**Plant Natural Products for Human Health** Chun-Tao Che, Hongjie Zhang, 2019-03-21 Plants have served mankind as an important source of foods and medicines While we all consume plants and their products for nutritional support a majority of the world population also rely on botanical remedies to meet their health needs either as their own traditional medicine or as complementary and alternative medicine From a pharmaceutical point of view many compounds obtained from plant sources have long been known to possess bio pharmacological activities and historically plants have

yielded many important drugs for human use from morphine discovered in the early nineteenth century to the more recent paclitaxel and artemisinin Today we are witnessing a global resurgence in interest and use of plant based therapies and botanical products and natural products remain an important and viable source of lead compounds in many drug discovery programs This Special Issue on Plant Natural Products for Human Health compiles a series of scientific reports to demonstrate the medicinal potentials of plant natural products It covers a range of disease targets such as diabetes inflammation cancer neurological disease cardiovascular disease liver damage bacterial and fungus infection and malarial These papers provide important insights into the current state of research on drug discovery and new techniques It is hoped that this Special Issue will serve as a timely reference for researchers and scholars who are interested in the discovery of potentially useful molecules from plant sources for health related applications

*Plant Extracts* Raffaele Capasso, Lorenzo Di Cesare Mannelli, 2021-04-29 Plant extracts are widely used for therapeutic purposes The vegetal origin of these products satisfies people's desire to cure themselves with natural drugs this aspect together with effectiveness and regulatory opportunities is the base of the broad modern use of medicinal plants Traditional uses and novel biological effects allow the availability of an extraordinarily high number of different compounds with formidable therapeutic potential Nevertheless pitfalls are hidden behind poor pharmacological and toxicological knowledge of plant extracts nonstandardized methods of extraction and undefined and nonrepeatable qualitative and quantitative composition In this context novel experimental studies on plant products are appreciated and are necessary to reinforce the scientific soundness of phytotherapy This book aims to respond to this medical need comprehensively highlighting the newest discoveries in vegetal resources with an emphasis on pharmacological activity
