Infocracy Byung-Chul Han, 2022-07-19 The tsunami of information unleashed by digitization is threatening to overwhelm us drowning us in a sea of frenzied communication and disrupting many spheres of social life including politics Election campaigns are now being waged as information wars with bots and troll armies and democracy is degenerating into infocracy In this new book Byung Chul Han argues that infocracy is the new form of rule characteristic of contemporary information capitalism Whereas the disciplinary regime of industrial capitalism worked with compulsion and repression this new information regime exploits freedom instead of repressing it Surveillance and punishment give way to motivation and optimization we imagine that we are free but in reality our entire lives are recorded so that our behaviour might be psychopolitically controlled Under the neoliberal information regime mechanisms of power function not because people are aware of the fact of constant surveillance but because they perceive themselves to be free This trenchant critique of politics in the information age will be of great interest to students and scholars in the humanities and social sciences and to anyone concerned about the fate of politics in our time **Beyond the Meme** Alan C. Love, William Wimsatt, 2019-09-03

Interdisciplinary perspectives on cultural evolution that reject meme theory in favor of a complex understanding of dynamic change over time How do cultures change In recent decades the concept of the meme posited as a basic unit of culture analogous to the gene has been central to debates about cultural transformation Despite the appeal of meme theory its simplification of complex interactions and other inadequacies as an explanatory framework raise more questions about cultural evolution than it answers In *Beyond the Meme* William C Wimsatt and Alan C Love assemble interdisciplinary perspectives on cultural evolution providing a nuanced understanding of it as a process in which dynamic structures interact on different scales of size and time By focusing on the full range of evolutionary processes across distinct contexts from rice farming to scientific reasoning this volume demonstrates how a thick understanding of change in culture emerges from multiple disciplinary vantage points each of which is required to understand cultural evolution in all its complexity The editors provide an extensive introductory essay to contextualize the volume and Wimsatt contributes a separate chapter that systematically organizes the conceptual geography of cultural processes and phenomena Any adequate account of the transmission elaboration and evolution of culture must this volume argues recognize the central roles that cognitive and social development play in cultural change and the complex interplay of technological organizational and institutional structures needed to enable and coordinate these processes Contributors Marshall Abrams U of Alabama at Birmingham Claes Andersson Chalmers U of Technology Mark A Bedau Reed College James A Evans U of Chicago Jacob G Foster U of California Los Angeles Michel Janssen U of Minnesota Sabina Leonelli U of Exeter Massimo Maiocchi U of Chicago Joseph D Martin U of Cambridge Salikoko S Mufwene U of Chicago Nancy J Nersessian Georgia Institute of Technology and Harvard U Paul E Smaldino U of California Merced Anton Törnberg U of Gothenburg Petter Törnberg U of Amsterdam Gilbert B Tostevin

Schlaile, 2020-12-21 This book explores the question of whether and how meme theory or memetics can be fruitfully utilized in evolutionary economics and proposes an approach known as economemetics which is a combination of meme theory and complexity theory that has the potential to combat the fragmentation of evolutionary economics while re connecting the field with cultural evolutionary theory By studying the

intersection of cultural and economic evolution complexity economics computational economics and network science the authors establish a connection between memetics and evolutionary economics at different levels of investigation The book first demonstrates how a memetic approach to economic evolution can help to reveal links and build bridges between different but complementary concepts in evolutionary economics Secondly it shows how organizational memetics can help to capture the complexity of organizational culture using meme mapping Thirdly it presents an agent based simulation model of knowledge diffusion and assimilation in innovation networks from a memetic perspective The authors then use agent based modeling and social network analysis to evaluate the diffusion pattern of the Ice Bucket Challenge as an example of a viral meme Lastly the book discusses the central issues of agency creativity and normativity in the context of economemetics and suggests promising avenues for further research

Gulliver in the Land of Giants Anna Grzeskowiak-Krwawicz, 2016-04-22 J zef Boruwlaski was the most famous dwarf of the Enlightenment age Polish born he travelled extensively throughout Europe appearing and performing at royal courts and salons before settling in Durham in his later life until his death at the age of 97 He was described in Diderot's Encyclop die and the press of his day both on the continent and in the UK sustained an interest in him and kept tabs on his life and experiences His memoirs published in a bilingual French and English version in 1788 show him to have been an intelligent and sharp observer of the world he inhabited The life story of this miniature gentleman is not only highly interesting in its own right but also offers a new perspective on the culture of the Enlightenment Through a meticulous survey of source materials in Poland France and the United Kingdom the author has managed to unearth and reconstruct many heretofore unknown details about Boruwlaski's life and adventures about his travels first on the continent and then in the United Kingdom It is not typical biography but rather an attempt at identifying certain social roles that were imposed upon Boruwlaski a plaything of the salons a source of entertainment for the masses an adventurer against his own wishes At the same time his story is that of a man who spent his whole life trying to escape from such roles imposed upon him Boruwlaski's memoirs are included in full containing many of the letters he sent to his wife with critical annotation The author also investigates for the first time the sizeable differences between the many different versions of the memoirs published during his own lifetime This monograph offers not only an opportunity to rediscover the fascinating life story of an intriguing man but also gives a unique point of view on Europe's uppermost elite in the Enlightenment age as people who remained deeply fascinated with deformities and oddities despite their own self professed refined tastes

The Nuclear Deception Servando Gonzalez, 2002. The event known as the Cuban missile crisis, the greatest of all Cold War crises, is a milestone in the history of the Cold War. According to the author, the main questions of the situation have eluded satisfactory answers because analysts have neglected the true Cuban role in the event, particularly the Russo-Cuban relations prior to the crisis.

The Proustian Fabric Christie McDonald, 2016-05. The association of ideas became the foundation of Freudian psychoanalysis, informed the nascent semiology of Saussure, and characterized the literary works of Sterne, Joyce, Woolf, and especially Marcel Proust. The author of *Remembrance of Things Past* acutely aware of how philosophical, historical, and narrative writing intersected, gave years of thinking and planning to his multivolume masterpiece. Its shape was protean. Each successive volume reconfigured the previous ones, and in 1987 Proust readers welcomed the publication of several new editions among them the *Bibliothèque de la Pléiade* which presented as many pages of variants as of text. The *Proustian Fabric* engages the complex layers of association to be found in Proust's work. According to Christie McDonald, *Remembrance of Things Past* straddles the dominant thinking patterns of two centuries: the nineteenth in which the association of fragmentary thought was to be subsumed into the notion of a totality, and the twentieth in which the notion of associative thinking was to move toward an infinite process of referral and interpretation. Imbued with McDonald's discerning knowledge of Proust's intellectual and historical milieu, his compendious writing, and his critics, *The Proustian Fabric* is one of the first books to take into account the rich variations of the new editions and to reexamine certain suppositions about Proust's methods as well as his concern with philosophy, literature, art, and politics.
