Memo Of Geography 2015 June:

The Drone Memos Jameel Jaffer, 2010-01-12 A trenchant summation and analysis of the legal rationales behind the US drone policy of targeted killing of suspected terrorists including US citizens Publishers Weekly starred review In the long response to 9 11 the US government initiated a deeply controversial policy of targeted killing the extrajudicial execution of suspected terrorists and militants typically via drones A remarkable effort was made to legitimize this practice one that most human rights experts agree is illegal and that the United States has historically condemned In The Drone Memos civil rights lawyer Jameel Jaffer presents and assesses the legal memos and policy documents that enabled the Obama administration to put this program into action In a lucid and provocative introduction Jaffer who led the ACLU legal team that secured the release of many of the documents evaluates the drone memos in light of domestic and international law He connects the documents legal abstractions to the real world violence they allow and makes the case that we are trading core principles of democracy and human rights for the illusion of security A careful study of a secretive counterterrorism infrastructure capable of sustaining endless orderless war this book is profoundly necessary Katrina vanden Heuvel editor and publisher of The Nation

Charting a Course: Strategic Choices for a New Administration Richard D. Hooker (Jr.), 2016 Excerpt from Charting a Course Strategic Choices for a New Administration The new administration takes office in a time of great complexity Our new President faces a national security environment shaped by strong currents globalization the proliferation of new poor and weak states as well as nonstate actors an enduring landscape of violent extremist organizations slow economic growth the rise of China and a revanchist Russia a collapsing Middle East and a domestic politics wracked by division and mistrust While in absolute terms the Nation and the world are safer than in the last century today the United States finds itself almost on a permanent war footing engaged in military operations around the world No formal document describes a grand strategy for the United States and indeed many academics deny that one exists Yet a close look at our history as a world power suggests that core interests and how we secure them have remained generally consistent over time If grand strategy rises above particular strategies intended to secure particular objectives many decades of focusing on nuclear deterrence power projection alliances and partnerships and military and economic strength probably constitute the underpinnings of a coherent grand strategy How we employ and leverage these instruments of national power to protect defend and advance the national interest is after all the essence of grand strategy In a dangerous world these pillars have provided a strong foundation for national security If our domestic politics can achieve consensus on future threats and solutions America is well positioned to lead and prosper in a world that will remain both dangerous and uncertain R D Hooker Jr Director Institute for National Strategic Studies National Defense University Washington D C Related items Policy Analysis in National Security Affairs New Methods for a New Era can be found here <https://bookstore.gpo.gov/products/sku/008-020-01561-0> Operationalizing Counter Threat Finance Strategies can be found here <https://bookstore.gpo.gov/products/sku/008-000-01131-1>

The Coming of Neo-Feudalism Joel Kotkin,2020-05-12 Following a remarkable epoch of greater dispersion of wealth and opportunity we are inexorably returning towards a more feudal era marked by greater concentration of wealth and property reduced upward mobility demographic stagnation and increased dogmatism If the last seventy years saw a massive expansion of the middle class not only in America but in much of the developed world today that class is declining and a new more hierarchical society is emerging The new class structure resembles that of Medieval times At the apex of the new order are two classes a reborn clerical elite the clerisy which dominates the upper part of the professional ranks universities media and culture and a new aristocracy led by tech oligarchs with unprecedented wealth and growing control of information These two classes correspond to the old French First and Second Estates Below these two classes lies what was once called the Third Estate This includes the yeomanry which is made up largely of small businesspeople minor property owners skilled workers and private sector oriented professionals Ascendant for much of modern history this class is in decline while those below them the new Serfs grow in numbers a vast expanding property less population The trends are mounting but we can still reverse them if people understand what is actually occurring and have the capability to oppose them

The Texas Landscape Project David A. Todd,Jonathan Ogren,2016-06-14 The Texas Landscape Project explores conservation and ecology in Texas

by presenting a highly visual and deeply researched view of the widespread changes that have affected the state as its population and economy have boomed and as Texans have worked ever harder to safeguard its bountiful but limited natural resources. Covering the entire state from Pineywoods bottomlands and Panhandle playas to Hill Country springs and Big Bend canyons, the project examines a host of familiar and not so familiar environmental issues. A companion volume to The Texas Legacy Project, this book tracks specific environmental changes that have occurred in Texas using more than 300 color maps expertly crafted by cartographer Jonathan Ogren and over 100 photographs that coalesce to fashion a broad portrait of the modern Texas landscape. The rich data compiled by author David Todd are presented in clearly written yet marvelously detailed text that gives historical context and contemporary statistics for environmental trends connected to the land, water, air, energy, and built world of the second largest and second most populated state in the nation. An engaging read for any environmentalist or conscientious citizen, The Texas Landscape Project provides a true sense of the grand scope of the Lone Star State and the high stakes of protecting it. Alessandro Moretti, 2023-02-10

This book presents an ethnographic study of contemporary ticket touts in the UK. Despite the recent interest in the topic of black market ticket sales, media coverage and parliamentary interventions over the last ten years have revealed a widespread lack of knowledge with regard to the phenomenon of touting and the players engaging in the practice. *The Rise and Rise of Illegal Ticket Touting* sheds light on the world of touting and delivers an authentic picture of the individuals involved, of their methods, values, and motivations for performing ticket touting as an organised entrepreneurial deviant activity. The touts' varied methods of buying and selling tickets, the hierarchical structures and strict ethos of their criminal organisations, and their specific *modi operandi* for evading detection and arrest, both on the streets and online, are focal points of the study. Of equal importance are the touts' attitudes, perceptions, and adaptations to, or outright dismissal of, society's legal and moral frameworks. This book illuminates why historic and renewed attempts to challenge ticket touting have been unsuccessful, focusing on inadequate legislation, a lack of enforcement, and the widespread corruption and exploitable loopholes that exist within the official primary ticket market. An accessible and compelling read, *The Rise and Rise of Illegal Ticket Touting* will appeal to students and scholars of criminology, sociology, social policy, policing, and all those with an interest in live music and sport, and the hidden practices that lurk beneath the surface. *Drawing Futures*. Bob Sheil, Frédéric Migayrou, Luke Pearson, Laura Allen, 2016-11-11

Drawing Futures brings together international designers and artists for speculations in contemporary drawing for art and architecture. Despite numerous developments in technological manufacture and computational design that provide new grounds for designers, the act of drawing still plays a central role as a vehicle for speculation. There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world. In reflection of a society now underpinned by computational networks and

interfaces allowing hitherto unprecedented views of the world the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation Drawing Futures will present a compendium of projects writings and interviews that critically reassess the act of drawing and where its future may lie Drawing Futures focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments The book coincides with an international conference of the same name taking place at The Bartlett School of Architecture UCL in November 2016 Bringing together practitioners from many creative fields the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas

Peer-to-peer Accommodation and Community Resilience Anna Farmaki,Dimitri Ioannides,Stella Kladou,2022-03-16 The growth of peer to peer P2P accommodation has been remarkable However the rapid expansion of the phenomenon has yielded several concerns over its potentially negative economic social and environmental impacts These impacts are highlighted in policy agendas as an emerging problem encountered by many local communities in destinations experiencing a boom in P2P accommodation Specifically concerns have been raised over the impact of the growth of P2P accommodation on local housing markets residents well being and the environment as a result of the touristification of residential areas In fact many observers accuse P2P accommodation of fuelling the overtourism problem that several destinations face This edited book addresses the need to examine the P2P accommodation phenomenon from a community resilience lens In particular through a collection of chapters presenting a range of empirical and conceptual perspectives from urban and rural communities the book considers the implications of P2P accommodation growth on the resilience of local communities and the sustainable development of places

Who Needs Gay Bars? Greggor Mattson,2023-05-30 Gay bars have been closing by the hundreds The story goes that increasing mainstream acceptance of LGBTQ people plus dating apps like Grindr and Tinder have rendered these spaces obsolete Beyond that rampant gentrification in big cities has pushed gay bars out of the neighborhoods they helped make hip Who Needs Gay Bars considers these narratives accepting that the answer for some might be maybe nobody And yet Jarred by the closing of his favorite local watering hole in Cleveland Ohio Greggor Mattson embarks on a journey across the country to paint a much more complex picture of the cultural significance of these spaces inside big four gay cities but also beyond them No longer the only places for their patrons to socialize openly Mattson finds in them instead a continuously evolving symbol a physical place for feeling and challenging the beating pulse of sexual progress From the historical archives of Seattle s Garden of Allah to the outpost bars in Texas Missouri or Florida that serve as community hubs for queer youth these are places of celebration where the next drag superstar from Alaska or Oklahoma may

be discovered They are also fraught grounds for confronting the racial and gender politics within and without the LGBTQ community The question that frames this story is not asking whether these spaces are needed but for whom earnestly exploring the diversity of folks and purposes they serve today Loosely informed by the Damron Guide the so called Green Book of gay travel Mattson logged 10 000 miles on the road to all corners of the United States His destinations are sometimes thriving sometimes struggling but all offering intimate views of the wide range of gay experience in America POC white trans cis past present and future

The Food Fighters Alexander Justice Moore, 2024-06-19 Robert Egger did not want to start a charity or even volunteer at one But after his wife dragged him out one night to serve meals on the streets of Washington DC Egger realized that most of what society called charity did more to reward the people giving their time and money than it did to liberate those on the receiving end He set aside his career running nightclubs and vowed to come up with something better Egger named his gritty front line nonprofit DC Central Kitchen Today it is one of America's most beloved and respected solutions to hunger and poverty From its improbable beginnings 35 years ago the organization has redefined the issues of food waste unemployment mass incarceration school nutrition and chronic disease through award winning programs and a gutsy risk taking mindset that allowed it to hurdle one obstacle after another Written by an organizational insider this expanded second edition of *The Food Fighters* shows how DC Central Kitchen's path breaking approach to combating the root causes of hunger is more relevant today than ever before Packed with practical perspectives from award winning nonprofit professionals inspiring first hand accounts from survivors of homelessness and incarceration and the exclusive insights of high profile partners like Jos Andr's Spike Mendelsohn Craig Newmark and Michael R Klein *The Food Fighters* equips readers to take on hunger in their own communities while challenging traditional notions of what it means to do good

Israeli Settlements Martin Blecher, 2018-10-15 Most research and analyses of Israel's settlement enterprise has focused on the usage of particular paragraphs in the Geneva Convention For over 50 years Israel has refuted the usage of the Geneva Convention with regards to its settlements Doing so the more relevant question arises on what laws governance and regulations is of importance in understanding Israelis behavior If one accepts the premise that Israel is occupying some areas and as an occupying force is forbidden to change laws from previous sovereign it becomes relevant as to what the laws are and how are they being followed The aim with this book is to go deeper to understand the rationale behind Israeli land policies This book is not necessarily a full rejection of the arguments that have been advocated by different scholars that seek to brand Israel's settlement enterprise as illegal nor is it to be understood as a full acceptance of those arguments at hand Rather I want this book to show nuances in an infective question The idea is to give the reader an insight into the arguments made by Israel and its judiciary which has not been properly addressed nor researched about through earlier scholars By including stories about personalities such as Rabbi Menachem Froman Shabtay Bendet this book aims to fulfill its purpose of not politicizing the Israeli settlement enterprise through one particular understanding
