Labor Economics in an Islamic Framework Toseef Azid, Umar Burki, Muhammad Junaid Khawaja, Nasim Shah Shirazi, Muhammad Tahir, 2021-12-30 The labor market in Islam is governed by the Islamic laws of fairness justice and reward that is equivalent to the job done Most of the literature in the field discusses the normative aspect of the labor market whereas few attempts can be seen to address more positive aspects There is a need for new theoretical and empirical models for the Islamic labor market which should differ from established approaches This book provides a comprehensive overview of the nature scope and dimensions of the labor market in an Islamic context from both theoretical and practical perspectives It presents and discusses labor economics and then compares the similarities and differences between conventional and Islamic views of the labor market explaining where they meet and critically justifying why they differ under the umbrella of Shari'ah The book raises pertinent issues which it analyzes from both standpoints and widens the discourse to include norms morality and related institutions such as social security and welfare A unique feature of the book is that it examines labor economics practices among a specific group of countries and studies the labor conditions within these countries where the majority of the population follow the teachings of Islam in their daily lives The book proposes practical strategies for the development of new models for the Islamic labor market which are compatible with the modern world The book will enable academics and practitioners of Islamic economics to make economic sense of Shari'ah compliance and human resource development

Political Economy for Human Rights Manuel Couret Branco, 2019-06-05 Over time there has been a miscommunication between mainstream economics and human rights that has paved the way to a justificatory ideology that validates the submission of human rights to the logic of market capitalism This book shows how the discourse of mainstream economics is intrinsically opposed to the strengthening of human rights and outlines the principles upon which a human rights based political economy can be built Considering a variety of recognized human rights such as the right to water and sanitation the right to social security the right to work cultural freedom and democracy this book describes how mainstream economics theory conflicts with these rights and explores alternative modes

of thinking that incorporate human rights concerns into economics Moreover the book also reflects on the teaching of political economy for human rights It sets out that a political economy favourable to human rights must be pluralist interdisciplinary participatory de commodified non utilitarian and non consequentialist The author proposes that it must not only assume the performative character of economics but also and especially its transformative purpose Political Economy for Human Rights will offer students academics activists and policy makers useful tools to understand some of the main contradictions of contemporary societies and new paths leading to a more just and fraternal world It will also be of great interest to the general public concerned with human rights and economic issues

Learning Basic Macroeconomics Hal W. Snarr, 2014-10-31 Economics has been dubbed the dismal science since Thomas Carlyle coined the phrase in 1849 The 2008 presidential candidate who said Economics is something that I've really never understood probably sides with this view So why is economics so dismal to so many Is it because it has become too mathematical Is it because traditional textbooks fail to connect topics and models in a concise cohesive and meaningful way Is it because the computer simulations that are used to teach economic principles stifle students imagination contribute to a dependent learning style and fail to stimulate interest in the subject matter Wetzstein 1988 Or is it because economists from different schools of economic thought rarely agree on anything This book uses MAPLE and the simulation models that I developed in Learning Basic Macroeconomics 2014 to make teaching or learning economics more favorable MAPLE is ideally suited for this because it allows users to assemble and systematically combine the various models that form the aggregate market model frees users from doing tedious calculations and algebraic manipulations and is as easy to use as Microsoft WORD Building and analyzing the macroeconomic model using MAPLE is a fun way to learn the dismal science of economics

Three Worlds of Labour Economics Garth L. Mangum,P. Philips,2016-07-08 First Published in 1988 More than ever before the economics profession is divided among three competing schools of thought Especially in labor economics neoclassical institutional and radical perspectives contend each approaching its analysis of issues from different world views and separate sets of assumptions This book presents four issues in labor economics income distribution racial discrimination comparable worth and the international division of labor Employment Equity and Affirmative Action: An International Comparison Harish C. Jain,Peter Sloane,Frank Horwitz,2015-03-27 The authors of this comparative study of affirmative action compare the employment practices of six countries the U S Canada Great Britain Northern Ireland India Malaysia and South Africa They look at mandatory quota policies legislated versus voluntary policies goals and timetables restrictions and other policies as well as recruitment selection compensation performance appraisal promotion training and career development Their findings will prove useful for training managers of companies with global operations **Conceptual Economics: The Liaising Role In Politics And Social Sciences** Kui-wai Li,2021-01-18 Given that there is no shortage of economic theories while economic problems are growing periodically Conceptual Economics boldly attempts to initiate a new approach by employing conceptual and intuitive tools to examine the intra relationship between microeconomics and macroeconomics as well as the inter relationship between economic analysis and other social science studies especially the relationship with political science The few intuitive ideas include the separation between ex ante situations and ex post outcomes the difference between endowment differences and unequal outcomes and the role of economics as a vehicle in the delivery of numerous social and political activities The discussion extends to cover an analysis on human values and concludes with a recommendation on the functionality of civic capitalism With intuition and analytical reasoning within economics and with other social sciences Conceptual Economics can become a new branch in economic study where scholars analysts and intellectuals could think outside the box by liaising a wider economic perspective and or amalgamating non economic aspects into their analysis This shall provide a new dimension to solving human economic problems and possibly area of intellectuality *Industrial Relations* ,2009
