Lucien Febvre Lecteur Et Critique:

Lucien Febvre lecteur et critique Bertrand Müller, 2014-04-01 Lucien Febvre a dominé l'historiographie de son temps et son oeuvre demeure exceptionnelle plus d'un titre Tout autant que ses livres souvent redits ses comptes rendus témoignent de ses combats pour et dans l'histoire Lecteur exceptionnel qui rien d'important ne chappait Lucien Febvre fut un critique remarquable implacable et redouté Ce travail de recension représente quotidiennement pendant près d'un demi-siècle au cours duquel il a rendu compte de près de deux mille ouvrages revêtu un militantisme pour une autre histoire ainsi qu'un engagement dans son temps Confronté un monde en crise crise de la civilisation occidentale du progrès et de la science Lucien Febvre s'est efforcé par le moyen de la critique de définir une ligne de conduite susceptible de fonder sa responsabilité d'historien comme savant et comme citoyen Ce travail militant représentait pour lui le meilleur moyen de multiplier les projets d'orienter la recherche d'expérimenter de nouveaux chantiers pour l'histoire et les sciences sociales Les multiples dimensions de cet engagement forment le coeur de ce livre qui n'est pas une biographie mais bien plutôt une généralisation d'un savoir-faire Avec une rigueur et une ampleur de vue remarquables Bertrand Müller propose une réflexion originale sur la notion d'oeuvre les contextes historiques et la construction du récit en histoire

[An Analysis of Lucien Febvre's The Problem of Unbelief in the 16th Century](#) Joseph Tendler, 2018-02-21 Febvre asked this core question in *The Problem of Unbelief* Could sixteenth century people hold religious views that were not those of official Church sanctioned Christianity or could they simply not believe at all The answer informed a wider debate on modern history particularly modern French history Did the religious attitudes of the Enlightenment and the twentieth century notably secularism and atheism first take root in the sixteenth century Could the spirit of scientific and rational inquiry of the twentieth century have begun with the rejection of God and Christianity by men such as Rabelais writing in his allegorical novel *Gargantua and Pantagruel* the work most often cited as a proto atheist text prior to Febvre's study The debate hinged on some key differences of interpretation Was Rabelais mocking the structures of the Christian Church in which case he might be anticlerical Was he mocking the Bible scriptures or Church doctrines in which case he might be anti-Christian Or was he mocking the very idea of God's existence in which case he might be an atheist The other great contribution that Febvre made to the study of history can be found not so much in the fine detail of this work as in the additions that he made to the historian's toolkit In this sense Febvre was highly creative indeed it can be argued that he ranks among the most creative of all historians He sought to move the study of history itself beyond its traditional focus on documentary records arguing instead that close analysis of language could open up a gateway into the ways in which people actually thought and to their subconscious minds This concept the focus on mentalities is core to the hugely influential approach of the *Annales* group of historians and it enabled a switch in the focus of much historical inquiry away from the study of elites and their deeds and towards new forms of broader social history Febvre also used techniques and models drawn from anthropology and sociology to create new ways of framing and answering questions

further extending the range of problems that could be addressed by historians Working together with colleagues such as Marc Bloch his understanding of what constituted evidence and of the meanings that could be attributed to it radically redefined what history is and what it should aspire to be , **The Annales School** André Burguière,2009 The Annales school emerged in the late 1920s around the history journal Annales d histoire conomique et sociale This book examines the origins and evolution of a group which still widely influences the study and teaching of history *French Historians 1900-2000* Philip Daileader,Philip Whalen,2010-03-16 French Historians 1900 2000 The New Historical Writing inTwentieth Century France examines the lives and writings of 40of France s great twentieth century historians Blends biography with critical analysis of major works placingthe work of the French historians in the context of their lifestories Includes contributions from over 30 international scholars Provides English speaking readers with a new insight into thekey French historians of the last century Handbook for the Study of the Historical Jesus (4 Vols) Tom Holmén,Stanley E.

The Oxford History of Historical Writing Axel Schneider,Daniel Woolf,2011-05-05 The fifth volume of The Oxford History of Historical Writing offers essays by leading scholars on the writing of history globally since 1945 Divided into two parts part one selects and surveys theoretical and interdisciplinary approaches to history and part two examines select national and regional historiographies throughout the world It aims at once to provide an authoritative survey of the field and to provoke cross cultural comparisons This is chronologically the last of five volumes in a series that explores representations of the past across the globe from the beginning of writing to the present day **The French Historical Revolution** Peter

Burke,2015-01-20 This book provides a critical history of the movement associated with the journal Annales from its foundation in 1929 to the present This movement has been the single most important force in the development of what is sometimes called the new history Renowned cultural historian Peter Burke distinguishes between four main generations in the development of the Annales School The first generation included Lucien Febvre and Marc Bloch who fought against the

old historical establishment and founded the journal *Annales* to encourage interdisciplinary collaboration. The second generation was dominated by Fernand Braudel whose magnificent work on the Mediterranean has become a modern classic. The third generation, deeply associated with the cultural turn in historical scholarship, includes recently well-known historians such as Emmanuel Le Roy Ladurie, Jacques Le Goff, and Georges Duby. This new edition brings us right up to the present and contemplates the work of a fourth generation, including practitioners such as Roger Chartier, Serge Gruzinski, and Jacques Revel. This new generation continued much of the cultural focus of the previous *Annales* historians while diversifying further and becoming increasingly reflexive, a move that owes much to the sociocultural theories of Michel Foucault, Michel de Certeau, and Pierre Bourdieu. Wide-ranging yet concise, this new edition of a classic work of analysis of one of the most important historical movements of the twentieth century will be welcomed by students of history and other social sciences and by the interested general reader.

French Sociology Johan Heilbron, 2015-11-06 French Sociology offers a uniquely comprehensive view of the oldest and still one of the most vibrant national traditions in sociology. Johan Heilbron covers the development of sociology in France from its beginnings in the early nineteenth century through the discipline's expansion in the late twentieth century, tracing the careers of figures from Auguste Comte to Pierre Bourdieu. Presenting fresh interpretations of how renowned thinkers such as Émile Durkheim and his collaborators defined the contours and content of the discipline and contributed to intellectual renewals in a wide range of other human sciences, Heilbron's sophisticated book is both an innovative sociological study and a major reference work in the history of the social sciences. Heilbron recounts the halting process by which sociology evolved from a new and improbable science into a legitimate academic discipline. Having entered the academic field at the end of the nineteenth century, sociology developed along two separate tracks: one in the Faculty of Letters, engendering an enduring dependence on philosophy and the humanities; the other in research institutes outside of the university in which sociology evolved within and across more specialized research areas. Distinguishing different dynamics and various cycles of change, Heilbron portrays the ways in which individuals and groups maneuvered within this changing structure, seizing opportunities as they arose. French Sociology vividly depicts the promises and pitfalls of a discipline that up to this day remains one of the most interdisciplinary endeavors among the human sciences in France.

Topography of a Method Henning Trüper, 2014-09-11 What does the practical work of writing contribute to historical writing? What does it mean for historical knowledge that it is inescapably written? Henning Trüper explores quotidian practices of writing as constituting the working life of a historian. The Belgian mediaevalist François Louis Ganshof (1895-1980) The argument draws on a large variety of texts and writing situations so as to discuss across the fault lines of twentieth-century historiography: shifting patterns of methodological discourse; procedures of historicisation; the making of scholarly sociability in writing practice; and finally the actual writing of historical text. Ganshof the historian, whether as author, reader, teacher, student, polemic, diplomat, witness, or mere voice on the radio, remained bound to paperwork, an ensemble of small

scale routines and makeshift solutions that ultimately lacked a central steering agency The nexus between historical knowledge and paperwork was indissoluble The Oxford History of Historical Writing Daniel R. Woolf, Andrew Feldherr, Grant Hardy, 2011-05-05 A chronological scholarly survey of the history of historical writing in five volumes Each volume covers a particular period of time from the beginning of writing to the present day and from all over the world *Le XVI^e siècle est un héros* Denis Crouzet, 2021-11-03 Succédant la tyrannie du Moyen Âge et précédant un XVII^e siècle de régression le XVI^e siècle fait figure de véritable balise pour l'historiographie française faisant naître de nouvelles façons de penser et de croire l'histoire Pour l'expliquer Denis Crouzet montre que la Renaissance fut dans la gestation de la critique de l'historien Jules Michelet qui le premier lui donna ses lettres de noblesse un vecteur d'une modernité promouvant des idées de liberté et de fraternité face aux atrocités et aux violences confessionnelles C'est dire que le XVI^e siècle cette époque où les hommes n'acceptant plus leur monde ont entrepris de le refonder et où est apparu un héros constitutif d'une mythologie républicaine le peuple eut pour Michelet un sens moral et politique qui le dépassait Face à l'échec de la Révolution et des révolutions du XIX^e siècle dont il est le contemporain la Renaissance devient un bouclier opposé au pessimisme d'une humanité en perte d'humanité qui permet non seulement Michelet de conjurer par son critique une part d'obscurité qui l'habiterait la mort de son frère qui aurait fait de lui un enfant de remplacement mais aussi d'affirmer que malgré les peurs qui hantent le passé des hommes les forces de vie et de liberté demeurent latentes et présentes à réactiver Dès lors l'historien peut croire qu'un avenir positif attend les hommes et l'histoire devient une pédagogie politique de l'espérance Les fils maudits de la République Gérard Noiriel, 2005-02-09 La séparation du savant et du politique s'est imposée en France au début de la III^e République libérant un espace dans le débat public qui fut occupé à partir de l'affaire Dreyfus par trois nouveaux personnages Il y eut d'abord par ordre d'entrée en scène l'intellectuel révolutionnaire philosophe d'obédience marxiste qui se battait pour l'abolition de la division du travail et de l'exploitation de l'homme par l'homme Vint ensuite l'intellectuel de gouvernement souvent historien qui invoqua les leçons de l'histoire pour prôner des réformes modérées Enfin l'intellectuel spécifique dans la lignée de Pierre Bourdieu affirme depuis peu que la science sociale est susceptible de guider la marche des hommes d'action Tout au long du XX^e siècle ces trois figures de l'engagement intellectuel se sont affrontées sans merci Tant que la conjoncture a nourri la croyance selon laquelle les savants étaient doués d'une lucidité particulière dans le domaine de la politique les intellectuels ont eu le vent en poupe Mais l'effondrement du mouvement ouvrier leur a été fatal Aujourd'hui privés d'appuis extérieurs pour se faire entendre sur la place publique ils sont condamnés à se regrouper et coordonner leurs efforts s'ils veulent continuer d'exercer un magistère dans la cité C'est ainsi que l'avenir des intellectuels français dépend finalement de la réponse qu'ils apporteront à la seule question qu'ils n'ont encore jamais osé affronter Qu'avons-nous en commun Les lieux de l'histoire Christian Amalvi, 2005-04-05 Ce livre constitue un essai d'archéologie des lieux indissociables de l'exercice de la critique de l'histoire et du métier d'historien Il dresse un inventaire topographique aussi complet et rigoureux que possible de

Networking the International System Madeleine Herren, 2014-06-13 The book critically investigates the local impact of international organizations beyond a Western rationale and aims to overcome Eurocentric patterns of analysis Considering Asian and Western examples the contributions originate from different disciplines and study areas and discuss a global approach which has been a blind spot in scholarly research on international organizations until now Using the 1930s as a historical reference the contributions question role of international organizations during conflicts war and crises gaining insights into their function as peacekeeping forces in the 21st century While chapter one discusses the historicity of international organizations and the availability of sources the second chapter deliberates on Eurocentrism and science policy considering the converging of newly created epistemic communities and old diplomatic elites Chapter 3 sheds light on international organizations as platforms expanding the field of research from the diversity of organizations to the patterns of global governance The final chapter turns to the question of how international organizations invented and introduced new fields of action pointing to the antithetic role of standardization the preservation of cultural heritage and the difficulties in reaching a non Western approach

Paris - Wien Elisabeth Nemeth, Nicolas Roudet, 2006-06-18 Eines der zentralen Anliegen des Wiener Kreises ist heute aktueller denn je Es bestand darin sichtbar zu machen wie ganz unterschiedliche weit auseinanderliegende Bereiche wissenschaftlicher Theoriebildung miteinander in Zusammenhang gebracht werden können Genannt sei hier Otto Neurath als Motor der ganzen Sache Die Encyclopedia of United Science sollte eine Vorstellung davon vermitteln wie moderne Wissenschaften ihre Erkenntnisansprüche formulieren und verpröfken Sie knüpfte ausdrücklich an die Enzyklopedien der französischen Aufklärung an Die in diesem Band zusammengefassten Beiträge durchleuchten das Aufklärungskonzept das der Enzyklopädie der Logischen Empiristen zugrunde liegt

La marcha de las ideas François Dosse, 2007 Este ambicioso libro trata de recomponer la pluralidad de figuras del intelectual a partir de la que apareció en Francia a raíz del affaire Dreyfus Entre la historia clásica de las ideas la historia de la filosofía la historia de las mentalidades y la historia cultural François Dosse siguiendo el camino de trabajos anteriores explora la historia intelectual como espacio de investigación Se trata de

analizar en conjunto a los autores y sus obras en el contexto en que han nacido rechazando la empobrecedora disyuntiva entre una lectura internalista de los textos y una aproximación externalista que privilegia exclusivamente las redes de sociabilidad. Teniendo en cuenta la renovación de la historia intelectual se interroga la evolución de las ideas en un ir y venir constante entre el pasado y las preguntas que formulamos al pasado en función de nuestro presente.

Wissenschaft und Praxis Christian Bonnet, Elisabeth Nemeth, 2015-11-24 Die Wissenschaftsphilosophie des frühen 20. Jahrhunderts ist reichhaltiger und differenzierter in ihren Standpunkten als lange vermutet. Die Autoren zeigen das anhand der nur teilweise erforschten Interaktion zwischen den Wissenschaftsphilosophen des deutschen und französischen Sprachraums. Das Buch liefert neue Erkenntnisse zur Rolle der Philosophiekongresse in Prag 1934 und Paris 1937 sowie zur Bedeutung einzelner Akteure wie Marcel Boll der die Rezeption des Logischen Empirismus in Frankreich beförderte. Die Spuren der Ernst Mach aber auch der weniger bekannte deutsche Physiologe und Hirnforscher Ewald Hering in der französischen Wissenschaftsphilosophie hinterließen verfolgen die Autoren bis hin zu den Ideen Jean Piagets. Im Mittelpunkt des Buchs stehen Philosophen aus Frankreich, Deutschland und Österreich und ihre Leistung die Wissenschaften nicht nur erkenntnistheoretisch und logisch durchleuchtet sondern auch erkannt zu haben dass ihre theoretische Struktur nur dann vollständig erfasst werden kann wenn ihre praktische Dimension mit einbezogen wird. Dafür steht Henri Poincaré der die tragende Rolle der Konventionen für die Theoriebildung in der Mathematik herausstellte. Sichtbar wird der Bezug zur Praxis auch in Moritz Schlicks Überlegungen zu einer auf Empirie basierenden Ethik oder in der Arbeit Otto Neuraths der eine aus den modernen Wissenschaften gewonnene Konzeption menschlichen Erkennens für das Projekt der gesellschaftlichen Aufklärung fruchtbar machen wollte.
