Mongolia's mineral exports away from coal while the government is working to improve the investment environment by adopting the new Investment Law among other measures. Challenges do exist however from the long harsh winters that slow construction to the difficulty of connecting the sparsely populated nation through ICT and transport systems. In response the government has partnered with the private sector on a number of fronts in order to promote economic diversification and competitiveness.

**Presidential Leadership and National Security** Richard S. Conley, 2017-10-31 This book assesses the foreign policy legacy of the Obama administration through the lens of national security and leadership. Timely accessible chapters authored by leading scholars of presidential and international politics cover White House Cabinet relations Congress and War Powers challenges including the Iran nuclear deal ISIS and the closing of Guantanamo Bay drone strikes the New Cold War with Russia and the ways in which the Obama foreign policy legacy shaped the 2016 presidential election. In particular the book explores the philosophical basis of counter terrorism strategy in the Obama administration and traces how precepts differed from the administration of George W. Bush. More generally the book contributes to an understanding of the distinctive interplay between the formal constitutional powers of the president and the use of informal executive powers in the quest for peace and security. Finally the book surveys the challenges that Donald J. Trump faces in the transition to the new presidential administration.

**Teach** Janice Koch, 2019-01-02 Teach is a concise introduction to education that challenges students' preconceived notions of teaching in order to transform them into reflective practitioners. Empathizing with the difficulties students face as they move from the college classroom to their own classrooms, revered author Janice Koch invites readers to both reflect on their own dispositions for teaching and look outside of themselves to the demands of the profession, making the philosophy of teaching and learning accessible and relevant. The Fourth Edition emphasizes the changing student population and the role of technology and globalization in the field while also including the Interstate Teacher Assessment and Support Consortium (InTASC) standards correlating with each chapter's content. With the guidance of this supportive text, students will gain vital exposure by engaging with professional standards from the very start of their career.

**Net Neutrality Compendium** Luca Belli, Primavera De Filippi, 2015-11-10 The ways in which Internet traffic is managed have direct consequences on Internet users' rights as well as on their capability to compete on a level playing field. Network neutrality mandates to treat Internet traffic in a non-discriminatory fashion in order to maximise end users' freedom and safeguard an open Internet. This book is the result of a collective work aimed at providing deeper insight into what is network neutrality, how it relates to human rights and free competition, and how to properly frame this key issue through sustainable policies and regulations. The Net Neutrality Compendium stems from three years of discussions nurtured by the members of the Dynamic Coalition on Network Neutrality (DCNN), an open and multi-stakeholder group established under the aegis of the United Nations Internet Governance Forum (IGF).

**The Meritocracy Trap** Daniel Markovits, 2020-09-08 A revolutionary new argument from eminent Yale Law professor Daniel Markovits attacking the false promise of meritocracy. It

is an axiom of American life that advantage should be earned through ability and effort Even as the country divides itself at every turn the meritocratic ideal that social and economic rewards should follow achievement rather than breeding reigns supreme Both Democrats and Republicans insistently repeat meritocratic notions Meritocracy cuts to the heart of who we are It sustains the American dream But what if both up and down the social ladder meritocracy is a sham Today meritocracy has become exactly what it was conceived to resist a mechanism for the concentration and dynastic transmission of wealth and privilege across generations Upward mobility has become a fantasy and the embattled middle classes are now more likely to sink into the working poor than to rise into the professional elite At the same time meritocracy now ensnares even those who manage to claw their way to the top requiring rich adults to work with crushing intensity exploiting their expensive educations in order to extract a return All this is not the result of deviations or retreats from meritocracy but rather stems directly from meritocracy's successes This is the radical argument that Daniel Markovits prosecutes with rare force Markovits is well placed to expose the sham of meritocracy Having spent his life at elite universities he knows from the inside the corrosive system we are trapped within Markovits also knows that if we understand that meritocratic inequality produces near universal harm we can cure it When The Meritocracy Trap reveals the inner workings of the meritocratic machine it also illuminates the first steps outward towards a new world that might once again afford dignity and prosperity to the American people

*China's Domestic Transformation in a Global Context* Ligang Song, Ross Garnaut, Cai Fang, Lauren Johnston, 2015-07-08 The phrase New Normal captures the ongoing shift in the pattern and drivers of China's economic growth China's new growth rate is both slower and imposing difficult structural change These new economic conditions are challenging yet offer opportunities for China and its economic partners Reforms must be deepened but also make growth more inclusive and environmentally sustainable over this decade and beyond This year's Update offers both global context and domestic insight into this challenging new phase of China's domestic economic transformation How are policymakers elevating migrant workers concurrent with increasing consumption Is China's government spending enough on education and R D to ensure it can achieve its aspirations to ascend the global manufacturing value chain and avoid the middle income trap Are energy market reforms reducing or increasing the price of gas and electricity in China What are the consequences of China's financial reforms and expanding Renminbi trading for foreign banks What does China's new growth model mean for the international resources economy and for Africa Do SOEs face market conditions and are they dominating China's fast rising outbound investment What is China's strategy for navigating fragmented international trade policy negotiations

*Poor No More* Peter Cove, 2017-07-12 In the 1960s America set out to end poverty Policy makers put forth an unprecedented package of legislation funding poverty programs and empowering the poor through ineffectual employment related education and training However these handouts produced little change and efforts to provide education and job training proved inconsequential boasting only a 2.8 percent decrease in the poverty rate since 1965 Decades after the War

on Poverty began many of its programs failed Only one thing really worked to help end poverty and that was work itself the centerpiece of welfare reform in 1996 Poor No More is a plan to restructure poverty programs prioritizing jobs above all else Traditionally job placement programs stemmed from non profit organizations or government agencies However America Works the first for profit job placement venture founded by Peter Cove has the highest employee retention rate in the greater New York City area even above these traditional agencies When the federal government embraced the work first ideal inspired by the success of America Works welfare rolls plummeted from 12.6 million to 4.7 million nationally within one decade Poor No More is a paradigm shifting work that guides the reader through the evolution of America's War on Poverty and urges policy makers to eliminate training and education programs that waste time and money and to adopt a work first model while providing job seekers with the tools and life lessons essential to finding and maintaining employment

Production Management and Business Development Bohuslava Mihalčová, Petra Szaryszová, Lenka Štofová, Michal Pružinský, Barbora Gontkovičová, 2018-12-07 Trends in economic development rely on increasing human knowledge which stimulate the development of new sophisticated technologies With their utilization production is raised and the intent is to decrease natural resources consumption and protect and save our life environment as much as we can At the same time increasing pressure is observed both from competition and customers The way to be competitive is by improving manufacturing and services offered to the customer These are the major challenges of contemporary enterprises Organizations are improving their activities and management processes This is necessary to manage the seemingly intensifying competitive markets successfully Enterprises apply business optimizing solutions to meet new challenges and conditions This way ensuring effective development for long term competitiveness in a global environment This is necessary for the implementation of qualitative changes in the industrial policy Process Control and Production Management MTS 2018 is a collection of research papers from an international authorship The authors present case studies and empirical research which illustrates the progressive trends in business process management and the drive to increase enterprise sustainability development **Law Mart** Riaz Tejani, 2017-07-18 American law schools are in deep crisis Enrollment is down student loan debt is up and the profession's supply of high paying jobs is shrinking Meanwhile thousands of graduates remain underemployed while the legal needs of low income communities go substantially unmet Many blame overregulation and seek a free market to solve the problem but this has already been tested Seizing on a deregulatory policy shift at the American Bar Association private equity financiers established the first for profit law schools in the early 2000s with the stated mission to increase access to justice by serving the underserved Pursuing this mission at a feverish rate of growth they offered the promise of professional upward mobility through high tech simplified teaching and learning In Law Mart a vivid ethnography of one such environment Riaz Tejani argues that the rise of for profit law schools shows the limits of a market based solution to American access to justice Building on theories in law political economy and moral anthropology Tejani

reveals how for profit law schools marketed themselves directly to ethnoracial and socioeconomic minority communities relaxed admission standards increased diversity shook up established curricula and saw student success rates plummet They contributed to a dramatic rise in U S law student debt burdens while charging premium tuition financed up front through federal loans over time If economic theories have so influenced legal scholarship what happens when they come to shape law school transactions governance and oversight For students promised professional citizenship by these institutions is there a need for protections that better uphold institutional quality and sustainability Offering an unprecedented glimpse of this landscape Law Mart is a colorful foray into these essential questions

*The Russian State and Russian Energy Companies, 1992-2018* Ingerid M. Opdahl, 2020-06-09 The Russian State and Russian Energy Companies analyses the development of relations between the state and five major energy companies and how this shaped Russia's foreign policy in the post Soviet region The book argues that the development of Russia's political economy mattered for foreign policy over the quarter of a century from 1992 to 2018 Energy companies roles in institutional development enabled them to influence foreign policy formation and they became available as tools to implement foreign policy The extent to which it happened for each company varied with their accessibility to the Russian state Institutional development increased state capacity in a way that strengthened Russia's political regime The book shows how the combined power of several companies in the gas oil electricity and nuclear energy industry was a key feature of Russian foreign policy both in bilateral relationships and in support of Russia's regional position In this way Russia's energy resources were converted to regional influence The book contributes to our understanding of Russia's political economy and its influence on foreign policy and of the formation of policy towards post Soviet states

*Rebuilding resilient and sustainable agriculture in Somalia (Full report)* Food and Agriculture Organization of the United Nations, 2018-11-02 This report documents the pressures on Somalia's livestock and crop subsectors over the years but notes that there is a cause for optimism thanks to the country's resilience and resources These include a variety of agroecological zones and vast tracts of arable land and areas suitable for livestock production which in turn can support markets export trade and overall growth

**Subverting Consumerism** Robert Crocker, Keri Chiveralls, 2018-07-24 There is now a widespread interest in reuse in many domains from opera houses built over old warehouses to vintage clothes and everyday goods incorporating repurposed materials or parts Despite its ubiquity this extensive creative work is typically seen in narrowly environmental terms as a means of reducing carbon resource use or waste However as this volume shows reuse also has aesthetic and cultural dimensions and a rich social currency invoked to consciously subvert the accelerated consumer culture responsible for our unfolding environmental crisis In three parts the essays in this book consider reuse in terms of values aesthetics and meaning its application in contemporary urban and spatial settings and the revival of social practices involving a more conscious recourse to reuse and repair These are bookended by the editors essays the first on the significant relationship between reuse and technological and social

acceleration evident in the surrounding consumer society and the last on the multiple forms of reuse deployed in a contemporary alternative building practice and their contributions to presenting alternative ways of living in the world

Challenging dominant understandings of waste and consumption Subverting Consumerism shows how reuse has become a means for many to creatively engage with the past and to discover a continuity and sense of place eroded by the accelerative regimes of contemporary consumerism Becoming a means of resistance and offering a range of aesthetic social and economic possibilities reuse can be found to subvert and challenge the obsessive quest for the new found in contemporary consumerism
