**Governomics** Ian McAuley, Miriam Lyons, 2015-05-01 People have good reason to demand decent public education and a well funded health system to yearn for an economy that doesn't trash the environment or for a smaller gap between rich and poor Almost without exception sound economics is on their side We've grown used to public debates that pit people and the planet against an abstract distorted image of the economy but it doesn't have to be this way *Governomics* shows that an emaciated state is bad for business and that standing up for government means standing up for a public sector that truly serves the public Everybody knows governments are wasteful incompetent and a drag on the economy But if you're not sure that's true read this book Ross Gittins *Sydney Morning Herald* and *The Age* *Governomics* shows that a market economy can only work when sustained by a strong and active public sector It will inject some much needed economic sanity into conversations on the role of government in Australia John Quiggin Australian Research Council Laureate Fellow University of Queensland

*Assured Destruction* David Bath, 2020-03-15 *Assured Destruction* Building the Ballistic Missile Culture of the U S Air Force documents the rapid development of nuclear ballistic missiles in the United States and their equally swift demise after the Cuban Missile Crisis revealing how these drastic changes negatively influenced both the Air Force and the missile community David W Bath contends that the struggle to create and control nuclear ballistic missiles threatened both the dominance of the United States during an intensifying Cold War and the strategic airpower mission of the newly created Air Force The book details the strenuous efforts required to create and prepare a missile arsenal before the Cuban Missile Crisis which occurred only five years after the first missile was declared operational It uses the personal recollections of former missileers and the professional military education theses they wrote to highlight some of the concerns that have faced the missileers who operated and worked on these powerful weapons from 1957 to the present The highlight of the book however is the personal stories of the missileers who served during the missile crisis revealing the efforts that they went to in order to prepare these unique and untried weapons for what many thought might become the third world war [The Global](#)

Muslim Brotherhood in Britain Damon Perry, 2018-07-17 Since 2011 with the British Government's counter radicalisation strategy Prevent non violent Islamist groups have been considered a security risk for spreading a divisive ideology that can lead to radicalisation and violence More recently the Government has expressed concerns about their impact on social cohesion entryism and women's rights The key protagonists of non violent Islamist extremism allegedly include groups and individuals associated with the Muslim Brotherhood and Jama'at al Islami They have been described as part of the global Muslim Brotherhood but do they constitute a singular phenomenon a social movement This book shows that such groups and individuals do indeed comprise a movement in Britain one dedicated to an Islamic revival It shows how they are networked organisationally bonded through ideological and cultural kinship and united in a conflict of values with the British society and state Using original interviews with prominent revivalist leaders as well as primary sources the book also shows how the movement is not so much Islamist in aspiring for an Islamic state but concerned with institutionalising an Islamic worldview and moral framework throughout society The conflict between the Government and the global Muslim Brotherhood is apparent in a number of different fields including education governance law and counterterrorism But this does not simply concern the direction of Government policy or the control of state institutions It most fundamentally concerns the symbolic authority to legitimise a way of seeing thinking and living By assessing this multifaceted conflict the book presents an exhaustive and up to date analysis of the political and cultural fault lines between Islamic revivalists and the British authorities It will be useful for anyone studying Islam in the West government counter terrorism and counter extremism policy multiculturalism and social cohesion

**Knowledge Corrupters** Colin Crouch,2016-04-25 In principle the advanced market driven world in which we now live is fuelled by knowledge information and transparency but in practice the processes that produce this world systematically corrupt and denigrate knowledge this is the powerful and provocative argument advanced by Colin Crouch in his latest exploration of societies on the road to post democracy Crouch shows that executives in profit maximizing corporations have incentives to ignore or distort knowledge especially firms in the information business of the mass media themselves as financial knowledge increasingly trumps the other kinds of knowledge that business needs Firms also seek to take control of public knowledge and use it for their own ends often at the cost of other stakeholders in society Meanwhile the transfer of similar practices to professional public services undermines professional skills and ethics especially when these services are out sourced to the private sector Attempts to extricate ourselves from these problems involve reshaping the complex and often conflicting relationships among citizens professionals managers and financiers This new book by one of the most incisive critics of contemporary Western societies will be of interest to a wide range of readers from students to policy makers and those who work in the public and private sectors **World Ocean Assessment** Alan Simcock,2017-04-17 This
