

Reaction Rates and Chemical Equilibrium

18

A. Factors That Affect the Rate of a Reaction

A.1 Effect of Temperature

Test Tube	Temperature (3)	Observations (4)
1.	6.8°C	Some bubbling
2.	57.4°C	Many bubbles and fizzing

Which test tube cleared first (4)?

Q1 How did an increase in temperature affect the rate of a reaction?

As temperature increases, rate of reaction increases. An increase in temperature will raise average kinetic energy of the reactant molecules. Therefore, a greater proportion of molecules will have the minimum energy necessary for an effective collision and maximize the rate of reaction.

A.2 Effect of Changing Reactant Concentration

Test Tube	Concentration of HCl	Initial time (2)	Final time (3)	Total time (3) - (2)
1.	1.0 M HCl	0		206 s
2.	2.0 M HCl	0		113 s
3.	3.0 M HCl	0		30 s

Didier Musso

Lab Report On Reaction Rates And Equilibrium:

Reaction Rates for High-temperature Air with Carbon and Sodium Impurities Mina L. Carnicom, 1968 The values used by a number of investigators for the rate constants of high temperature greater than or equal to 1000 K homogeneous gaseous reactions involving species of the elements nitrogen oxygen carbon and sodium have been compiled and are presented in tabular form Included are reactions involving neutral species charged species free electrons some species in excited electronic or vibrational states and radiative processes

The High Temperature Aspects of Hypersonic Flow Wilbur C. Nelson, 2014-12-02 The High Temperature Aspects of Hypersonic Flow is a record of the proceedings of the AGARD NATO Specialists Meeting held at the Technical Centre for Experimental Aerodynamics Rhode Saint Genese Belgium in April 1962 The book contains the papers presented during the meeting that tackled a broad range of topics in the aspects of hypersonic flow The subjects covered during the meeting include pressure measurements interference effects the use of wind tunnels in aircraft development testing high temperature gas characteristics boundary layer research stability and control and the use of rocket vehicles in flight research Aerospace engineers and aeronautical engineers will find the book invaluable

Laboratory Manual for Principles of General Chemistry J. A. Beran, Mark Lassiter, 2022-08-16 Laboratory Manual for Principles of General Chemistry 11th Edition covers two semesters of a general chemistry laboratory program The material focuses on the lab experiences that reinforce the concepts that not all experimental conclusions are the same and depend on identifying an appropriate experimental procedure selecting the proper apparatus employing the proper techniques systematically analyzing and interpreting the data and minimizing inherent variables As a result of good data a scientific and analytical conclusion is made which may or may not be right but is certainly consistent with the data Experiments write textbooks textbooks don't write experiments A student's scientific literacy grows when experiences and observations associated with the scientific method are encountered Further experimentation provides additional cause effect observations leading to an even better understanding of the experiment The 11th edition's experiments are informative and challenging while offering a solid foundation for technique safety and experimental procedure The reporting and analysis of the data and the pre and post lab questions focus on the intuitiveness of the experiment The experiments may accompany any general chemistry textbook and are compiled at the beginning of each curricular unit An Additional Notes column is included in each experiment's Report Sheet to provide a space for recording observations and data during the experiment Continued emphasis on handling data is supported by the Data Analysis section
