Memorandum Physical Science P26 September 2014:

Freedom's Laboratory Audra J. Wolfe, 2020-08-04 The Cold War ended long ago but the language of science and freedom continues to shape public debates over the relationship between science and politics in the United States Scientists like to proclaim that science knows no borders Scientific researchers follow the evidence where it leads their conclusions free of prejudice or ideology But is that really the case In Freedom's Laboratory Audra J Wolfe shows how these ideas were tested to their limits in the high stakes propaganda battles of the Cold War Wolfe examines the role that scientists in concert with administrators and policymakers played in American cultural diplomacy after World War II During this period the engines of US propaganda promoted a vision of science that highlighted empiricism objectivity a commitment to pure research and internationalism Working both overtly and covertly wittingly and unwittingly with governmental and private organizations scientists attempted to decide what exactly they meant when they referred to scientific freedom or the US ideology More frequently however they defined American science merely as the opposite of Communist science Uncovering many startling episodes of the close relationship between the US government and private scientific groups Freedom's Laboratory is the first work to explore science's link to US propaganda and psychological warfare campaigns during the Cold War Closing in the present day with a discussion of the 2017 March for Science and the prospects for science and science diplomacy in the Trump era the book demonstrates the continued hold of Cold War thinking on ideas about science and politics in the United States

Earthquakes and Multi-hazards Around the Pacific Rim, Vol. I Yongxian Zhang, Thomas Goebel, Zhigang Peng, Charles A. Williams, Mark Yoder, John B. Rundle, 2017-12-20 This is the first of two volumes devoted to earthquakes and multi hazards around the Pacific Rim The circum Pacific seismic belt is home to roughly 80% of the world's largest earthquakes making it the ideal location for investigating earthquakes and related hazards such as tsunamis and landslides Gathering 16 papers that cover a range of topics related to multi hazards the book is divided into three sections earthquake physics earthquake simulation and data assimilation and multi hazard assessment and earthquake forecasting models The first section includes papers on laboratory derived rheological parameters as well as seismic studies in the Gulf of California and China In turn the second section includes papers on improvements in earthquake simulators as well as the statistical methods used to evaluate their performance automated methods for determining fault slip using near field interferometric data variabilities in earthquake stress drops in California and the use of social media data to supplement physical sensor data when estimating local earthquake intensity The final section includes a paper on probabilistic tsunami hazard assessment several papers on time dependent seismic hazard analysis around the Pacific Rim and a paper on induced and triggered seismicity at the Geysers geothermal field in California Rapid advances are being made in our understanding of multi hazards as well as the range of tools used to investigate them This volume provides a representative cross section of how state of the art knowledge and tools are currently being applied to multi hazards around the Pacific Rim The material

here should be of interest to scientists involved in all areas of multi hazards particularly seismic and tsunami hazards In addition it offers a valuable resource for students in the geosciences covering a broad spectrum of topics related to hazard research *This Changes Everything* Naomi Klein,2014-09-16 With strong first hand reporting and an original provocative thesis Naomi Klein returns with this book on how the climate crisis must spur transformational political change

Convergence National Research Council,Division on Earth and Life Studies,Board on Life Sciences,Committee on Key Challenge Areas for Convergence and Health,2014-06-16 Convergence of the life sciences with fields including physical chemical mathematical computational engineering and social sciences is a key strategy to tackle complex challenges and achieve new and innovative solutions However institutions face a lack of guidance on how to establish effective programs what challenges they are likely to encounter and what strategies other organizations have used to address the issues that arise This advice is needed to harness the excitement generated by the concept of convergence and channel it into the policies structures and networks that will enable it to realize its goals Convergence investigates examples of organizations that have established mechanisms to support convergent research This report discusses details of current programs how organizations have chosen to measure success and what has worked and not worked in varied settings The report summarizes the lessons learned and provides organizations with strategies to tackle practical needs and implementation challenges in areas such as infrastructure student education and training faculty advancement and inter institutional partnerships *A Short Introduction to Geospatial Intelligence* Jack O'Connor,2023-10-27 A Short Introduction to Geospatial Intelligence explains the newest form of intelligence used by governments commercial organizations and individuals Geospatial intelligence combines late 20th century historically derived ways of thinking and early 21st century technologies of GIS GPS digital imaging satellites and communications satellites to identify measure and analyze the current risk in the world These ways of thinking have developed from military engineering cartography photointerpretation and imagery analysis While the oldest example dates back to the early 16th century all the ways of spatial thinking share the common thread of being developed and refined during conflicts to help military leaders make informed decisions prior to action In the 21st century thanks in great part to advances in digital precision technology miniaturization and the commercialization of satellites these ways of thinking have expanded from the military into various other industries and sectors including energy agriculture environment law enforcement global risk assessment and climate monitoring Features Analyzes human and algorithmic models for dealing with the challenge of analytic attention in an age of geospatial data overload Establishes an original model envisioning discovery recording comprehending and tracking for the spatial thinking that underpins the practice and growth of this emerging discipline Addresses the effects of small satellites on the collection and analysis of geospatial intelligence A Short Introduction to Geospatial Intelligence describes the development of the five steps in geospatial thinking envisioning discovery recording comprehending and tracking in addition to addressing the

 oversight of PBTs People of the State of Illinois V. Boston ,2014 **Using Film to Understand Childhood and**
Practice Sue Aitken,2018-02-08 Using Film to Understand Childhood and Practice is an innovative and lively text which
 allows complex and challenging issues within childhood studies to be explored using the medium of filmed drama By utilising
 popular culture this book provides accessible narratives to students and lecturers needing to engage with complex
 theoretical ideas In exposing theories to tangible situations often from more than one perspective in films readers are helped
 to identify and recognise how theories about children and childhood can be applied Each chapter uses a specific film to
 provide the basis for discussion in order to explore and analyse key concepts within childhood studies which include identity
 social construction families political and biological narratives children s rights and participation A range of international
 films are used including Charlie and the Chocolate Factory Rabbit Proof Fence The Hunger Games and The Red Balloon First
 introducing the theoretical perspective to be discussed chapters also include a contextual explanation of the film and list the
 specific scenes that will be used to guide students through Concluding with discussion questions students are asked to
 consider how the theories discussed might be translated in to their own experiences of children childhood and practice Not
 only supporting understanding of core principles and key ideas across any childhood studies degree this book supports

students throughout their university career and beyond by engaging with the journey of becoming a graduate as well as discussion of workplace issues and concepts after graduation

Property Rights in Outer Space Matthew Johnson, 2024-05-28 This book explores the role of private mining rights in the utopian imaginary of space colonisation It presents a transdisciplinary account of the new and evolving legislative frameworks that have been established in anticipation of commercial exploitation of the mineral resources of the off world frontier Written in an engaging style the book investigates a novel case study in the history of capitalism and the commons the emergence of a nascent space mining industry undergirded by a contentious legislative framework In 2015 the US passed laws that would recognise the claims of US corporations to own and sell space resources This unilateral act of pre-emptive law making would appear to contravene the terms of the UN Outer Space Treaty 1967 which declared that the exploration and use of outer space should be for the benefit of all mankind and not subject to national appropriation Using this central dynamic between privately held mining rights and outer space as a global commons Matthew Johnson constructs an historical sociology of space mining from the deep historical roots of common and private property to the contemporary networks of neoliberalism that have engaged with the commercialisation of space activity The anticipatory expansion of private property claims beyond the Earth both resonates with and problematises the terrain of political history such as the tensions between states and markets public law and private power the commons and exclusive property The emerging cosmopolitics of off world private property mirrors and is often explicitly embedded within neoliberal geopolitics prompting urgent questions about how we can reaffirm principles of democracy and common heritage in the international laws of Earth and space This book is compelling reading for anyone interested in the social study of space law economics technology

politics and property rights *Globalization Development and Social Justice* Ann El Khoury, 2015-03-27 Are there existing alternatives to corporate globalization What are the prospects for and commonalities between communities and movements such as Occupy the World Social Forum and alternative economies Globalization Development and Social Justice advances the proposition that another globalization is not only possible but already exists It demonstrates that there are multiple pathways towards development with social justice and argues that enabling propositional agency rather than oppositional agency such as resistance is a more effective alternative to neoliberal globalization El Khoury develops a theory of infraglobalization that emphasizes creative constitution not just contestation of global and local processes The book features case studies and examples of diverse economic practice and innovative emergent political forms from the Global South and North These case studies are located in the informal social economy and community development as well as everyday practices from prefigurative politics to community cooperatives and participatory planning This book makes an important contribution to debates about the prospects for and practices of a transformative grassroots globalization and to critical debates about globalization and development strategies It will be of interest to students and scholars of international relations globalization social movement studies political and economic geography sociology anthropology and development studies Managing Deep-sea Ecosystems at Ocean Basin Scale, Volume 1 J. The Andaman-Nicobar Accretionary Ridge P.C. Bandopadhyay ,A. Carter , 2017-03-01 Rocks exposed across the hundreds of islands that belong to the 800 km long Andaman Nicobar archipelago provide a condensed window into the active subduction zone that separates the India Australia plate from the over riding Burma Sunda plate Despite a strategic and seismically active location the Andaman Nicobar ridge has seen comparatively little research This Memoir provides the first detailed and comprehensive account of geological mapping and research across the island chain and adjacent ocean basins Chapters examine models of Cenozoic rifting of the Andaman Sea and the regional tectonic and seismogenic framework A detailed critical review of the Andaman Nicobar stratigraphy supported by new data includes arc volcanism and a description of Barren Island India s only active volcano Seismic history and hazards and the impacts of the 2004 earthquake and tsunami are also described The volume ends with an examination of the region s natural resources and hydrocarbon prospects

National Security Implications of Climate Change for U.S. Naval Forces National Research Council, Division on Engineering and Physical Sciences, Naval Studies Board, Committee on National Security Implications of Climate Change for U.S. Naval Forces, 2011-06-26 In response to the Chief of Naval Operations CNO the National Research Council appointed a committee operating under the auspices of the Naval Studies Board to study the national security implications of climate change for U S naval forces In conducting this study the committee found that even the most moderate current trends in climate if continued will present new national security challenges for the U S Navy Marine Corps and Coast Guard While the timing degree and consequences of future climate change impacts remain uncertain many

changes are already underway in regions around the world such as in the Arctic and call for action by U S naval leadership in response The terms of reference TOR directed that the study be based on Intergovernmental Panel on Climate Change IPCC scenarios and other peer reviewed assessment Therefore the committee did not address the science of climate change or challenge the scenarios on which the committee s findings and recommendations are based National Security Implications of Climate Change for U S Naval Forces addresses both the near and long term implications for U S naval forces in each of the four areas of the TOR and provides corresponding findings and recommendations This report and its conclusions are organized around six discussion areas all presented within the context of a changing climate
