**British Agricultural Policy, 1912-36** Andrew Fenton Cooper, 1989 Parliamentary Papers Great Britain. Parliament. House of Commons, 1847 A Cold War In The Soviet Bloc Sheldon Anderson, 2018-02-23 In A Cold War in the Soviet Bloc Sheldon Anderson uses recently declassified documents from Polish and East German communist party and foreign ministry archives to examine the interplay of national interests with the exigencies of communist party relations within the Soviet bloc during the Cold War Anderson explores how Polish East German relations were strained over the permanence of the Oder Neisse border the correct road to socialism German repatriation from Poland and trade policy he provides an inside account of the heated debates that seriously divided the Polish and East German communists Anderson delves into how and why the rift culminated in the return of the anti Stalinist Wladyslaw Gomulka in October 1956 and he delineates how the Polish East German conflict undermined the unity of the Soviet bloc on its most strategic flank In doing so he reveals the persistence of nationalism and ethnic prejudice in the former communist countries In this timely text Anderson pinpoints how nationalism has reemerged as a powerful political force following the end of the Cold War With A Cold War in the Soviet Bloc Anderson markedly fills the gap in the existing scholarship on postwar relations between the countries of East Europe Special Report, 1987 *Public Papers of the Presidents of the United States, Jimmy Carter, 1979, Book 2: June 23 to December 31, 1979*, **Hearings** United States. Congress. House. Committee on the Judiciary, 1951 **For the Good of the Farmer** Fred Whitford, 2013 The key role that farming plays in the economy of Indiana today owes much to the work of John Harrison Skinner 1874 1942 Skinner was a pioneering educator and administrator who transformed the study of agriculture at Purdue University during the first decades of the twentieth century From humble origins occupying one building and 150 acres at the start of his career the agriculture program grew to spread over ten buildings and 1 000 acres by the end of his tenure as its first dean A focused single minded man Skinner understood from his own background as a grain and stock farmer that growers could no longer rely on traditional methods in adapting to a rapidly changing technological and economic environment in which tractors were replacing horses and new crops such as alfalfa and soy were transforming the arable landscape Farmers needed education and only by hiring the best and brightest faculty could Purdue give them the competitive edge that they needed While he excelled as a manager and advocate for Indiana agriculture Skinner never lost touch with his own farming roots taking especial interest in animal husbandry During the course of his career as dean 1907 1939 the number of livestock on Purdue farms increased fourfold and Skinner showed his knowledge of breeding by winning many times at the International Livestock Exposition Today the scale of Purdue s College of Agriculture has increased to offer almost fifty programs to hundreds of students from all over the globe However at its base the agricultural program in place today remains largely as John Harrison Skinner built it responsive to Indiana but with its focus always on scientific innovation in the larger world Mink Claims United States. Great Britain. Board of Education,1909 **Science for the Nation** P. Morris,2016-01-05 An engaging study of a great national institution Essays explore the changing roles of museums and the perceived public role of a museum of science and technology Illuminates the ways in which we think about the collecting and display of objects and the often difficult relations between the state business and industry and museum funding **Agrarian Crossings** Tore C. Olsson,2020-11-03 In the 1930s and 1940s rural reformers in the United States and Mexico waged unprecedented campaigns to remake their countrysides in the name of agrarian justice and agricultural productivity Agrarian Crossings tells the story of how these campaigns were conducted in dialogue with one another as reformers in each nation came to exchange models plans and strategies with their equivalents across the border Dismantling the artificial boundaries that can divide American and Latin American history Tore Olsson shows how the agrarian histories of both regions share far more than we realize He traces the connections between the US South and the plantation zones of Mexico places that suffered parallel problems of environmental decline rural poverty and gross inequities in land tenure Bringing this tumultuous era vividly to life he describes how Roosevelt s New Deal drew on Mexican revolutionary agrarianism to shape its program for the rural South Olsson also looks at how the US South served as the domestic laboratory for the Rockefeller Foundation s green revolution in Mexico which would become the most important Third World development campaign of the twentieth century and how the Mexican government attempted to replicate the hydraulic development of the Tennessee Valley Authority after World War II Rather than a comparative history Agrarian Crossings is an innovative history of comparisons and the ways they affected policy moved people and reshaped the landscape The Developing West Lewis Herbert Thomas,1983 No description

**Pakistan Affairs** ,1984 *Poison Powder* Gregory S. Wilson,2023-04-01 In 1975 workers at Life Science Products a small makeshift pesticide factory in Hopewell Virginia became ill after exposure to Kepone the brand name for the pesticide chlordecone They made the poison under contract for a much larger Hopewell company Allied Chemical Life Science workers had been breathing in the dust for more than a year Ingestion of the chemical made their bodies seize and shake News of ill workers eventually led to the discovery of widespread environmental contamination of the nearby James River and the landscape of the small working class city Not only had Life Science dumped the chemical but so had Allied when the company manufactured it in the 1960s and early 1970s The resulting toxic impact was not only on the city of Hopewell but also on the faraway fields where Kepone was used as an insecticide Aspects of this environmental tragedy are all too common corporate avarice ignorance and regulatory failure combined with race and geography to determine toxicity and shape the response But the Kepone story also contains some surprising medical legal and political moments amid the disaster With *Poison Powder* Gregory S Wilson explores the conditions that put the Kepone factory and the workers there in the first place and the effects of the poison on the people and natural world long after 1975 Although the manufacture and use of Kepone is

now banned by the Environmental Protection Agency organochlorines have long half lives and these toxic compounds and their residues still remain in the environment      Climatography of the United States, Climates of the States United States.
