The Betrayal Kim Christian Priemel, 2018-05-17 At the end of World War II the Allies faced a threefold challenge how to punish perpetrators of appalling crimes for which the categories of genocide and crimes against humanity had to be coined how to explain that these had been committed by Germany of all nations and how to reform Germans The Allied answer to this conundrum was the application of historical reasoning to legal procedure In the thirteen Nuremberg trials held between 1945 and 1949 and in corresponding cases elsewhere a concerted effort was made to punish key perpetrators while at the same time providing a complex analysis of the Nazi state and German history Building on a long debate about Germany's divergence from a presumed Western path of development Allied prosecutors sketched a historical trajectory which had led Germany to betray

the Western model Historical reasoning both accounted for the moral breakdown of a civilised nation and rendered plausible arguments that this had indeed been a collective failure rather than one of a small criminal clique The prosecutors therefore carefully laid out how institutions such as private enterprise academic science the military or bureaucracy which looked ostensibly similar to their opposite numbers in the Allied nations had been corrupted in Germany even before Hitler s rise to power While the argument depending on individual protagonists subject matters and contexts met with uneven success in court it offered a final twist which was of obvious appeal in the Cold War to come if Germany had lost its way it could still be brought back into the Western fold The first comprehensive study of the Nuremberg trials *The Betrayal* thus also explores how history underpins transitional trials as we encounter them in today s courtrooms from Arusha to The Hague

**Russia-EU Relations and the Common Neighborhood** Irina Busygina,2017-07-20 Examining Russia EU relations in terms of the forms and types of power tools they use this book argues that the deteriorating relations between Russia and the EU lie in the deep differences in their preferences for the international status quo These different approaches combined with economic interdependence and geographic proximity means both parties experience significant difficulties in shaping strategy and formulating agendas with regards to each other The Russian leadership is well aware of the EU s authority orientation but fails to reliably predict

foreign policy at the EU level whilst the EU realizes Russia's coercive orientation in general but cannot predict when and where coercive tools will be used next. Russia is gradually realizing the importance of authority while the EU sees the necessity of coercion tools for coping with certain challenges. The learning process is ongoing but the basic distinction remains unchanged and so their approaches cannot be reconciled as long as both actors exist in their current form. Using a theoretical framework and case studies including Belarus, Georgia and Ukraine, Busygina examines the possibilities and constraints that arise when the power of authority and the power of coercion interact with each other and how this interaction affects third parties.

**The Salvador Option** Russell Crandall, 2016-05-23. This book offers a thorough and fair-minded interpretation of the role of the United States in El Salvador's civil war.

**Justifying Contract in Europe** Martijn W. Hesselink, 2021-06-22. This title explores the normative foundations of European contract law. It addresses fundamental political questions on contract law in Europe from the perspective of leading contemporary political theories. Does the law of contract need a democratic basis? To what extent should it be Europeanised? What justifies the binding force of contract and the main remedies for breach? When should weaker parties be protected? Should market transactions be considered legally void when they are immoral? Which rules of contract law should the parties be free to opt out of? Adopting a critical lens, this book interrogates utilitarian, liberal, egalitarian, libertarian, communitarian, civic republican and discourse theoretical political philosophies and analyses the answers they provide to these questions. It also situates these theoretical debates within the context of the political landscape of European contract law and the divergent views expressed by lawmakers, legal academics and other stakeholders. This work moves beyond the *acquis*, positivism, market reductionism and private law essentialism that tend to dominate these conversations and foregrounds normative complexity. It explores the principles and values behind various arguments used in the debates on European contract law and its future to highlight the normative stakes involved in the practical question of what we as a society should do about contract law in Europe. In so doing, it opens up democratic space for the consideration of alternative futures for contract law in the European Union and for better justifications for those parts of the EU contract law *acquis* we wish to retain.

*Responses to the 'Arabellions'* Tanja Börzel, Assem Dandashly, Thomas Risse, 2017-10-02. This book studies the reactions by external actors including the European Union to the events unfolding in the Arab world beginning in December 2010. In particular, contributors look at external actors' attempts to balance their desire for stability with their normative principles toward human rights and democracy. The book compares the action and inaction of the EU with other international and regional players including the United States, Russia, Turkey and Israel and assesses the response of these actors to the Arabellions events, analysing changes in their approaches to the Arab region. The contributions to this book answer three questions: 1. How have external actors assessed the Arabellions and what role did they see for themselves in this context? 2. Which goals and instruments did external actors pursue toward the MENA region? In particular, how did they deal with conflicting goals such as support for human rights and democracy on the one

hand and concerns about security and stability on the other 3 How can we explain the varying responses of external actors to the Arabellions This book was published as a special issue of the Journal of European Integration **Competition Law** Richard Whish,David Bailey,2015 Definitive and clear authoritative and comprehensive the stand alone resource on competition law for students and practitioners written by the leading academics in the field This eighth edition addresses key developments including the Enterprise and Regulatory Reform Act 2013 with an increased emphasis on intellectual property
