Hfss Metamaterial Antenna Design Guide:

Wearable Systems and Antennas Technologies for 5G, IOT and Medical Systems Albert Sabban, 2020-12-08 Due to progress in the development of communication systems it is now possible to develop low cost wearable communication systems A wearable antenna is meant to be a part of the clothing or close to the body and used for communication purposes which include tracking and navigation mobile computing and public safety Examples include smartwatches with integrated Bluetooth antennas glasses such as Google Glass with Wi Fi and GPS antennas GoPro action cameras with Wi Fi and Bluetooth antennas etc They are increasingly common in consumer electronics and for healthcare and medical applications However the development of compact efficient wearable antennas is one of the major challenges in the development of wearable communication and medical systems Technologies such as printed compact antennas and miniaturization techniques have been developed to create efficient small wearable antennas which are the main objective of this book Each chapter covers enough mathematical detail and explanations to enable electrical electromagnetic and biomedical engineers and students and scientists from all areas to follow and understand the topics presented New topics and design methods are presented for the first time in the area of wearable antennas metamaterial antennas and fractal antennas The book covers wearable antennas RF measurements techniques and measured results in the vicinity of the human body setups and design considerations The wearable antennas and devices presented in this book were analyzed by using HFSS and ADS 3D full wave electromagnetics software Explores wearable medical systems and antennas Explains the design and development of wearable communication systems Explores wearable reconfigurable antennas for communication and medical applications Discusses new types of metamaterial antennas and artificial magnetic conductors AMC Reviews textile antennas Dr Albert Sabban holds a PhD in Electrical Engineering from the University of Colorado at Boulder USA 1991 and an MBA from the Faculty of Management Haifa University Israel 2005 He is currently a Senior Lecturer and researcher at the Department of Electrical and Electronic Engineering at Kinneret and Ort Braude Engineering Colleges [The Advancing World of Applied Electromagnetics](#) Akhlesh Lakhtakia, Cynthia M. Furse, Tom G. Mackay, 2024-04-08 This book commemorates five decades of research by Professor Magdy F Iskander Life Fellow IEEE on materials and devices for the radiation propagation scattering and applications of electromagnetic waves chiefly in the MHz THz frequency range as well on electromagnetics education This synopsis of electromagnetics stemming from the life and times of just one person is meant to inspire junior researchers and reinvigorate mid level researchers in the electromagnetics community The authors of this book are internationally known researchers including 12 IEEE fellows who highlight interesting research and new directions in theoretical experimental and applied electromagnetics Provides a single source reference to many of the most significant developments of the past 5 decades in theoretical experimental and applied electromagnetics Offers readers in each sub discipline discussed current research trends the state of the art the chief tools needed in that area and the vision of a research leader for that area

Includes content of particular interest in Antennas and Propagation as well as Microwave Theory and Techniques

Electronic Devices and Circuit Design Suman Lata Tripathi, Smrity Dwivedi, 2022-02-02 This new volume offers a broad view of the challenges of electronic devices and circuits for IoT applications The book presents the basic concepts and fundamentals behind new low power high speed efficient devices circuits and systems in addition to CMOS It provides an understanding of new materials to improve device performance with smaller dimensions and lower costs It also looks at the new methodologies to enhance system performance and provides key parameters for exploring the devices and circuit performance based on smart applications The chapters delve into myriad aspects of circuit design including MOSFET structures depending on their low power applications for IoT enabled systems advanced sensor design and fabrication using MEMS indirect bootstrap techniques efficient CMOS comparators various encryption decryption algorithms IoT video forensics applications microstrip patch antennas in embedded IoT applications real time object detection using sound IOT and nanotechnologies based wireless sensors and much more

Antenna Fundamentals for Legacy Mobile

Applications and Beyond Issa Elfergani, Abubakar Sadiq Hussaini, Jonathan Rodriguez, Raed Abd-Alhameed, 2017-10-03 This book highlights technology trends and challenges that trace the evolution of antenna design starting from 3rd generation phones and moving towards the latest release of LTE A The authors explore how the simple monopole and whip antenna from the GSM years have evolved towards what we have today an antenna design that is compact multi band in nature and caters to multiple elements on the same patch to provide high throughput connectivity The scope of the book targets a broad range of subjects including the microstrip antenna PIFA antenna and the monopole antenna to be used for different applications over three different mobile generations Beyond that the authors take a step into the future and look at antenna requirements for 5G communications which already has the 5G drive in place with prominent scenarios and use cases emerging They examine these and put in place the challenges that lie ahead for antenna design particularly in mm Wave design The book provides a reference for practicing engineers and under post graduate students working in this field

Electromagnetic Propagation and Waveguides in Photonics and Microwave Engineering Patrick Steglich, 2020-10-21 Optical and microwave waveguides have attracted much research interest in both science and industry The number of potential applications for their use is growing rapidly This book examines recent advances in the broad field of waveguide technology It covers current progress and latest breakthroughs in emergent applications in photonics and microwave engineering The book includes ten contributions on recent developments in waveguide technologies including theory simulation and fabrication of novel waveguide concepts as well as reviews on recent advances [Journal of Zhejiang University](#), 2006

Metamaterials for Antenna Applications Amit K. Singh, Mahesh P. Abegaonkar, Shibani Kishen Koul, 2021-09-12 The book presents an engineering approach for the development of metamaterials and metasurfaces with emphasis on application in antennas It offers an in depth study performance analysis and extensive characterization on different types of

metamaterials and metasurfaces Practical examples included in the book will help readers to enhance performance of antennas and also develop metamaterial based absorbers for a variety of applications Key Features Provides background for design and development of metamaterial structures using novel unit cells Gives in depth performance study of miniaturization of microstrip antennas Discusses design and development of both transmission and reflection types metasurfaces and their practical applications Verifies a variety of Metamaterial structures and Metasurfaces experimentally The target audience of this book is postgraduate students and researchers involved in antenna designs Researchers and engineers interested in enhancing the performance of the antennas using metamaterials will find this book extremely useful The book will also serve as a good reference for developing artificial materials using metamaterials and their practical applications Amit K Singh is Assistant Professor in the Department of Electrical Engineering at the Indian Institute of Technology Jammu India He is a Member of the IEEE USA Mahesh P Abegaonkar is Associate Professor at the Centre for Applied Research in Electronics at the Indian Institute of Technology Delhi He is a Senior Member of the IEEE USA Shiban Kishen Koul is Emeritus Professor at the Centre for Applied Research in Electronics at the Indian Institute of Technology Delhi He is a Life Fellow of the Institution of Electrical and Electronics Engineering IEEE USA a Fellow of the Indian National Academy of Engineering INAE and a Fellow of the Institution of Electronics and Telecommunication Engineers IETE

Microstrip Antenna Design for Wireless Applications Praveen Kumar Malik, Sanjeevikumar Padmanaban, Jens Bo Holm-Nielsen, 2021-11-29 This book focuses on recent advances in the field of microstrip antenna design and its applications in various fields including space communication mobile communication wireless communication medical implants and wearable applications Scholars as well as researchers and those in the electronics electrical instrumentation engineering fields will benefit from this book The book shall provides the necessary literature and techniques using which to assist students and researchers would design antennas for the above mentioned applications and will ultimately enable users to take measurements in different environments It is intended to help scholars and researchers in their studies by enhancing their the knowledge and skills in on the latest applications of microstrip antennas in the world of communications such as world like IoT D2D satellites and wearable devices to name a few FEATURES Addresses the complete functional framework workflow in printed antenna design systems Explores the basic and high level concepts including advanced aspects in planar design issues thus serving as a manual for those in the the industry while also assisting beginners Provides the latest techniques used for antennas in terms of structure defected ground MIMO and fractal designs Discusses case studies related to data intensive technologies in microchip antennas in terms of the most recent applications and similar uses for the Internet of Things and device to device communication **Applications of Metamaterials to Planar Antenna Design**
