

2018 PANTHER, SABER & JAGUAR BOW WARRANTY

Congratulations on purchasing your new takedown bow. The bow is covered by a one-year warranty against any product failure due to defects in material or workmanship to the original owner. The terms of this warranty are not transferable under any circumstances. **The original owner must complete and submit the online bow registration form on the company's website (martinarchery.com/warranty) within 30 days of purchase, to be covered by this warranty.**

The warranty does not cover strings or damage caused by abuse, misuse or alterations to the bow's design. If Martin Archery in its sole discretion concludes the damage was caused by dry-firing, the bow will not be covered under this warranty. Any accessories which came with the bow are excluded from this warranty.

To make a warranty claim, you can either contact the dealer where you purchased the bow or Martin's Customer Service Group at (509) 529-3554. Prior to returning the bow to Martin for warranty service, the bow owner must secure a Return Merchandise Authorization (RMA) from Martin's Customer Service Group. The bow owner is responsible for the shipping costs to Martin's facility. If Martin's Technical Service Group deems that the bow is covered under this warranty, Martin will perform the required repairs and will be responsible for the return shipping costs. If Martin's Technical Service Group deems that the bow is not covered under this warranty, the bow owner will be responsible for shipping costs associated with the bow's return.

If your bow cannot be repaired, Martin reserves the right to replace your bow with a newer model of current market value. If replacement parts are unavailable, Martin has the sole discretion to substitute any parts required to make the repairs.

MARTIN TAKE-DOWN MANUAL

This package includes everything needed to properly setup your new Take-Down bow.

Parts List: (2) Limb Bolts, (2) Aluminum Limb Bolt Seats, (2) Composite Limb Bolt Washers, (1) Flipper Arrow Rest, (1) Bow String, (1) Bow Stringer. Does not include shock tube. **Saber Elite also includes:** (2) Limb cup adapter. **Panther also includes:** (2) Ribs Caps

TAKE-DOWN LIMB INSTALLATION

Your Take-Down model is designed to be shot with the limbs mounted securely against the riser. Do not over tighten your limb bolts. A snug fit is all that is required. Over tightening can cause limb damage. The draw weight is not adjustable on Take-Down model recurve bows.

The Martin Jaguar Elite and the Saber Elite Take-Down bow models will also accept LP Ribs.

- Stringing Instructions -

Slide the bottom limb of your bow all the way to the bottom of the leather pouch, all the way into the stringer loop.

Place the upper bow limb between the two strings and the rubber side of the leather strap. Position the stringer between the handle rear and the bowstring section to the bowstring on position of the stringer cup on the top limb tip.

The larger loop goes on the top limb and the short loop should stay on the bottom limb.

Stand on the bowstringer in the center with both feet. Pull the handle rear upward with one hand and with the other hand slide the stringer up the limb and into the groove.

Slowly release the upward pressure on the bow while making sure the bowstring stays in the string notch.

BRACE HEIGHT (FISHMELE)

The brace height of your bow is measured from the pivot point, or most forward point of the grip, to the bowstring. The recommended brace height for the Jaguar Elite is 6 1/4" - 7 1/2". For the Saber Elite the recommended brace height is 6 1/4" - 7 1/4". The Panther has a recommended brace height of 6 1/4" - 7 1/4". A higher brace height helps reduce bow vibration, noise, and will also minimize the effects of shooting errors. A lower brace height provides increased arrow velocity. Increased noise and poor arrow flight can be the result of a lower brace height that is too low. Twisting your bowstring will reduce its length and increase your brace height. Unraveling your bowstring or installing a longer bowstring will decrease your brace height. *Please consult your bowstringer or stringer before any stringer may assist.* Experiment to find the brace height measurement that allows your bow to perform at its best with your style of shooting.

LIMB STRAIGHTENING (BUMPING)

Should a limb become twisted, it will remain twisted until you straighten or "bump" it back to the straight position. "Bumping" involves the placement of one hand near the twisted section of the limb and the other hand on the rear section. A twisted limb can be straightened in this manner by applying pressure in the opposite direction of the twist. You should unstring your bow before straightening a twisted limb. Neglecting a twisted limb will only allow the twist to become more serious. A brief inspection of each limb should be made each time you string your bow.

STRING LENGTH

Your bow's AMO (Archery Manufacturer and Merchant's Organization) length is marked on its lower limb. To achieve the correct brace height, you will need to use a bowstring of the same AMO length. *Example: An ARD 62" bow requires an ARD 62" string.* The actual length of your bowstring will be 2" shorter than its marked AMO length.

CARE AND SAFETY

- You should unstring your bow when it is not being used.
