Current Trends in the Representation of Physical Processes in Weather and Climate Models David A. Randall, J. Srinivasan, Ravi S. Nanjundiah, Parthasarathi Mukhopadhyay, 2019-01-31 This book focuses on the development of physical parameterization over the last 2 to 3 decades and provides a roadmap for its future development. It covers important physical processes: convection, clouds, radiation, land surface, and the orographic effect. The improvement of numerical models for predicting weather and climate at a variety of places and times has progressed globally. However, there are still several challenging areas which need to be addressed with a better understanding of physical processes based on observations and to subsequently be taken into account by means of improved parameterization. And this is all the more important since models are increasingly being used at higher horizontal and vertical resolutions. Encouraging debate on the cloud resolving approach or the hybrid approach with parameterized convection and grid scale cloud microphysics and its impact on models' intrinsic predictability, the book offers a motivating reference guide for all researchers whose work involves physical parameterization problems and numerical models.

Severe Storms Someshwar Das, Wei-Kuo Tao, 2025-01-25 The book provides information on the observational aspects of the severe storms through satellite, radar, aircraft, and ground-based network of stations, and these issues are discussed in the first part of the book consisting of 8 chapters. The numerical modelling and data assimilation techniques are discussed in the second part of the book aimed at development of Early Warning Systems. 12 chapters, and finally the outlook of the severe storms in a changing climate scenario, their socio-economic impacts, and policies for disaster mitigation are discussed in the third part of the book consisting of 6 chapters. This book is of great interest to atmospheric scientists and other researchers, practitioners, policy and decision makers, international institutions, governmental and non-governmental organizations, educators, as well as students.

2014 China Functional Materials Technology and Industry Forum Guang Ming Zhao, Li Xin Chen, Yu Tang, Lang He, Bin Long, Zun Yu Nie, Hao Hua Chen, 2014-12-17 Selected peer-reviewed papers from the 2014 China Functional Material Technology and Industry Forum. Chinese Higher Education Reform and Social Justice Bin Wu, W. John Morgan, 2015-06-26 In place of a distributive justice perspective which focuses simply on equal access to universities, this book presents a broader understanding of the relationship between Chinese higher education and economic and social change. The necessity for research on the place of universities in contemporary Chinese society may be seen from current debates about and policy towards issues of educational inequality at Chinese universities. Many questions arise as a consequence: What are the limitations of neo-liberalism in higher education policy and what are the alternatives? How has the Chinese government met the challenges of educational inequality and what lessons may be learned from its recent initiatives? How may higher education enhance social justice in Chinese society given economic, social, and cultural inequality? What may be learned from the experience of Macau, Hong Kong, and of Taiwan in terms of achieving social justice in China?

universities These questions are considered by a group of leading scholars from both inside and outside China

MasterClass in History Education Christine Counsell, Katharine Burn, Arthur Chapman, 2016-10-06 MasterClass in History Education draws on international research and practice to present effective and engaging approaches for history teachers who want to explore the ways in which reading research and reflection can support the development of history teaching and learning in the classroom At the heart of the book is a series of professional enquiries carried out by experienced history teachers working in a range of contexts Each history teacher addresses clear questions arising from their practice and together they illustrate various approaches to data collection data analysis and argument These history teachers also show how they drew on diverse scholarship in history and history education including many publications by other history teachers In eight further chapters other experts ranging from practitioner scholars to researchers in diverse fields such as history history education teacher education teacher research and curriculum theory reflect on the distinctive insights that these teachers offer and explore connections with their own fields The combination of perspectives and the depth of knowledge of the varied contributors reveal the importance of different kinds of relationship between theory and practice The links between classroom realities and research and the critical use of different kinds of text will support history teachers in developing their practice and professional voice OECD Reviews of Innovation Policy: Norway 2017

OECD, 2017-06-16 Following a remarkable transformation in the past century in research and innovation in particular through the development of new technologies and processes in sectors such as oil and gas shipbuilding and also fisheries and aquaculture **Nanomaterials for Water Remediation** Ajay Kumar Mishra, Chaudhery M. Mishra, 2020-06-08 The capability to generate potable water from polluted sources is growing in importance as pharmaceuticals microplastics and waste permeate our soil Nanotechnology allows for improvements in water remediation technologies by taking advantage of the unique properties of materials at this small scale Advanced Frequency

Regulation Strategies in Renewable-Dominated Power Systems Sandeep Dhundhara, Yogendra Arya, Ramesh C.

Bansal, 2023-09-01 Advanced Frequency Regulation Strategies in Renewable Dominated Modern Power Systems discusses advanced control strategies positioned to attain stable and reliable electric power operation in highly renewable modern grids These strategies are increasingly valuable components of the practitioner technical toolbox and are essential to maintain frequency and voltage regulations assert power quality standards and ensure overall grid stability This book focuses on the rapid integration of renewable based generating units in power systems highlighting state of the art technologies and emerging topics pertaining to load frequency control robust control strategies and energy storage systems Chapters are accompanied by case studies drawn from modern international practice Disseminates novel control strategies for the reliable and robust control of renewable generating units Discusses implementation using case studies that address multiple frequency control applications across integrated modern power systems Accompanied by simulation models in MATLAB that

are built to emphasize practical usage and address real world problems

Metal Chalcogenide Biosensors Ali Salehabadi, Morteza Enhessari, Mardiana Idayu Ahmad, Norli Ismail, Banshi Dhar Gupta, 2023-01-23 *Metal Chalcogenide Biosensors Fundamentals and Applications* provides an overview of advances in materials development of chalcogenides for use in biosensing and sensing applications. The metal chalcogenides discussed include highly reactive metals, noble metals, and transition metals. Particular attention is given to the morphology, porosity, structure, and fabrication of materials for biosensing applications. The connection between the chalcogenides' physical and chemical properties and device performance is explored. Key parameters for biosensor devices are investigated, such as thermodynamics, kinetics, selectivity, sensitivity, efficiency, and durability, to aid in materials selection. Finally, a range of biosensor devices are addressed, including gas biosensors, chemical biosensors, environment biosensors, and biological molecule sensors. This book is suitable for those in the fields of materials science and engineering, chemistry, and physics. Reviews the latest advances in fabrication methods for metal chalcogenide-based biosensors. Discusses the parameters of biosensor devices to aid in materials selection. Provides readers with a look at the chemical and physical properties of reactive metals, noble metals, and transition metals chalcogenides and their connection to biosensor device performance.

Innovative Multifunctional Nanomaterial for Photocatalysis, Sensing, and Imaging Kumar, Azad, 2023-10-16 Technology is significantly affected by a material's ability to adapt to its environment in a beneficial way. These smart systems, in which material qualities react to outside stimuli, are currently being developed. These materials have the potential to significantly improve the performance of new systems by lowering size, weight, cost, power consumption, and complexity while enhancing effectiveness, safety, and adaptability. Materials can be multifunctional on a variety of temporal and compositional levels and at dimensions ranging from nano to macro. *Innovative Multifunctional Nanomaterial for Photocatalysis, Sensing, and Imaging* clarifies the type, chemical composition, and applications of multifunctional nanomaterials in photocatalysis, sensing, and imaging. This book discusses the most current advances in multifunctional materials for photocatalysis, sensing, and imaging in biological systems. Covering topics such as drug development, nanoparticles, and sensing, this premier reference source is an excellent resource for chemists, engineers, professionals, students, and educators of higher education, researchers, and academicians.
