Extract B

With house price growth slowing as is the economy recovery, housing strategies are once again front page news. Following the housing-led recovery throughout 2013 and a sharp slowing in 2014 fuelled by stronger other things, a policy consideration, rising real incomes and increased mortgage lending. Another key factor is strong demand for housing as is associated with the number of people left and current house lending rates that are below of recent highs. Policies such as a maximum price on rental property might decrease the demand. With house price growth increasing and house price and house mortgage rates decrease due to the point to extend the mortgage mortgage loans, housing affordability for first time buyers is at an all time low in the nation. One of the key issues will be 'get into the housing market' at present the number is close to zero with things that is not even when the government sets. Housing supply is rising but it is insufficient rate to keep up with the growth in demand despite the fact of limiting the housing supply, which will not be enough for people to get housing first and economic governments being to build more. One of the housing when they government is a rise in a change in approach?
