**The June 1967 Arab-Israeli Six-Day War** Tom Cooper, Efim Sandler, 2024-01-20 In June 1967 Israel which seemed on the verge of being annihilated by its Arab neighbors took six days to redraw the Middle Eastern strategic map in one of the most dramatic reversals of fortune in modern times The success was over a decade in the making following the Suez Crisis with the Israeli forces being radically changed to create an army and air force upon which the country would rely when it became obvious the international community would take no action to implement guarantees made after the events of 1956 The Israeli forces were honed in low level clashes during the 1960s notably the Water Wars which the Israelis did so much to provoke By contrast the Arab forces became complacent largely due to supplies of arms from the Warsaw Pact states With proper training this complacency could have been turned into military effectiveness but the Arab forces were plagued by internal rivalries and high commands too often depending upon politically reliable officers rather than those who were militarily effective The Egyptian forces were further undermined by their commitment to the debilitating Yemen Civil War which meant they were in no condition to confront Israel Syria and Jordan whose forces could not fight the Israelis alone complained loudly about President Nasser's lack of action against Israel Nasser's decision in early 1967 to regain the prestige he had lost since the heady days of the Suez Crisis

with a demonstration in the Sinai Peninsula was interpreted by the Israelis as preparations for an invasion Nasser did nothing to persuade them otherwise and when it was clear the international community would do nothing the Israelis decided to strike Egypt and in turn Syria and Jordan The Israeli campaign was heralded by a massive surprise air attack first on the Egyptians and then on the other neighboring states and ground offensives then followed in succession Volume 1 of The June 1967 Arab Israeli Six Day War provides an in depth background to the long running confrontation between Arab and Jew in the Middle East a detailed overview of the rival air forces that would become embroiled in the conflict and an account of the opening Israeli air strikes against Egyptian targets This volume is illustrated throughout with original photographs and includes specially commissioned full color aircraft profiles

**Graffiti and Street Art** Konstantinos Avramidis, Myrto Tsilimpounidi, 2016-12-08 Graffiti and street art images are ubiquitous and they enjoy a very special place in collective imaginary due to their ambiguous nature Sometimes enigmatic in meaning often stylistically crude and aesthetically aggressive yet always visually arresting they fill our field of vision with texts and images that no one can escape As they take place on surfaces and travel through various channels they provide viewers an entry point to the subtext of the cities we live in while questioning how we read write and represent them This book is structured around these three distinct albeit by definition interwoven key frames The contributors of this volume critically investigate underexplored urban contexts in which graffiti and street art appear shed light on previously unexamined aspects of these practices and introduce innovative methodologies regarding the treatment of these images Throughout the focus is on the relationship of graffiti and street art with urban space and the various manifestations of these idiosyncratic meetings In this book the emphasis is shifted from what the physical texts say to what these practices and their produced images do in different contexts All

chapters are original and come from experts in various fields such as Architecture Urban Studies Sociology Criminology Anthropology and Visual Cultures as well as scholars that transcend traditional disciplinary frameworks This exciting new collection is essential reading for advanced undergraduates as well as postgraduates and academics interested in the subject matter It is also accessible to a non academic audience such as art practitioners and policymakers alike or anyone keen on deepening their knowledge on how graffiti and street art affect the ways urban environments are experienced understood and envisioned

**Kosovo, Intervention and Statebuilding** Aidan Hehir, 2010-01-21 This book examines international engagement with Kosovo since NATO's intervention in 1999 and looks at the three distinct phases of Kosovo's development: intervention, statebuilding, and independence. Kosovo remains a case study of central importance in international relations, illustrative of key political trends in the post-Cold War era. During each phase, international policy towards Kosovo has challenged prevailing international norms and pushed the boundaries of conventional wisdom. In each of the three phases, Kosovo has been cited as constituting a precedent, and this book explores the impact and the often troubling consequences and implications of these precedents. This book explicitly engages with this debate, which transcends Kosovo itself, and provides a critical analysis of the catalysts and consequences of contemporary international engagement with this seminal case study. Each chapter focuses on a particular aspect of the international engagement with Kosovo and situates events there in an international context, highlighting the extent to which international policy towards Kosovo has challenged existing norms and practices. Kosovo has been cited in certain texts as a positive template to be emulated, but the contributors to this book also identify the often controversial and contentious nature of these new norms. This book will be of much interest to students of humanitarian intervention and statebuilding, war and conflict studies, security studies, and IR in general. Aidan Hehir is a Senior Lecturer in International Relations at the Department of Politics and International Relations, University of Westminster.

Lattimore, Beth M. Huebner, Faye S. Taxman, 2020-11-10 This volume addresses major issues and research in corrections and sentencing, with the goal of using previous research and findings as a platform for recommendations about future research, evaluation, and policy. The last several decades witnessed major policy changes in sentencing and corrections in the United States, as well as considerable research to identify the most effective strategies for addressing criminal behavior. These efforts included changes in sentencing that eliminated parole and imposed draconian sentences for violent and drug crimes. The federal government, followed by most states, implemented sentencing guidelines that greatly reduced the discretion of the courts to impose sentences. The results were a multifold increase in the numbers of individuals in jails and prisons, and on community supervision, increases that have only recently crested. There were also efforts to engage prosecutors and the courts in diversion and oversight, including the development of prosecutorial diversion programs, as well as a variety of specialty courts. Penal reform has included efforts to understand the transitions from prison to the community, including federal-led efforts focused on reentry programming. Community corrections reforms have ranged from increased surveillance through drug testing, electronic monitoring, and in some cases, judicial oversight, to rehabilitative

efforts driven by risk and needs assessment More recently the focus has included pretrial reform to reduce the number of people held in jail pending trial efforts that have brought attention to the use of bail and its disproportionate impact on people of color and the poor This collection of chapters from leading researchers addresses a wide array of the latest research in the field A unique approach featuring responses to the original essays by active researchers spurs discussion and provides a foundation for developing directions for future research and policymaking
