Separation of Powers in African Constitutionalism Charles M. Fombad, 2016-03-03 The new

series Stellenbosch Handbooks in African Constitutional Law will engage with contemporary issues of constitutionalism in Africa filling a notable gap in African comparative constitutional law Separation of Powers in African Constitutionalism is the first in the series examining one of the critical measures introduced by African constitutional designers in their attempts to entrench an ethos of constitutionalism on the continent Taking a critical look at the different ways in which attempts have been made to separate the different branches of government the Handbook examines the impact this is having on transparent and accountable governance Beginning with an overview of constitutionalism in Africa and the different influences on modern African constitutional developments it looks at the relationship between the legislature and the executive as well as the relationship between the judiciary and the political branches Despite differences in approaches between the different constitutional cultures that have influenced developments in Africa there remain common problems One of these problems is the constant friction in the relationship between the three branches and the resurgent threats of authoritarianism which clearly suggest that there remain serious problems in both constitutional design and implementation The book also studies the increasing role being played by independent constitutional institutions and how they complement the checks and balances associated with the traditional three branches of government *Privacy, Technology, and the Criminal Process* Andrew Roberts, Joe Purshouse, Jason Bosland, 2023-07-28 This collection considers the implications for privacy of the utilisation of new technologies in the criminal process In most modern liberal democratic states privacy is considered a basic right Many national constitutions and almost all international human rights instruments include some guarantee of privacy Yet privacy interests appear to have had relatively little influence on criminal justice policy making The threat that technology poses to these interests demands critical re evaluation of current law policy and practice This is provided by the contributions to this volume They offer legal criminological philosophical and comparative perspectives The book will be of interest to legal and criminological scholars and postgraduate students Its interdisciplinary methodology and focus on the intersection between law and technology make it also relevant for philosophers and those interested in science and technology studies *Routledge Handbook of Space Law* Ram Jakhu, Paul Stephen Dempsey, 2016-11-10 This handbook is a reference work providing a comprehensive objective and comparative overview of Space Law The global space economy reached 330 billion in 2015 with a growth rate of 9 per cent vis vis the previous year Consequently Space Law is changing and expanding expeditiously especially at the national level More laws and regulations are being adopted by space faring nations while more countries are adapting their Space Laws and regulations related to activities in outer space More regulatory bodies are being created while more regulatory diversity from public law to private law is being instituted as increasing and innovative activities are undertaken by private entities which employ new technologies and business initiatives At the international level Space Law both hard law and soft law is expanding in certain areas especially in satellite broadcasting and telecommunications The Routledge Handbook of Space Law summarises the existing state of knowledge on

a comprehensive range of topics and aspires to set the future international research agenda by indicating gaps and inconsistencies in the existing law and highlighting emerging legal issues Unlike other books on the subject it addresses major international and national legal aspects of particular space activities and issues rather than providing commentary on or explanations about a particular Space Law treaty or national regulation Drawing together contributions from leading academic scholars and practicing lawyers from around the world the volume is divided into five key parts Part I General Principles of International Space Law Part II International Law of Space Applications Part III National Regulation of Space Activities Part IV National Regulation of Navigational Satellite Systems Part V Commercial Aspects of Space Law This handbook is both practical and theoretical in scope and may serve as a reference tool to academics professionals and policy makers with an interest in Space Law

Vitiating of Contractual Consent Peter MacDonald Eggers, 2016-09-13 The validity of a contract can be undermined by factors affecting contractual consent Issues of contractual validity frequently arise for consideration in all types of litigation not least commercial disputes This book provides practitioners and academics with an invaluable reference tool which will enable them to navigate the complex issues of vitiating of contract When contractual disputes arise there are a variety of vitiating factors which may be relied on to undermine a contract's validity This book provides a comprehensive examination of all the factors vitiating contractual consent from fraud misrepresentation non disclosure and mistake to duress undue influence unconscionable bargains and includes chapters on incapacity and unfairness Each chapter gives a thorough account of the law on each of these vitiating factors together with an overview of the remedies available The book's introduction considers the theoretical foundations of the law in this area The book will be an invaluable reference tool for lawyers involved in all types of contractual disputes It will also be a useful reference for academics and postgraduate students of commercial law
