

The Trucker's Guide to Fuel Efficiency

Petrol station

Hundreds of individual factors affect the fuel efficiency of a truck. While addressing one issue could lead to minor improvements, tackling the majority is the only way to make substantial changes.

On average the fuel itself only equates to around 30% of annual operating costs.

Maintenance, tyres and insurance accounts for the remaining 70%.

However, the time and money you spend on these other factors will directly affect that precious 30%.

Improving your Driving Habits

Reduce Idle Time

When parking for short periods of time or idle in any other situation when your truck will remain stationary, simply turn off the engine.

Monitor your Speed

Fuel consumption is directly proportional to speed. Going too fast will significantly increase aerodynamic drag, thus making your vehicle consume more fuel. Reducing your speed from 56mph to 50mph could decrease fuel consumption by up to 22%.

Improve your Clutch Control

The quicker you move up a gear the more fuel you will save; therefore, fewer gear changes is much better for performance.

Accelerate Smoothly

Combine a gentle low gear start with more rapid shifts to higher gears when you begin moving faster.

Warm Up your Vehicle

If the temperature is below 0°C, turn on the engine and let your truck warm up for 3 to 5 minutes.

Avoid Excessive Braking

Anticipating road conditions and remaining vigilant is the best way to prevent choppy driving.

Turn Off the Air Con

If you keep the air con on at high speeds and the windows down at low speeds, you could reduce your fuel consumption by up to 10%.

Plan your Route

Before you set off, plan your route in conjunction with both traffic warnings and topography.

Adjust your Load

Arrange the load as close as possible to the cab and try to keep it low.

Check the Weather

The weather can have a huge impact on how you drive; therefore, it's always good to be aware of potential downturn, snow or any other problematic conditions.

Maintaining your Vehicle

Check the Tyre Pressure

If your tyre pressure falls below the recommended psi, the rolling resistance will cause more drag, which increases fuel wastage.

Monitor your Spark Plugs

Spark plugs can reveal a lot about the state of the engine. For example, discoloration could mean that your truck is burning too much fuel.

Perform More Oil Changes

When using an old truck it's always a good idea to over-compensate oil changes and purchase synthetic oil and high-capacity filters.

Replace Old Air Filters

Getting rid of old air filters could reduce your fuel costs by up to 10%.

Upgrading your Vehicle

Install Air Springs

Suspension is frequently overlooked - most of our suspension puts unnecessary strain on tyres, which will wear them down quicker and result in less momentum.

Use Unnecessary Accessories

"Downgrade" your vehicle by getting rid of any large or heavy accessories such as bulky bars and headache racks.

Attach a Tailgate Cover

A tailgate cover provides a surface for the air to flow past, rather than letting it rush into the opening.

Install a Performance Exhaust

Performance exhausts are specifically engineered to reduce flow resistance and improve your fuel mileage.

Using Technology

Topographical Set Nav

Topographical (TOPO) satellite navigation systems will not only inform you of road markings, but also elevation in the geography, which can help you plan ahead more efficiently.

MPG Meters

By using an MPG meter to assess needed data you can figure out what aspects of your driving are burning the most fuel and how you can make improvements.

Fuel Mizer

A Fuel Mizer is very similar to an MPG meter, however it will remind you if you aren't abiding by the pre-set list of driving behaviour.

Fuel Efficiency Guide

DP Hallahan

Fuel Efficiency Guide:

Fuel Economy Guide ,2001 Gas Mileage Guide for New Car Buyers in California , *Gas Mileage Guide* ,1981
Fuel Economy Guide , 1983 Gas Mileage Guide, EPA Fuel Economy Estimates ,1982 *Motor Vehicle Fuel*
