Quality-Based Shelf Life of Perishable Foods Peter J. Taormina, Margaret D. Hardin, 2021-01-04 This book addresses the shelf life of foods a key factor in determining how food is distributed and consequently where and when different food products are available for consumption Shelf life is determined by several factors including microbiological chemical physical and organoleptic deterioration Often these factors are interrelated and interdependent The editors of this volume focus specifically on the microbial factors related to shelf life of perishable foods and food commodities This allows for more detailed coverage of foodborne bacterial pathogens and spoilage microorganisms of concern The initial part of the book covers the why and how of shelf life determination as well as the specific microbial pathogens and spoilage microorganisms of concern for perishable foods Contributors address topics such as the techniques utilized for determination of shelf life the frequency of shelf life testing for different products the interpretation of data to make shelf life determinations and management of shelf life of food products from the perspective of the food producer distributor retailer and regulator Three key areas impacting shelf life are addressed in detail sanitation processing and packaging The sanitation chapter explains the necessary components of cleaning and sanitizing to assure a hygienic processing environment and why that is critical to shelf life control Traditional processing procedures are reviewed and advanced processing technologies are explored Materials used in food packaging and the utilization of traditional and activated food packaging by product type are covered in detail The latter two chapters of the book delve into newer techniques of analysis and explore the microbiome of food products Implications of microbial ecology and microbial quantification in food products are discussed in chapters on genomics and in the changing dogma of meat shelf life The primary audience for this work includes food industry quality and food safety technicians managers directors and executives responsible for shelf life Academicians and governmental researchers involved in research and teaching about food safety and quality will also find the material relevant and useful *China Satellite Navigation Conference (CSNC) 2014 Proceedings: Volume I* Jiadong Sun, Wenhai Jiao, Haitao Wu, Mingquan Lu, 2014-04-22 China Satellite Navigation Conference CSNC 2014 Proceedings presents selected research papers from CSNC2014 held on 21-23 May in Nanjing China The theme of CSNC2014 is BDS Application Innovation Integration and Sharing These papers discuss the technologies and applications of the Global Navigation Satellite System GNSS and the latest progress made in the China BeiDou System BDS especially They are divided into 9 topics to match the corresponding sessions in CSNC2014 which broadly covered key topics in GNSS Readers can learn about the BDS and keep abreast of the

The Ruby Way Hal Fulton, André Arko, 2015-02-11 For more than a decade Ruby developers have turned to The Ruby Way for reliable how to guidance on effective Ruby programming Now Hal Fulton and Andr Arko have thoroughly updated this classic guide to cover new language enhancements and developers experiences through Ruby 2.1 The new edition illuminates Ruby 2.1 through 400 examples each answering the question How do I do this in Ruby For each example they present both a task description and realistic technical constraints Next they walk step by step through presenting one good solution offering detailed explanations to promote deeper understanding Conveniently organized by topic The Ruby Way Third Edition makes it easier than ever to find the specific solution you want and to write better code by reflecting Ruby's unique philosophy and spirit Coverage includes Ruby 2.1 overview terminology philosophy and basic principles Best practices for strings and regular expressions Efficiently internationalizing your code Performing calculations including trigonometry calculus statistics and time date calculations Working with Rubyesque objects such as symbols and ranges Using arrays hashes stacks queues trees graphs and other data structures Efficiently storing data with YAML JSON and SQLite3 Leveraging object oriented and dynamic features from multiple constructors to program inspection Building GUIs with Shoes 4 Ruby Tk Ruby GTK3 QtRuby and other toolkits Improving thread performance by understanding Ruby's synchronization methods and avoiding its pitfalls Automating system administration with Ruby Data formats JSON XML RSS Atom RMagick PDF and more Testing and debugging with RSpec Minitest Cucumber byebug and pry Measuring Ruby program performance Packaging and distributing code and managing dependencies with Bundler Network programming clients time servers POP SMTP IMAP Open URI Web applications HTTP servers Rails Sinatra HTML generation and more Writing distributed Ruby software with drb Choosing modern development tools that maximize your productivity All source code for this book may be downloaded at www.rubyhacker.com informit.com aw.informit.com ruby.rubyhacker.com therubyway.com therubyway.io

Astronomy in the Near-Infrared - Observing Strategies and Data Reduction Techniques Jochen Heidt, 2022-07-04 Near infrared astronomy has become one of the most rapidly developing branches in modern astrophysics Innovative observing techniques near infrared detectors with quantum efficiencies in excess of 90% highly specialised instruments as well as advanced data reduction techniques have allowed major breakthroughs in various areas like exoplanets star forming regions the supermassive black hole in the Galactic center and the high redshift Universe In this book the reader will be introduced to the basic concepts of how to prepare near infrared observations with maximized scientific return Equal weight is given to all aspects of the data reduction for both imaging and spectroscopy Information is also provided on the state of the art instrumentation available and planned on detector technology or the physics of the

atmosphere all of which influence the preparation and execution of observations and data reduction techniques The beginner but also the expert will find a lot of information in compact form which is otherwise widely dispersed across the internet or other sources Pro Android Wearables Wallace Jackson,2015-07-07 Pro Android Wearables details how to design and build Android Wear apps for new and unique Android wearable device types such as Google Android smartwatches which use the new WatchFaces API as well as health monitoring features and other cool features such as altimeters and compasses It s time to take your Android 5 Wear application development skills and experience to the next level and get exposure to a whole new world of hardware As smartwatches continue to grab major IoT headlines there is a growing interest in building Android apps that run on these wearables which are now being offered by dozens of major manufacturers This means more revenue earning opportunity for today s indie app developers Additionally this book provides new media design concepts which relate to using media assets as well as how to optimize Wear applications for low power single core dual core or quad core CPUs and how to use the IntelliJ Android Studio IDE and the Android device emulators for popular new wearable devices

Multistate Analysis of Life Histories with R Frans Willekens,2014-09-11 This book provides an introduction to multistate event history analysis It is an extension of survival analysis in which a single terminal event endpoint is considered and the time to event is studied Multistate models focus on life histories or trajectories conceptualized as sequences of states and sequences of transitions between states Life histories are modeled as realizations of continuous time Markov processes The model parameters transition rates are estimated from data on event counts and populations at risk using the statistical theory of counting processes The Comprehensive R Network Archive CRAN includes several packages for multistate modeling This book is about Biograph The package is designed to a enhance exploratory analysis of life histories and b make multistate modeling accessible The package incorporates utilities that connect to several packages for multistate modeling including survival eha Epi mvna mstate msm and TraMineR for sequence analysis The book is a hands on presentation of Biograph and the packages listed It is written from the perspective of the user To help the user master the techniques and the software a single data set is used to illustrate the methods and software It is the subsample of the German Life History Survey which was also used by Blossfeld and Rohwer in their popular textbook on event history modeling Another data set the Netherlands Family and Fertility Survey is used to illustrate how Biograph can assist in answering questions on life paths of cohorts and individuals The book is suitable as a textbook for graduate courses on event history analysis and introductory courses on competing risks and multistate models It may also be used as a self study book The R code used in the book is available online Frans Willekens is affiliated with the Max Planck Institute for Demographic Research MPIDR in Rostock Germany He is Emeritus Professor of Demography at the University of Groningen a Honorary Fellow of the Netherlands Interdisciplinary Demographic Institute NIDI in the Hague and a Research Associate of the International Institute for Applied Systems Analysis IIASA Laxenburg Austria He is a member of Royal Netherlands Academy of Arts and Sciences KNAW He

has contributed to the modeling and simulation of life histories mainly in the context of population forecasting Research Memorandum ,1947

Code as Creative Medium Golan Levin,Tega Brain,2021-02-02 An essential guide for teaching and learning computational art and design exercises assignments interviews and more than 170 illustrations of creative work This book is an essential resource for art educators and practitioners who want to explore code as a creative medium and serves as a guide for computer scientists transitioning from STEM to STEAM in their syllabi or practice It provides a collection of classic creative coding prompts and assignments accompanied by annotated examples of both classic and contemporary projects and more than 170 illustrations of creative work and features a set of interviews with leading educators Picking up where standard programming guides leave off the authors highlight alternative programming pedagogies suitable for the art and design oriented classroom including teaching approaches resources and community support structures **USAF Supply Manual: Base procedures** United States. The Technical and Social History of Software Engineering Capers Jones,2014 Pioneering software engineer Capers Jones has written the first and only definitive history of the entire software engineering industry Drawing on his extraordinary vantage point as a leading practitioner for several decades Jones reviews the entire history of IT and software engineering assesses its impact on society and previews its future One decade at a time Jones assesses emerging trends and companies winners and losers new technologies methods tools languages productivity quality benchmarks challenges risks professional societies and more He quantifies both beneficial and harmful software inventions accurately estimates the size of both the US and global software industries and takes on unexplained mysteries such as why and how programming languages gain and lose popularity Cabling Bill Woodward,2014-03-10 Develop the skills you need to design and build a reliable cost effective cabling infrastructure Fully updated for the growing demand of fiber optics for large scale communications networks and telecommunication standards this new edition is organized into two parts Part I covers LAN Networks and Cabling Systems offers comprehensive coverage on current cabling methodologies and is updated to the latest industry standards Part II addresses Fiber Optic Cabling and Components probes deeper into fiber optics and can be used to prepare for the Fiber Optics Installer FOI and or Fiber Optics Technician FOT certifications two of the Electronic Technician s Association s leading certifications Explains why cutting corners is a bad idea Walks you through the obstacles to high speed data transfer Encourages you to follow the golden rules of cabling This new edition is the only book you need for current cabling methodologies and standards

Satellite Communications, Fifth Edition Dennis Roddy,Jones Linwood,David G. Long,2024-02-02 An updated accessible guide to satellite communications fundamentals and new developments This thoroughly revised classic guide to satellite communications provides in depth textbook style coverage combined with an intuitive low math approach The book covers the latest breakthroughs in global wireless applications digital television and Internet access via satellite Filled with worked out examples and more than 200 illustrations the new edition offers a clear

state of the art presentation of all satellite communications topics Written by two experienced electrical engineering professors Satellite Communications Fifth Edition fully aligns with the objectives of undergraduate and graduate courses in RF Microwave communications with training for the needs of the aerospace industry and federal government agencies in mind Readers will explore orbits and launching methods satellite and ground SATCOM systems radio wave propagation antennas analog and digital signals link analysis and error control coding Expanded to emphasize calculations of signal to noise ratio SNR and the importance of SNR calculation losses Ancillary suite includes homework problems with solutions manual PowerPoint slides and a series of video lectures Written by three scholars each with over 40 years of experience

ISPF Programmer's Guide Franz Lanz, 2015-11-13 This book is intended to support ISPF application programmers to become professional in the smart programming of ISPF applications using the REXX language The contents are presented in a modular manner to suit reading with heterogeneous ISPF programming knowledge The following topics are covered Introduction to the programming language REXX as well as to ISPF programming data processing in ISPF applications use of messages panels skeletons tables ISPF variables and an introduction to creating and applying edit macros Each theme is vividly illustrated by programming examples The Smart ISPF Utilities contain some very useful programming aids that are often useful when programming ISPF applications The book serves as a textbook as well as a manual for daily work Many cross references are included as well as an extensive index Moreover the author gives many helpful hints and tips on smart ISPF programming practices The Smart ISPF Utilities contain many useful programming aids **Climate Risk**

Management in Agriculture U. C. Mohanty, Palash Sinha, M. M. Nageswara Rao, Dillip Kumar Swain, K. K. Singh, 2024-07-12 Sustainable agricultural production is vital for food security and agricultural productivity It is greatly influenced by weather and climate conditions This book focuses on understanding weather and climate systems and crop yield productions including integrated weather crop prediction systems for climate risk management in agriculture It examines the impact of climate change and its variability on different crops and possible ways to minimize the loss for farmers This book also describes different weather and climate hazards including the fundamentals of weather climate prediction systems and numerical weather prediction NWP models It presents the need for seamless weather climate predictions and their impact on agriculture The status and availability of different monthly and seasonal scale forecasts worldwide is explored and how the forecasting models or products can be evaluated using statistical methods The book concisely elucidates systematic model bias removal techniques and a reliable approach based on multi statistics in producing a single forecast from the multi model grand ensemble Since crop models need daily weather sequence several standard disaggregation methods for generating daily weather sequences from monthly seasonal products are presented This book describes several aspects that are needed for agricultural practices and crop modelling It encapsulates different components of crop models and their application preparation methods of Crop Weather Calendar application of disaggregated weather sequence in crop models and

generation of Climate Risk Matrices CRM A detailed methodology is presented for hands on practice including downloading and processing data model evaluation and bias corrections generating a single forecast disaggregation and preparing CRM based on crop model products This book contains a total 11 chapters and appeals to students researchers scientists and operational agencies

Moral Codes Alan F. Blackwell, 2024-08-06 Why the world needs less AI and better programming languages Decades ago we believed that robots and computers would take over all the boring jobs and drudgery leaving humans to a life of leisure This hasn't happened Instead humans are still doing boring jobs and even worse AI researchers have built technology that is creative self aware and emotional doing the tasks humans were supposed to enjoy How did we get here In *Moral Codes* Alan Blackwell argues that there is a fundamental flaw in the research agenda of AI What humanity needs Blackwell argues is better ways to tell computers what we want them to do with new and better programming languages More Open Representations Access to Learning and Control Over Digital Expression in other words MORAL CODE Blackwell draws on his deep experiences as a programming language designer which he has been doing since 1983 to unpack fundamental principles of interaction design and explain their technical relationship to ideas of creativity and fairness Taking aim at software that constrains our conversations with strict word counts or infantilizes human interaction with likes and emojis Blackwell shows how to design software that is better not more efficient or more profitable but better for society and better for all people Covering recent research and the latest smart tools Blackwell offers rich design principles for a better kind of software and a better kind of world
