 Feeser,2017-07-05 Although much has been written on the aesthetic value of color there are other values that adhere to it  
 with economic and social values among them Through case studies of particular colors and colored objects this volume  
 demonstrates just how complex the history of color is by focusing on the diverse social and cultural meanings of color the  
 trouble pain and suffering behind the production and application of these colors the difficult technical processes for making  
 and applying color and the intricacy of commercial exchanges and knowledge transfers as commodities and techniques  
 moved from one region to another By emphasizing color s materiality the way in which it was produced exchanged and used  
 by artisans artists and craftspersons contributors draw attention to the disjuncture between the beauty of color and the blood  
 sweat and tears that went into its production circulation and application as well as to the complicated and varied social  
 meanings attached to color within specific historical and social contexts This book captures color s global history with  
 chapters on indigo plantations in India and the American South cochineal production in colonial Oaxaca the taste for brightly  
 colored Chinese objects in Europe and the thriving trade in vermilion between Europeans and Native Americans To  
 underscore the complexity of the technical knowledge behind color production there are chapters on the discovery of  
 Prussian blue Brazilian feather techn and wallpaper production To sound the depths of color s capacity for social and cultural  
 meaning making there are chapters that explore the significance of black ink in Shakespeare s sonnets red threads in women  
 s needlework samplers blues in Mayan sacred statuary and greens and yellows in colored glass bracelets that were traded  
 across the Arabian desert in the late Middle Ages The purpose of this book is to recover color s complex and sometimes
