Colten,2010-06-30 The hurricane protection systems that failed New Orleans when Katrina roared on shore in 2005 were the product of four decades of engineering hubris excruciating delays and social conflict In Perilous Place Powerful Storms Craig E Colten traces the protracted process of erecting massive structures designed to fend off tropical storms and examines how human actions and inactions left the system incomplete on the eve of its greatest challenge Hurricane Betsy in 1965 provided the impetus for Congress to approve unprecedented hurricane protection for the New Orleans area Army Engineers swiftly outlined a monumental barrier network that would not only

safeguard the city at the time but also provide for substantial growth Scheduled for completion in 1978 the project encountered a host of frustrating delays From newly imposed environmental requirements to complex construction challenges to funding battles to disputes over proper structures the buffer envisioned for southeast Louisiana remained incomplete forty years later as Hurricane Katrina bore down on the city As Colten reveals the very remedies intended to shield the city ultimately contributed immensely to the residents vulnerability by encouraging sprawl into flood prone territory that was already sinking within the ring of levees *Perilous Place Powerful Storms* illuminates the political social and engineering lessons of those who built a hurricane protection system that failed and serves as a warning for those guiding the recovery of post Katrina New Orleans and Louisiana *In Supreme Court* Charles M. Armstrong, Geoffrey Martin, 2015-12-14 An annual collection of studies of individuals who have made major contributions to the development of geography and geographical thought Subjects are drawn from all periods and from all parts of the world and include famous names as well as those less well known explorers independent thinkers and scholars Each paper describes the geographer s education life and work and discusses their influence and spread of academic ideas Each study includes a select bibliography and brief chronology The work includes a general index and a cumulative index of geographers listed in volumes published to date **Geological Survey Professional Paper** , 1980 **New Technology and Regional Development** Bert Van Der Knapp, Egbert Wever, 2003-08-16 First Published in 2004 Since the second half of the seventies a period of economic recession a growing interest for technological change can be noticed in all old industrial countries The reason for this phenomenon is the conviction that the economic future of these countries will depend to a large degree on their ability to create new products and processes and to make these commercially viable Hence the stimulation and subsidising of all kinds of Research and Development R D activities by the governments of these countries Against this background it was certainly not unexpected that the IGU Commission on Industrial Change presided by Godfrey Linge decided to organise a congress on Technology and Industrial Change This congress was held in August 1985 at Nijmegen in the Netherlands In this book some of the papers presented there are published We are very happy that we were allowed to include the very interesting contributions of the representatives of Philips in Eindhoven and of the European Commission in Brussels [The United States and the End of British Colonial Rule in Africa, 1941-1968](#) James P. Hubbard, 2014-01-10 At the end of World War II Britain possessed a vast

African empire encompassing nearly 27 million square miles about 10 times larger than Britain itself But by 1965 only three small African territories remained under British control all of which would become independent before the end of 1968 This book examines the swift demise of Britain's African empire looking particularly at the role played by the United States in bringing the empire to an end It reveals how the United States was anti colonial without being actively pro independence concluding that the country's policies and actions combined with its postwar dominance directly and indirectly contributed to the political economic and social transformation of Africa
