proceedings of the 8th International ICST Conference TridentCom 2012 held in Thessanoliiki Greece in June 2012 Out of numerous submissions the Program Committee finally selected 51 full papers These papers cover topics such as future Internet testbeds wireless testbeds federated and large scale testbeds network and resource virtualization overlay network testbeds management provisioning and tools for networking research and experimentally driven research and user experience evaluation **Trends in Functional Programming** Hans Wolfgang Loidl,Ricardo Peña,2013-08-13 This book

constitutes the thoroughly refereed revised selected papers of the 13th International Symposium on Trends in Functional Programming TFP 2012 held in St Andrews Scotland UK in June 2012 The 18 revised full papers included in this volume were carefully and selected from 49 submissions and are complemented with an invited paper They cover various aspects of trends in functional programming **Your Library Is the Answer** Christina T. Russo,Cathy Swan,2015-01-22 Today s tech savvy

and digitally connected students present a new challenge for today s school librarians This book offers the 21st century tools and know how necessary for educators to appeal to and challenge students to learn and to want to learn What are the best

ways to motivate students to become engaged and develop a passion for learning Can appealing to their desire for socialization and constant communication attributes of their lives outside of education via the integration of cutting edge technologies and new media in the library or classroom serve to ignite creativity curiosity and critical thinking This book shows how you can make use of non traditional tools such as popular social networks collaborative technologies and cloud computing to teach information and communications technologies integrated with the school curriculum to improve student learning and demonstrates how these same technologies can help you measure skills and mastery learning The book provides an easy to follow blueprint for using collaborative techniques innovation and teaching for creativity to achieve the new learning paradigm of self directed learning such as flipping the classroom or library Readers of this book will find concrete step by step examples of proven lesson plans collaborative models and time saving strategies for the successful integration of American Association of School Librarians AASL standards The authors both award winning teachers explain the quantitatively and qualitatively measurable educational value of using these technologies for core curricular and information and communications technologies instruction showing that they both enhance student learning outcomes and provide data for measuring their impact on learning *Advances in Computational Intelligence* Ildar Batyrshin,Miguel González Mendoza,2013-03-21 The two volume set LNAI 7629 and LNAI 7630 constitutes the refereed proceedings of the 11th Mexican International Conference on Artificial Intelligence MICA 2012 held in San Luis Potos Mexico in October November 2012 The 80 revised papers presented were carefully reviewed and selected from 224 submissions The second volume includes 40 papers focusing on soft computing The papers are organized in the following topical sections natural language processing evolutionary and nature inspired metaheuristic algorithms neural networks and hybrid intelligent systems fuzzy systems and probabilistic models in decision making **The Functional Anatomy of the Reticular Formation** Ugo Faraguna,Michela Ferrucci,Filippo S. Giorgi,Francesco Fornai,2019-10-04 The brainstem reticular formation is the archaic core of ascending and descending pathways connecting the brain with spinal cord After the pioneer description of the activating role of the ascending reticular activating system by Moruzzi and Magoun in 1949 an increasing number of studies have contributed to disclose the multifaceted roles of this brain area In fact the brainstem reticular formation sub serves a variety of brain activities such as the modulation of the sleep waking cycle the level of arousal and attention the drive for novelty seeking behaviors and mood Meanwhile descending pathways play a key role in posture modulation extrapyramidal movements and autonomic functions such as breathing and blood pressure Moreover both descending and ascending fibers of the reticular formation are critical in gating the sensory inputs and play a critical role in pain modulation and gaze control All these activities are impaired when a damage affects critical nuclei of the reticular formation Remarkably in neurodegenerative diseases involving reticular nuclei the rich collaterals interconnecting reticular isodendritic neurons represent a gateway for disease spreading placing the role of the reticular nuclei as a pivot in a variety of brain disorders The

present Research Topic is an updated collection of recent studies which contribute to define the systematic anatomy of the reticular formation its physiological and pharmacological features as well as its involvement in neurodegenerative disorders and neuroprotection

Dynamics and Evolution of Minor Bodies with Galactic and Geological Implications S.V.M. Clube, Shin Yabushita, Jacques Henrard, 2012-12-06 Minor bodies in the Solar System though representing only a small fraction of the mass in the Solar System may well play a fundamental role in terrestrial evolution This book contains investigations of the dynamics and physics of comets asteroids and meteor streams and the rather controversial topic of periodic phenomena in the Solar System as signified by geological records together with several associated developments in celestial dynamics All these problems are interwoven This book makes a contribution towards unravelling the nature of the interactions between the Earth and its celestial environment

Handbook of College and University Teaching James E. Groccia, Mohammed A. T. Alsudairi, William Buskist, 2012-01-17 Handbook of College and University Teaching A Global Perspective presents international perspectives on critical issues impacting teaching and learning in diverse higher education environments all with a unique global view The need to understand learning and teaching from multiple cultural perspectives has become critically important in educating the next generation of college students Education experts from around the world share their perspectives on college and university teaching illuminating international differences and similarities The chapters are organized around a model developed by James Groccia which focuses on seven interrelated variables including teacher learner learning process learning context course content instructional processes and learning outcomes Using this logical model as the organizational structure of the book provides a guide for systemic thinking about what actions one should take or suggest others take when planning activities to improve teaching and learning curriculum development and assessment

Spatial Price Equilibrium: Advances in Theory, Computation and Application Patrick T. Harker, 2012-12-06 The problem of predicting interregional commodity movements and the regional prices of these commodities has intrigued economists geographers and operations researchers for years In 1838 A A Cournot 1838 discussed the equilibrium of trade between New York and Paris and noted how the equilibrium prices depended upon the transport costs Enke 1951 recognized that this problem of predicting interregional flows and regional prices could be formulated as a network problem and in 1952 Paul Samuelson 1952 used the then recent advances in mathematical programming to formalize the spatial price equilibrium problem as a nonlinear optimization problem From this formulation Takayama and Judge 1964 derived their quadratic programming representation of the spatial price equilibrium problem which they and other scholars then applied to a wide variety of problem contexts Since these early beginnings the spatial price equilibrium problem has been widely studied extended and applied the paper by Harker 1985 reviews many of these results In recent years there has been a growing interest in this problem as evidenced by the numerous publications listed in Harker 1985 The reasons for this renewed interest are many First new applications of this concept have arisen which

challenge the theoretical underpinnings of this model The spatial price equilibrium concept is founded on the assumption of perfect or pure competition The applications to energy markets steel markets etc have led scholars to rethink the basic structure of this model

Logic from Computer Science Yiannis N. Moschovakis, 2012-12-06 The volume is the outgrowth of a workshop with the same title held at MSRI in the week of November 13 17 1989 and for those who did not get it Logic from Computer Science is the converse of Logic in Computer Science the full name of the highly successful annual LICS conferences We meant to have a conference which would bring together the LICS community with some of the more traditional mathematical logicians and where the emphasis would be on the flow of ideas from computer science to logic rather than the other way around In a LICS talk sometimes the speaker presents a perfectly good theorem about say the λ -calculus or finite model theory in terms of its potential applications rather than its often more obvious intrinsic foundational interest and intricate proof This is not meant to be a criticism the LICS meetings are after all organized by the IEEE Computer Society We thought for once it would be fun to see what we would get if we asked the speakers to emphasize the relevance of their work for logic rather than computer science and to point out what is involved in the proofs I think mostly it worked In any case the group of people represented as broad a selection of logicians as I have seen in recent years and the quality of the talks was in my view exceptionally unusually high I learned a lot and I think others did too

Applied Parallel and Scientific Computing Kristján Jónasson, 2012-02-16 The two volume set LNCS 7133 and LNCS 7134 constitutes the thoroughly refereed post conference proceedings of the 10th International Conference on Applied Parallel and Scientific Computing PARA 2010 held in Reykjavík Iceland in June 2010 These volumes contain three keynote lectures 29 revised papers and 45 minisymposia presentations arranged on the following topics cloud computing HPC algorithms HPC programming tools HPC in meteorology parallel numerical algorithms parallel computing in physics scientific computing tools HPC software engineering simulations of atomic scale systems tools and environments for accelerator based computational biomedicine GPU computing high performance computing interval methods real time access and processing of large data sets linear algebra algorithms and software for multicore and hybrid architectures in honor of Fred Gustavson on his 75th birthday memory and multicore issues in scientific computing theory and praxis multicore algorithms and implementations for application problems fast PDE solvers and a posteriori error estimates and scalable tools for high performance computing

The Professionalization of Intelligence Cooperation A. Svendsen, 2012-08-30 An insightful exploration of intelligence cooperation officially known as liaison including its international dimensions This book offers a distinct understanding of this process valuable to those involved in critical information flows such as intelligence risk crisis and emergency managers

Astrobiology Julian Chela-Flores, Guillermo A. Lemarchand, John Oró, 2012-12-06 The general topic of this book concerns the origin evolution distribution and destiny of life in the Universe It discusses the transition from inert matter to cellular life and its evolution to fully developed intelligent beings and also the possibility of life occurring

elsewhere particularly in other environments in our own and other solar systems The theoretical framework of Astrobiology may be probed with a forthcoming series of space missions which at the time of writing are being planned for the next 10 to 15 years Advanced extraterrestrial life can also be probed by means of radioastronomy in the well established project of search for extraterrestrial intelligence Astrobiology pays special attention to the robust growth in our capacity to search for microorganisms as well as signals of extraterrestrial life with recent significant technological progress in planetary science and radioastronomy The progress of the main space agencies is highlighted Audience This volume is aimed at advanced undergraduate and graduate students as well as researchers in the many areas of basic earth and life sciences that contribute to the study of chemical evolution and the origin of life

Mathematical Programming The State of the Art

A. Bachem, M. Grötschel, B. Korte, 2012-12-06 In the late forties Mathematical Programming became a scientific discipline in its own right Since then it has experienced a tremendous growth Beginning with economic and military applications it is now among the most important fields of applied mathematics with extensive use in engineering natural sciences economics and biological sciences The lively activity in this area is demonstrated by the fact that as early as 1949 the first Symposium on Mathematical Programming took place in Chicago Since then mathematical programmers from all over the world have gathered at the international symposia of the Mathematical Programming Society roughly every three years to present their recent research to exchange ideas with their colleagues and to learn about the latest developments in their own and related fields In 1982 the XI International Symposium on Mathematical Programming was held at the University of Bonn W Germany from August 23 to 27 It was organized by the Institut für Ökonometrie und Operations Research of the University of Bonn in collaboration with the Sonderforschungsbereich 21 of the Deutsche Forschungsgemeinschaft This volume constitutes part of the outgrowth of this symposium and documents its scientific activities Part I of the book contains information about the symposium welcoming addresses lists of committees and sponsors and a brief review about the Fulkerson Prize and the Dantzig Prize which were awarded during the opening ceremony

New Trends in Software Methodologies, Tools and Techniques Hamido Fujita, Roberto Revetria, 2012 Software is the essential enabling means for science and the new economy It helps us to create a more reliable flexible and robust society But software often falls short of our expectations Current methodologies tools and techniques remain expensive and are not yet sufficiently reliable while many promising approaches have proved to be no more than case by case oriented methods This book contains extensively reviewed papers from the eleventh International Conference on New Trends in software Methodology Tools and Techniques SoMeT_12 held in Genoa Italy in September 2012 The conference provides an opportunity for scholars from the international research community to discuss and share research experiences of new software methodologies and techniques and the contributions presented here address issues ranging from research practices and techniques and methodologies to proposing and reporting solutions for global world business The emphasis has been on human centric software methodologies end user development techniques and emotional reasoning for an optimally harmonized performance between the design tool and the user Topics covered include the handling of cognitive issues in software development to adapt it to the user's mental state and intelligent software design in software utilizing new aspects on conceptual ontology and semantics reflected on knowledge base system models This book provides an opportunity for the software science community to show where we are today and where the future may take us

New Frontiers in Artificial Intelligence Takashi Onoda, Daisuke Bekki, Eric Mc Cready, 2012-01-10 This book constitutes the thoroughly refereed post proceedings of four workshops held as satellite events of the JSAI International Symposia on Artificial Intelligence 2010 in Tokyo Japan in November 2010 The 28 revised full papers with four papers for the following four workshops presented were carefully reviewed and selected from 70 papers The papers are organized in sections Logic and Engineering of Natural Language Semantics LENLS Juris Informatics JURISIN Advanced Methodologies for Bayesian Networks AMBN and Innovating Service Systems ISS

Race, Riots, and Roller Coasters Victoria W. Wolcott, 2012-08-16 Throughout the twentieth century African Americans challenged segregation at amusement parks swimming pools and skating rinks not only in pursuit of pleasure but as part of a wider struggle for racial equality Well before the Montgomery bus boycott mothers led their children into segregated amusement parks teenagers congregated at forbidden swimming pools and church groups picnicked at white only parks But too often white mobs attacked those who dared to transgress racial norms In *Race Riots and Roller Coasters* Victoria W Wolcott tells the story of this battle for access to leisure space in cities all over the United States Contradicting the nostalgic image of urban leisure venues as democratic spaces Wolcott reveals that racial segregation was crucial to their appeal Parks pools and playgrounds offered city dwellers room to exercise relax and escape urban cares These gathering spots also gave young people the opportunity to mingle flirt and dance As cities grew more diverse these social forms of fun prompted white insistence on racially exclusive recreation Wolcott shows

how black activists and ordinary people fought such infringements on their right to access public leisure In the face of violence and intimidation they swam at white only beaches boycotted discriminatory roller rinks and picketed Jim Crow amusement parks When African Americans demanded inclusive public recreational facilities white consumers abandoned those places Many parks closed or privatized within a decade of desegregation Wolcott s book tracks the decline of the urban amusement park and the simultaneous rise of the suburban theme park reframing these shifts within the civil rights context Filled with detailed accounts and powerful insights *Race Riots and Roller Coasters* brings to light overlooked aspects of conflicts over public accommodations This eloquent history demonstrates the significance of leisure in American race relations
