### **Consciousness and the Ontology of Properties**

Mihretu P. Guta, 2018-07-20 This book aims to show the centrality of a proper ontology of properties in thinking about consciousness Philosophers have long grappled with what is now known as the hard problem of consciousness i.e. how can subjective or qualitative features of our experience such as how a strawberry tastes arise from brain states More recently philosophers have incorporated what seems like promising empirical research from neuroscience and cognitive psychology in an attempt to bridge the gap between measurable mental states on the one hand and phenomenal qualities on the other In *Consciousness and the Ontology of Properties* many of the leading philosophers working on this issue as well as a few emerging scholars have written 14 new essays on this problem The essays address topics as diverse as substance dualism mental causation the metaphysics of artificial intelligence the logic of conceivability constitution extended minds the emergence of consciousness and neuroscience and the unity and neural correlates of consciousness but are nonetheless unified in a collective objective the need for a proper ontology of properties to understand the hard problem of consciousness both on non empirical and empirical grounds

**The Morality of Radical Economics** Ron P. Baiman, 2016-08-31 This book is in equal parts a treatise on morality and economics a critique of neoclassical orthodoxy a brief for replacing mainstream economics with a radical political economics and an argument for the abandonment of neoliberal capitalism in favor of democratic socialism It includes a detailed proposal for a demand and cost alternative to supply and demand analysis and an in depth technical critique of both neoclassical high theory and applied microeconomic analysis demonstrating that these are not only infeasible or immoral but have directly contributed to public policy disasters Further the book suggests that only a moral economics in the form of radical political economy can address the looming economic and environmental crises of today's world Baiman begins with an introduction to morality and ethics in both general sciences and in economics in particular He then guides readers through evidence of how neoclassical economics has not only failed to remain objective and value free but has become an ideology of apologetics protecting an immoral system In addition to breaking down real world examples to demonstrate his assertions Baiman analyzes a theoretical Utopia design exercise He concludes by arguing

that the only form of economics that supports widely shared human values such as social equity democracy and solidarity is so called radical economics and that all true economics science should be directed toward achieving more socially productive economic activity An invaluable guide to morality and economics this book will appeal to researchers and teachers looking to change the way we think about economics policy and society

Arendt Jacques Derrida Michel Foucault and others Dr Kidd explores the nature and purpose of education through a series of different lenses Details moments interactions and relationships are put under the microscope and their effects on teaching and learning examined Becoming Mobius started life as Debra Kidd s doctoral thesis and draws on her extensive classroom experience her own observations and research and a broad base of educational thought including the work of Gert Biesta Masny s Multiple Literacies and more In Becoming Mobius each chapter is presented as a plateau and maps the complexities of teaching and learning This is a journey through a landscape of education It is not a straight route It is not a cop out It is a means of living in with and through complexity and multiplicity It is an attempt to bring forward a fresh vision of education This is an honest challenging and incredibly profound book that makes you stop and think deeply about what you do why you do it and the effect it has You will never look at teaching in the same light again For anyone interested in thinking deeply about education
