Sand, Snow, and Stardust Gretchen Heefner, 2025-05-05 A vivid tour of US military efforts to understand survive and command harsh environments worldwide and beyond Deserts the Arctic outer space these extreme environments are often seen as inhospitable places at the edges of our maps But from the 1940s through the 1960s spurred by the diverse and unfamiliar regions the US military had navigated during World War II the United States defense establishment took a keen interest in these places dispatching troops to the Aleutian Islands North Africa the South Pacific and beyond To preserve the country's status as a superpower after the war to pave runways and build bridges engineers had to understand and then conquer dunes permafrost and even the surface of the moon Sand Snow

and Stardust explores how the US military generated a new understanding of these environments and attempted to master them intending to cement America's planetary power. Operating in these regions depended as much on scientific and cultural knowledge as on military expertise and technology. From General George S. Patton learning the hard way that the desert is not always hot to the challenges of constructing a scientific research base under the Arctic ice to the sheer implausibility of modeling Martian environments on Earth, Gretchen Heefner takes us on a wry expedition into the extremes and introduces us to the people who have shaped our insight into these extraordinary environments. Even decades after the first manned space flight, plans for human space exploration and extraplanetary colonization are still based on what we know about stark habitats on Earth. An entertaining survey of the relationship between environmental history and military might, *Sand Snow* and *Stardust* also serves as a warning about the further transformation of the planet, whether through desertification, melting ice caps, or attempts to escape it entirely.

Histories of Technology, the Environment and Modern Britain Jon Agar, Jacob Ward, 2018-04-09 *Histories of Technology, the Environment and Modern Britain* brings together historians with a wide range of interests to take a uniquely wide lens view of how technology and the environment have been intimately and irreversibly entangled in Britain over the last 300 years. It combines for the first time two perspectives with much to say about Britain since the industrial revolution: the history of technology and environmental history. Technologies are modified environments just as nature is to varying extents engineered. Furthermore, technologies and our living and non-living environment are both predominant material forms of organisation and self-organisation that surround and make us. Both have changed over time in intersecting ways. Technologies discussed in the collection include bulldozers, submarine cables, automobiles, flood barriers, medical devices, museum displays, and biotechnologies. Environments investigated include bogs, cities, farms, places of natural beauty, and pollution land and sea. The book explores this diversity but also offers an integrated framework for understanding these intersections.

Did She Kill Him? Kate Colquhoun, 2014-10-15 An intriguing story told in the style of Thomas Hardy or George Eliot if they traded in true crime. *Kirkus Reviews*: In the summer of 1889, young Southern belle Florence Maybrick stood trial for the alleged arsenic poisoning of her much older husband, Liverpool cotton merchant James Maybrick. The Maybrick Mystery had all the makings of a sensation: a pretty, flirtatious woman, resentful, gossiping, servants, rumors of gambling and debt, and scandalous mutual infidelity. The case cracked the varnish of Victorian respectability, shocking and exciting the public in equal measure as they clamored to read the latest revelations of Florence's past and glimpse her likeness in Madame Tussaud's. Florence's fate was fiercely debated in the courtroom, on the front pages of the newspapers, and in parlors and backyards across the country. Did she poison her husband? Was her previous infidelity proof of murderous intentions? Was James's own habit of self-medicating to blame for his demise? In this book, historian and CWA Gold Dagger Award nominee Kate Colquhoun recounts an utterly absorbing tale of addiction, deception, and adultery that keeps you asking to the very last page: Did she kill him?

Beyond Control James F. Barnett Jr., 2017-03-16 Beyond Control reveals the Mississippi as a waterway of change unnaturally confined by ever larger levees and control structures During the great flood of 1973 the current scoured a hole beneath the main structure near Baton Rouge and enlarged a pre-existing football field size crater That night the Mississippi River nearly changed its course for a shorter and steeper path to the sea Such a map-changing reconfiguration of the country's largest river would bear national significance as well as disastrous consequences for New Orleans and towns like Morgan City at the mouth of the Atchafalaya River Since 1973 the US Army

Corps of Engineers Control Complex at Old River has kept the Mississippi from jumping out of its historic channel and plunging through the Atchafalaya Basin to the Gulf of Mexico Beyond Control traces the history of this phenomenon beginning with a major channel shift around 3 000 years ago By the time European colonists began to explore the Lower Mississippi Valley a unique confluence of waterways had formed where the Red River joined the Mississippi and the Atchafalaya River flowed out into the Atchafalaya Basin A series of human alterations to this potentially volatile web of rivers starting with a bend cutoff in 1831 by Captain Henry Miller Shreve set the forces in motion for the Mississippi s move into the Atchafalaya Basin Told against the backdrop of the Lower Mississippi River s impending diversion the book s chapters chronicle historic floods rising flood crests a changing strategy for flood protection and competing interests in the management of the Old River outlet Beyond Control is both a history and a close look at an inexorable living process happening now in the twenty first century
