**War and Family Life** Shelley MacDermid Wadsworth, David S. Riggs, 2015-12-16 This unique resource provides findings and insights regarding the multiple impacts of military duty on service members and veterans specifically from a family standpoint. Broad areas of coverage include marital and family relationships, parenting issues, family effects of war injuries and family concerns of single service members. The book's diverse contents highlight understudied populations and topics gaining wider interest while examining the immediate and long term impact of service on family functioning. In addition to raising awareness of issues, chapters point to potential solutions including science based pre and post deployment programs, more responsive training for practitioners and more focused research and policy directions. Among the topics covered: Deployment and divorce; an in depth analysis by relevant demographic and military characteristics; Military couples and posttraumatic stress; interpersonally based behaviors and cognitions as mechanisms of individual and couple distress; Warfare and parent care; armed conflict and the social logic of child and national protection; Understanding the experiences of women and LGBT veterans in Department of Veterans Affairs care; Risk and resilience factors in combat military health care providers; Tangible instrumental and emotional support among homeless veterans. War and Family Life offers up to date understanding for mental health professionals who serve military families both in the U S and abroad.

**War Over the Family** David Popenoe, 2017-09-29 One of the most surprising and controversial social debates of the past two decades has been about the meaning and importance of marriage and the family in contemporary American life. Referred to by some as a culture war over the family, the debate has pitted those concerned about the weakening of the traditional married parent nuclear family, especially in its impact on children, against those arguing that nothing has gone wrong with families that they are merely diversifying. David Popenoe has been one of the most influential figures in laying out for a wide audience the importance of family decline and what it means for our children, our society and our future.

*The War Between the State and the Family* Patricia Morgan, 2017-07-28 Patricia Morgan's core assumption is that the family is an extremely effective vehicle for raising the welfare of its members. If this is correct, it is quite possible that the state can best support the family by doing very little, by not taxing the family heavily and by minimizing the subsidization of those who choose alternatives to financially self-sustaining family life. At one level, Morgan argues, the family can be seen as a unit within which there occurs enormous transfer of economic resources between

husband and wife parents and children and on a wider scale within extended families The family is the most important vehicle of welfare and the welfare vehicle of first resort Within the family many services are provided by family members to each other rarely for direct personal benefit Basic economic analysis Morgan asserts suggests that the family could be seriously undermined if the state provided significant support for dependents who are not brought up within self sustaining family units and if it also provided services such as childcare that are generally provided within families This work shows that this is precisely what has happened in the last twenty five years The driving force of significantly reduced family formation is not economic but social Perhaps social changes have led to a desire by individuals to bring up children in family circumstances different from those of a generation or two ago but evidence does not support this hypothesis Rather tax and benefit systems seem to be important determinants of family structure worldwide Patricia Morgan does not simply analyze the problem she also suggests policy solutions The author argues that divorce laws should be reformed to ensure that those who make commitments are held financially responsible The author s argument is compelling because it is backed up with strong evidence and is argued from an unemotional economic perspective individuals within families are rational agents who respond to incentives

Steinmetz, Marvin B. Sussman, 2013-11-11 The lucid straightforward Preface of this Handbook by the two editors and the comprehensive perspectives offered in the Introduction by one of them leave little for a Foreword to add It is therefore limited to two relevant but not intrinsically related points vis a vis research on marriage and the family in the interval since the first Handbook Christensen 1964 appeared namely the impact on this research of the politicization of the New Right and of the Feminist Enlightenment beginning in the mid sixties about the time of the first Handbook In the late 1930s Willard Waller noted Fifty years or more ago about 1890 most people had the greatest respect for the institution called the family and wished to learn nothing whatever about it Everything that concerned the life of men and women and their children was shrouded from the light Today much of that has been changed Gone is the concealment of the way in which life begins gone the irrational sanctity of the home The aura of sentiment which once protected the family from discussion clings to it no more We want to learn as much about it as we can and to understand it as thoroughly as possible for there is a rising recognition in America that vast numbers of its families are sick from internal frustrations and from external buffeting We are engaged in the process of reconstructing our family institutions through criticism and discussion 1938 pp 3 4      Military Medicine Armed Forces Medical Library (U.S.), 1955      **More Perfect Unions** Rebecca L. Davis, 2010-03-31 The American fixation with marriage so prevalent in today s debates over marriage for same sex couples owes much of its intensity to a small group of reformers who introduced Americans to marriage counseling in the 1930s Today millions of couples seek help to save their marriages each year Over the intervening decades marriage counseling has powerfully promoted the idea that successful marriages are essential to both individuals and the nation s well being Rebecca Davis reveals how couples and counselors transformed the ideal of the perfect marriage as they debated sexuality childcare mobility wage earning and autonomy exposing both the fissures and aspirations of American society From the economic dislocations of the Great Depression to more recent debates over government funded Healthy Marriage programs counselors have responded to the shifting needs and goals of American couples Tensions among personal fulfillment career aims

religious identity and socioeconomic status have coursed through the history of marriage and explain why the stakes in the institution are so fraught for the couples involved and for the communities to which they belong Americans care deeply about marriages their own and other people s because they have made enormous investments of time money and emotion to improve their own relationships and because they believe that their personal decisions about whom to marry or whether to divorce extend far beyond themselves This intriguing book tells the uniquely American story of a culture gripped with the hope that with enough effort and the right guidance more perfect marital unions are within our reach      **Readjustment**
