Introduction

The process of identifying bacteria is like solving a mystery; all requiring is to identify the clues. Each clue will offer possibility to solve the puzzle. Bacteria were among the first life forms on Earth and are present all around from the bottom of the ocean to inside the human body. Bacteria come in all shapes and sizes. Although only a few micrometers in length, bacteria can still be examined through the use of a simple light microscope. The varying characteristics of bacteria play a crucial function in their identification (Hogan, 2010).

There are multiple laboratory techniques such as streak isolation, Gram staining, Catalase, or Simmon's Citrate that can be used to identify a bacteria. For
