

Groundwater Pollution Lab

Directions:

You will need a slice of white bread, red food coloring, a paper towel, and a beaker of water with a pipette. Looking at the materials and lab we will be using, what are the safety precautions we should take to protect ourselves and materials during the investigation?

- 1) Take your slice of bread and hold it bottom up over a paper towel. Take your red food coloring and place one to two drops on the middle of the bottom crust of your slice of bread.
- 2) Then fill your pipette with water and slowly drop water on the spot where you just put the food coloring drop by drop until you have put two pipettes on the bread keeping the bread held on its edge for at least five minutes.

Questions:

- 1) Draw the pattern of the dye you see on the bread.
- 2) Which way did the food coloring spread first?
- 3) As you go down the bread, did the intensity of the food coloring stay the same, get lighter in color, or get darker in color?
