Sunstein, 2019-09-24 Why policies should be based on careful consideration of their costs and benefits rather than on intuition popular opinion interest groups and anecdotes Opinions on government policies vary widely Some people feel passionately about the child obesity epidemic and support government regulation of sugary drinks Others argue that people should be able to eat and drink whatever they like Some people are alarmed about climate change and favor aggressive government intervention Others don t feel the need for any sort of climate regulation In The Cost Benefit Revolution Cass Sunstein argues our major disagreements really involve facts not values It follows that government policy should not be based on public opinion intuitions or pressure from interest groups but on numbers meaning careful consideration of costs and benefits Will a policy save one life or one thousand lives Will it impose costs on consumers and if so will the costs be high or negligible Will it hurt workers and small businesses and if so precisely how much As the Obama administration s regulatory czar Sunstein knows his subject in both theory and practice Drawing on behavioral economics and his well known emphasis on nudging he celebrates the cost benefit revolution in policy making tracing its defining moments in the Reagan Clinton and Obama administrations and pondering its uncertain future in the Trump administration He acknowledges that public officials often lack information about costs and benefits and outlines state of the art techniques for acquiring that information Policies should make people s lives better Quantitative cost benefit analysis Sunstein argues is the best available method for making this happen even if in the future new measures of human well being also explored in this book may be better still Oswaal CTET (Central Teachers Eligibility Test) Paper-II | Classes 6 - 8 | 15 Year's Solved Papers | Social Science and Studies | Yearwise | 2013 - 2024 | For 2024 Exam Oswaal Editorial Board, 2024-02-03 Oswaal CTET Central Teachers Eligibility Test Paper II Classes 6 8 15 Year s Solved Papers Social Science and Studies Yearwise 2013 2024 For

focusses on the triangle model that Alex H Johnstone developed in the early 1980s Originally conceived in the context of making chemistry more accessible to a wider range of learners the model has been applied in almost every area of education in chemistry at all stages of learning In looking at why chemistry is difficult there are two central questions Firstly does the problem relate to the nature of chemistry and secondly does it relate to the way humans gain understanding Both were found to be important and the answers to the two question were found to be connected The triangle model arose from sustained research into human learning The central finding from research is the critical role of working memory and the model rationalises so much evidence from chemistry education research as well as the repeated experiences of teachers of chemistry at all levels In order to understand chemistry it is essential to develop sound mental models of molecular reality It generates major implications for the way a chemistry curriculum should be constructed and the processes of teaching and learning in chemistry when the goal is focussed on understanding the key ideas Some of these implications are developed and pointers offered to more successful ways forward The power of the Johnstone Triangle lies in the way it offers clear directions for all involved in chemistry education It is hoped that this book will prove helpful to all involved in sharing the exciting story of the way humans have come to understand the molecular world one of the great examples of great human endeavour

Balkan Fighters in the Syrian War Tanja Dramac Jiries, 2021-09-15 This book analyses the process of the recruitment of foreign fighters from the Western Balkans specifically Bosnia and Herzegovina and Kosovo to Syria and Iraq from 2012 to 2015 Utilizing in depth semi structured interviews with foreign fighters and their families as well as a number of relevant stakeholders it answers the question of what were the processes and circumstances leading up to the departure of foreign fighters from Bosnia and Herzegovina and Kosovo and what informed their agency The author draws on the theories of social movement approaches more specifically contentious politics literature and utilizes the specific concepts of triggering mechanisms which refer to the enabling circumstances that make the radicalization and departure possible and pleasure in agency to elaborate on individual motivation The book also shows how a wider state fragility within the context of the post Yugoslav wars and the transitional period that never ended aided radicalization and how an incomplete process of post war transition can fuel the process of political and religious radicalization creating a wider enabling web for recruitment It will be of interest to students and scholars of Southeast European politics and foreign policy post war democratic transition security policy and radicalization more broadly
