that biology can inspire human technologies For example the topic of light harvesting will be followed by charge separation at reaction centers followed by charge stabilization followed by chemical reactions followed by protection mechanisms followed by other more specialized topics and finally ending with artificial systems and looking forward As shown in the table of contents TOC the book includes and integrates topics on the structures and mechanisms of photosynthesis and provides relevant information on applications to bioenergy and solar energy transduction

Shareholders' Claims for Reflective Loss in

International Investment Law Lukas Vanhonnaeker, 2020-07-16 In recent years investor state tribunals have often permitted shareholders claims for reflective loss despite the well established principle of no reflective loss applied consistently in domestic regimes and in other fields of international law Investment tribunals have justified their decisions by relying on definitions of investment in investment agreements that often include shares while the no reflective loss principle is generally justified on the basis of policy considerations pertaining to the preservation of the efficiency of the adjudicatory process and to the protection of other stakeholders such as creditors Although these policy considerations militating for the prohibition of shareholders claims for reflective loss also apply in investor state arbitration they are curable in that context and must be balanced with policy considerations specific to the field of international investment law that weigh in favor of such claims the protection of foreign investors in order to promote trade and investment liberalization
