June 2013 Grade 11 Geography Paper 1:

Food and Media Jonatan Leer, Karen Klitgaard Povlsen, 2016-06-17 Food is everywhere in contemporary mediascapes as witnessed by the increase in cookbooks food magazines television cookery shows online blogs recipes news items and social media posts about food This mediatization of food means that the media often interplays between food consumption and everyday practices between private and political matters and between individuals groups and societies This volume argues that contemporary food studies need to pay more attention to the significance of media in relation to how we do food Understanding food media is particularly central to the diverse contemporary social and cultural practices of food where media use plays an increasingly important but also differentiated and differentiating role in both large scale decisions and most people's everyday practices The contributions in this book offer critical studies of food media discourses and of media users interpretations negotiations and uses that construct places and spaces as well as possible identities and everyday practices of sameness or otherness that might form new or renew old food politics

A University Education David Willetts, 2017-11-17 Universities have a crucial role in the modern world In England entrance to universities is by nation wide competition which means English universities have an exceptional influence on schools a striking theme of the book This important book first investigates the university as an institution and then tracks the individual on their journey to and through university In *A University Education* David Willetts presents a compelling case for the ongoing importance of the university both as one of the great institutions of modern society and as a transformational experience for the individual The book also makes illuminating comparisons with higher education in other countries especially the US and Germany Drawing on his experience as UK Minister for Universities and Science from 2010 to 2014 the author offers a powerful account of the value of higher education and the case for more expansion He covers controversial issues in which he was involved from access for disadvantaged students to the introduction of 9 000 fees The final section addresses some of the big questions for the future such as the the relationship between universities and business especially in promoting innovation He argues that the two great contemporary trends of globalisation and technological innovation will both change the university significantly This is an authoritative account of English universities setting them for the first time in their new legal and regulatory framework

Planning and Design for Sustainable Urban Mobility Un-Habitat, 2013-10-30 Urban transport systems worldwide are faced by a multitude of challenges Among the most visible of these are the traffic gridlocks experienced on city roads and highways all over the world The prescribed solution to transport problems in most cities has thus been to build more infrastructures for cars with a limited number of cities improving public transport systems in a sustainable manner However a number of challenges faced by urban transport systems such as greenhouse gas emissions noise and air pollution and road traffic accidents do not necessarily get solved by the construction of new infrastructure *Planning and Design for Sustainable Urban Mobility* argues that the development of sustainable urban transport systems requires a conceptual leap

The purpose of transportation and mobility is to gain access to destinations activities services and goods Thus access is the ultimate objective of transportation As a result urban planning and design should focus on how to bring people and places together by creating cities that focus on accessibility rather than simply increasing the length of urban transport infrastructure or increasing the movement of people or goods Urban form and the functionality of the city are therefore a major focus of this report which highlights the importance of integrated land use and transport planning This new report of the United Nations Human Settlements Programme UN Habitat the world s leading authority on urban issues provides some thought provoking insights and policy recommendations on how to plan and design sustainable urban mobility systems The Global Report on Human Settlements is the most authoritative and up to date global assessment of human settlements conditions and trends Preceding issues of the report have addressed such topics as Cities in a Globalizing World The Challenge of Slums Financing Urban Shelter Enhancing Urban Safety and Security Planning Sustainable Cities and Cities and Climate Change

Local Experiences of Mining in Peru Gerardo Castillo Guzmán,2020-02-05 This book uses a multimethod approach to examine local experience of contemporary mining development in the Peruvian Andes creating an understanding of the transformations that rural societies experience in this context Mining is a major component of economic growth in many resource endowed countries whilst also causing mixed social cultural and environmental effects Most current literature on contemporary mining in Peru is largely focussed on conflict however in this text the author takes a differing approach by examining the experiences of families in the vicinity of Rio Tinto s La Granja exploration copper project Northern Peru an area with great significance due to the mining investment and development which has taken place over the past 25 years The book first provides a critical discussion about production of space theories and debates on spatial mobility highlighting their relevance to understanding large scale mining developments especially in the Peruvian Andes The following chapters analyze spatial transformations mining development has prompted focusing on four axes access to space production mobility and representations of space A comprehensive narrative is constructed drawing on diverse voices and perspectives including those of family heads and their partners local leaders company employees and social scientists The book concludes by discussing how the findings challenge some of the current accounts of the social effects of mining development on rural communities and pose significant implications for sustainable development programs and place based practices By taking an interdisciplinary approach this book will appeal to a wide audience including geographers social anthropologists and social scientists interested in the social effects of mining as well as researchers interested in current Latin American Studies and Rural Development
