Materializing the Middle Passage Jane Webster,2023-10-31 An estimated 2 7 million Africans made an enforced crossing of the Atlantic on British slave ships between c 1680 and 1807 a journey that has become known as the Middle Passage This book focuses on the slave ship itself The slave ship is the largest artefact of the Transatlantic slave trade but because so few examples of wrecked slaving vessels have been located at sea it is rarely studied by archaeologists Materializing the Middle Passage A Historical Archaeology of British Slave Shipping 1680 1807 argues that there are other ways for archaeologists to materialize the slave ship It employs a pioneering interdisciplinary methodology combining primary documentary sources maritime and terrestrial archaeology paintings maritime and ethnographic museum collections and many other sources to rebuild British slaving vessels and to identify changes to them over time The book then goes on to consider the reception of the slave ship and its trade goods in coastal West Africa and details the range and uses of the many African resources including ivory gold and live animals entering Britain on returning slave ships The third section of the book focuses on the Middle Passage experiences of both captives and crews and argues that greater attention needs to be paid to the coping mechanisms through which Africans survived yet also challenged their captive passage Finally Jane Webster asks why the African Middle Passage experience remains so elusive even after decades of scholarship dedicated to uncovering it She considers when how and why the crossing was remembered by saltwater captives in the Caribbean and North America The marriage of words and things attempted in this richly illustrated book is underpinned throughout by a theoretical perspective combining creolization and

postcolonial theory and by a central focus on the materiality of the slave ship and its regimes **Title Announcement**

Topic is dedicated to our co editor Dr Tiffany Moisan a well regarded ocean color remote sensing scientist who unexpectedly
passed away during its preparation Dr Moisan was a dear friend and upbeat and enthusiastic colleague and a scientist
committed to the use of remote sensing to improve our understanding of marine microbiology and phytoplankton ecology She
was a strong supporter of the development of remote sensing capabilities and applications for coastal and inland waters and
we know that she would have wanted this Research Topic to provide her colleagues an opportunity to share and promote
their work in this area A voice in our community is now quiet Let the chorus of our shared song continue with her memory Dr
Tiffany Moisan is survived by her loving family including her husband Dr John Moisan and her two daughters *Battelle*
