The Gateway to the Pacific Meredith Oda, 2019-01-03 In the decades following World War II municipal leaders and ordinary citizens embraced San Francisco s identity as the Gateway to the Pacific using it to reimagine and rebuild the city The city became a cosmopolitan center on account of its newfound celebration of its Japanese and other Asian American residents its economy linked with Asia and its favorable location for transpacific partnerships The most conspicuous testament to San Francisco s postwar transpacific connections is the Japanese Cultural and Trade Center in the city s redeveloped Japanese American enclave Focusing on the development of the Center Meredith Oda shows how this multilayered story was embedded within a larger story of the changing institutions and ideas that were

shaping the city During these formative decades Oda argues San Francisco's relations with and ideas about Japan were being forged within the intimate local sites of civic and community life This shift took many forms including changes in city leadership new municipal institutions and especially transformations in the built environment Newly friendly relations between Japan and the United States also meant that Japanese Americans found fresh if highly constrained job and community prospects just as the city's African Americans struggled against rising barriers San Francisco's story is an inherently local one but it also a broader story of a city collectively if not cooperatively reimagining its place in a global economy

Whale-watching James Higham, Lars Bejder, Rob Williams, 2014-03-27 Within little more than a generation whale watching has been subject to global industrial development. It has been portrayed by destinations and business operators and advocated by environmental groups as a sustainable activity and an alternative to whaling. However, in recent years the sustainability of these activities has increasingly been questioned as research shows that repeated disturbance by boat traffic can severely disrupt critical behaviours of cetaceans in the wild. Bringing together contributions by international experts, this volume addresses complex issues associated with commercial whale watching, sustainable development and conservation of the global marine environment. It highlights widely expressed concerns for the failure of policy planning and management and pinpoints both long standing and emerging barriers to sustainable practice. Featuring numerous case studies, the book provides critical insights into the diverse socio-cultural, political, economic and ecological contexts of this global industry, highlighting the challenges and opportunities that arise along the pathways to sustainability.

Renewing Cities Ross J. Gittell, 2014-07-14 The cities of Lowell and New Bedford in Massachusetts, Jamestown in New York and McKeesport in Pennsylvania have all undergone years of adversity and decline, their economic bases having been badly damaged by structural changes in the national economy, particularly in the manufacturing sector. In situations like these, can local development efforts make a difference? Ross Gittell answers in the affirmative. This interdisciplinary work focuses on comparative case studies of the four cities. The book reveals how public-private and community-based local economic development initiatives affect local economic performance: what works and what does not work. City leaders and institutions can help reorganize and reshuffle local resources with results that include increased investment, greater effort by local individuals and institutions, more cooperation among different development interests and improvement in city economic positioning relative to the regional economy and local development cycles. Gittell emphasizes the possibility of shifting from a zero-sum game, attracting jobs from elsewhere, toward the goal of converting underutilized local resources to higher value uses through alternative forms of economic and political organization. Franco Sells Spain to America N. Rosendorf, 2014-02-18 A groundbreaking study of the Franco regime's utilization of Hollywood film production in Spain, American tourism and sophisticated public relations programs, including the most popular national pavilion at the 1964-65 New York World's Fair, in a determined effort to remake the Spanish dictatorship's post-World War II reputation in the US.

The Irish Asia Strategy and Its China Relations Hong Fan, Jörn-Carsten Gottwald, 2014-05-07 Asian studies as basically all efforts to engage in inter-culturally is caught in

producing and reproducing prejudices on the one hand and denying differences and specificities on the other. In particular in academic studies and teaching the challenge is to overcome this apparent dichotomy and the task is to establish understanding without prejudice of what Asia really was and is. The extensive range of topics and views in this volume challenge a mode of globalisation that simply overthrows national traditions by a Darwinian kind of rule of the survival of the strongest: the fittest will actually be the one who is well capable to manage difference by understanding them in a historical context and acknowledge them as part of something new that is emerging in front of our eyes. This book will stimulate further research and debate within and without the boundaries of Asian Studies.
