Mobile technologies combined with an interdisciplinary approach to knowledge and organization of learning experiences that are meaningful to children could create a creative and interactive learning environment different from that of traditional teaching. Making good use of mobile learning with appropriate devices will increase the learning motivations of the students and help them bring about positive performance. Mobile Learning Applications in Early Childhood Education is a collection of innovative research on the methods and applications of mobile learning techniques and strategies within diversified teaching settings. While highlighting topics including computational thinking, ubiquitous learning, and social development, this book is ideally designed for researchers, teachers, parents, curriculum developers, instructional designers, academicians, students, and practitioners seeking current research on the application of mobile technology within child education. **Glimpses into**

Primary School Teacher Education in South Africa Sarah Gravett, Elizabeth Henning, 2020-11-05 This book explores the current landscape of Initial Teacher Education (ITE) in primary schools in South Africa. Considering recent policy directives and initiatives, it highlights the dilemmas of ITE for the primary school and gives a thorough account of innovations and initiatives to improve ITE. The book presents what works best for quality preparation of teachers in the Global South where many children rely on their teachers and school life to break the cycle of poverty. Chapters draw on evidence from workplace learning, pre-service study, and primary school teacher education policy to highlight examples of promising change in teacher education in South Africa, addressing the clichés of theory versus practice head-on. This book successfully brings out the challenging aspects of teacher education for childhood learning, which has otherwise been regarded as the softer option for a career in education. This book will be of great interest for academics, researchers, and postgraduate students in the fields of teacher education, African education, educational policy, international education, and comparative education.
